Julian Edward Wood

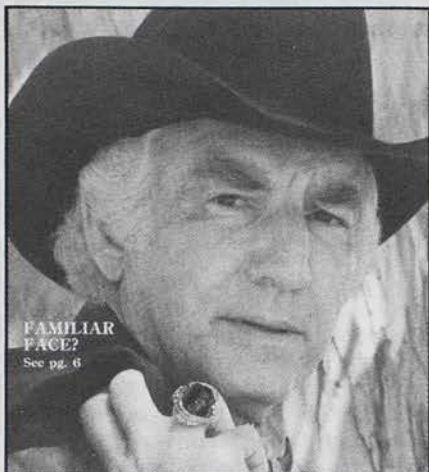

Of all the Founders, perhaps the most famed is Julian Edward Wood. Born May 3, 1844 in Currituck County, North Carolina, Brother Wood was eager for military service, even before he entered VMI. He volunteered for the Confederate army in high school and was assigned to drilling troops as early as June 1861.

Because his father, a physician, insisted that he further his education, Wood entered VMI in 1862 where his cadetship extended nearly three years. He earned the nickname "Ajax" because of his size and prowess. Later, in 1864, Wood earned fame for carrying the Confederate colors and rallying the troops in the battle of New Market. Actually the flag he "urged on" was not the Confederate flag, but the VMI Cadet flag. Federal troops seeing it assumed a foreign nation had joined forces with Gen. John Breckenridge.

In 1867 Wood entered the University of Virginia to study medicine. He lived in Room 125 and later practiced medicine. He served his community and maintained his military interest. Brother Wood died June 2, 1911 and is buried near his adopted home, Elizabeth City, NC.

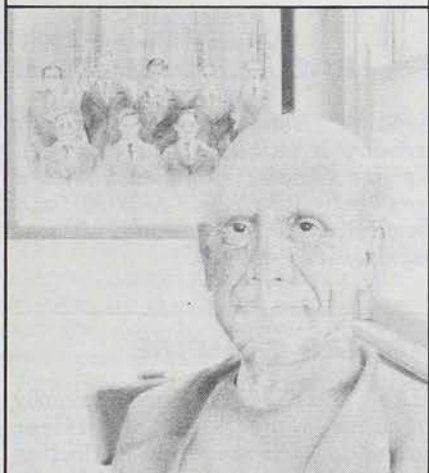

Portrait artist Paul J. Penczner painted Brother Wood and each of the other Founders in 1954 to coincide with the dedication of the Memorial Headquarters building in Memphis. This is the second of a series of six to be reprinted in *Shield & Diamond*.

SHIELD & DIAMOND is an educational journal published by the Pi Kappa Alpha Fraternity, 577 University Blvd., Memphis, TN 38112, quarterly, in September, December, March and June. Send correspondence to same address. Manuscripts are invited, but the publisher will not assume responsibility for return of unsolicited material. Changes of address should be reported promptly giving full name, chapter, old and new address. Undergraduates' copies are mailed to their parents' address until address change notification after graduation. Lifetime subscription must be renewed by request eight years after initiation year. Copyright 1981 by Pi Kappa Alpha Fraternity. All rights reserved. Second-Class postage paid at Memphis, TN. POSTMASTER: Send change of address on Form 3579 to Shield & Diamond, 577 University Blvd., Memphis, TN 38112.

TRAGICOMEDY

I RECENTLY received and read the June 1981 issue of the *S&D*. The article "A Tragicomedy of Errors" caught my attention and seemed to make sense to me. While there is a lot of tradition behind our present coat of arms, the fact that it is not a true coat of arms would override that and necessitate its replacement, whether with the one pictured or a close semblance.

My question to you is how to go about such a task — who makes the change, and what can active members or alumni do to hasten it?

Fraternally,
Dan H. Murrell
AI (Millsaps), 1981

WILLIAM SETZEKORN did not carry his research far enough in the article in the June issue about our coat of arms. I think it was at the 1948 Convention, or perhaps 1950, when Brother K. D. Pulcipher attempted to get the delegates to consider a change that would bring our coat of arms into line with basic rules and conventions of heraldry.

At least, I think it was Brother Pulcipher, but memory is a little bit hazy after all these years. In any event, I do recall very clearly that a change was proposed but a substantial majority preferred to stay as we were.

Fraternally,
James V. LeLaurin
H (Tulane), 1937

I READ in the June issue of the *Shield & Diamond* the article dealing with the rebirth of Beta Zeta chapter at Southern Methodist and Setzekorn's article "A Tragicomedy of Errors." Despite the fact our coat of arms may be pseudo, I am not certain I am ready to switch.

Fraternally,
Guyton H. Watkins
H (Tulane), 1942

I READ with much interest the article by William David Setzekorn on a coat of arms for Pi Kappa Alpha rearranged according to the laws of heraldry. I agree wholeheartedly with him that our Fraternity should have arms which are sound in conformity with the rules of heraldry.

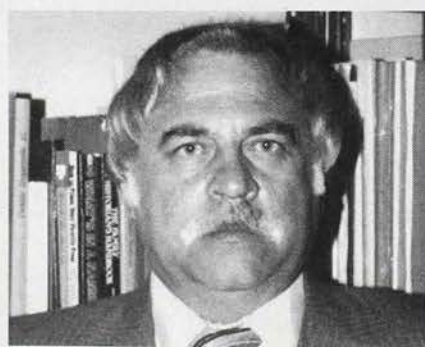

I have only a little knowledge of the subject, but enough to appreciate the wisdom of his suggestions. I hope this matter will not be allowed to die. It is very important to those who revere

FORUM

the ancient art of heraldry.

Fraternally,
Wm. P. Nottingham
BK (Emory), 1930

Editor's Note: The mail we received, pro and con Brother Setzekorn's recommendation that IIKA adopt a new coat of arms design, indicates broad interest. The proper channel for discussion of a new design is the biennial convention. All that is needed to get the ball rolling is for any member [alumnus or undergraduate] to propose a piece of legislation to the 1982 Washington D.C. Convention. By the way, Brother Setzekorn is pictured below. We received his photo and background data too late to include with the June issue article. He is an architect and author, educated at Kansas State [Alpha Omega] followed by a degree from Harvard Graduate School of Design. He is affiliated with many professional societies and organizations among them the Heraldry Society of the United Kingdom. Listed in Who's Who in the West and the National Social Directory, among others, Brother Setzekorn recently returned from Liechtenstein where he researched a book about that country.

RESERVE JUDGEMENT

THE NOTICE you gave to my *Woodruff Chronicles* is appreciated and perhaps I shouldn't mention the boo-boo that crept in. Every writer and publisher knows how easy it is for these little trouble makers to get the better of us.

My fraternity chapter, Beta Epsilon, refers of course to Western Reserve University at Cleveland, Ohio and not to Colorado University. No harm done, I'm sure.

Speaking of my own chapter, very few of us original brothers, of the

1915 vintage, are still alive. Some of the Colorado University brothers, however, might wonder about a brother named Woodruff of whom they had no record.

Fraternally,
C. N. Woodruff, 1915
BE (Western Reserve)

NO ERR

RECEIVED THE June *S&D* and read on page five that the Smythe Award was first given in 1932.

Please check your records again and see that it was first given in either 1929 or 1931 to Beta Sigma at Carnegie-Mellon University (then Carnegie Institute of Technology). I was SMC 1929-30 and 1930-31 and recall that Beta Sigma received it one of those two years. I also recall Beta Sigma was the first chapter to receive the award. Correct me if I err.

Fraternally,
Harold Yeager, 1928
BS (Carnegie-Mellon)

Editor's Note: Brother Yeager's memory is unfailing. The Robert A. Smythe Chapter Proficiency Award was introduced in 1929-30 and first given to Beta Sigma. It was reintroduced in 1932.

PROMO SCHEME

HAS THE *S&D* unconsciously become some kind of officer promotion scheme while neglecting the great men of the organization?

That picture as representative of "annual Congressional Founders Day" was surely disappointing! We as readers are interested in seeing the pictures of the Senators and Representatives and other dignitaries who serve as exemplaries for the membership.

Let us hope you bear this in mind in preparing the rush issue.

And I do want to congratulate you and General Wilson for his fine article. You finally got around to it! And I for one would like to see more articles by Commandant Wilson. This man has it all together. Our Fraternity could never find a finer man to emulate. For him I say "Bravo!" For your bathing beauties I say "Go brow!"

My greatest praise to Beta Zeta (SMU), the greatest proof ever of positive thinking. John Wesley would be mighty pleased.

Fraternally,
Carl Portz
FZ (Wittenberg), 1926

GEARS members Tom Alinder and Steve Remark with instructor Bob Schwartz.

DAKOTA GREEKS TO BE COUNSELORS

PEER COUNSELING has switched into high GEAR at University of North Dakota fraternities and sororities. And members of Zeta Rho chapter have played an important part.

The Greek Early Advisement and Referral System (GEARS) was founded recently to enhance the brotherhood and sisterhood already prominent in each house.

Program planners knew there were a handful of individuals in each house other members look up to or seek out for advice. They wanted to polish the skills of those individuals and other interested and respected chapter members.

The result is a three-semester-old program that has trained eighty campus Greeks in effective listening and interpersonal and human relations skills.

Volunteers broadened their knowledge of campus and community resources. They learned to identify and discuss problems and make referrals if needed.

Bob Schwartz, assistant dean of students and one of three program developers, calls GEARS "a neat way to deal with major and minor crises."

"New students in the Greek system have problems they're not likely to run over to McCannel (the UND building that houses offices for counseling, career planning, student health, handicapped students, veterans and chemical abuse) between 8 and 4 to talk about," he said.

So there are GEARS persons in the house instead. Schwartz said he thinks UND's program is the first of

UPDATE

its kind to apply peer counseling specifically to fraternities and sororities.

Schwartz ranked participation and success of the program as first-rate.

So does one Pike who participated.

Terry Watne, a junior, said he did a lot of talking to brothers in the house, and said the GEARS training helped him do a better job.

Pikes Tom Alinder and Steve Remark are now involved in the GEARS program at UND.

FOUR ADDED TO CONSULTANT CORPS

THE DYNAMIC half-dozen they could be called — Pi Kappa Alpha's corps of chapter consultants. Though four new recent graduates join the corps this year, it will be as dynamic as its reputation once again.

Each year, Pi Kappa Alpha's success is largely credited to the young men who travel the nation, from chapter to chapter, helping each group to become the best that it can on its campus.

Joining the consultant corps this year are Greg Wilson, Eta Phi (Central Florida), Rodney Stephens, Gamma Alpha (Alabama), David Rheney, Eta Alpha (Clemson), and Dean Rose, Beta Omicron (Oklahoma). Traveling another year are two of the most outstanding members of last year's corps, Andy Doyle, Eta Alpha (Clemson), and David Heckel, Beta Phi (Purdue).

Wilson

Stephens

Brother Wilson graduated with a BSBA in marketing in May. He held several leadership positions in Eta Phi, one of the Fraternity's most outstanding chapters, including vice president, rush chairman and pledge coordinator. He is a member of Omicron Delta Kappa and the Order of Omega Greek honoraries and was selected for UCF's Orientation Team. Wilson will travel the Mid-western states.

Brother Stephens graduated from Alabama with a BS in history and political science. He served as president, rush chairman and alumni relations chairman and was initiated into Jason's, a men's honorary. Stephens will travel Kentucky, Tennessee, North and South Carolina

Rheney

Rose

Brother Rheney earned a BS in administrative management at Clemson. He served Eta Alpha, a Smythe Award chapter, as rush chairman, house manager and special events chairman and was a varsity cheerleader. Rheney was elected to the Tiger Brotherhood. The states of New Mexico, Texas, Arkansas and Louisiana will benefit from Rheney's travels.

Brother Rose was a fine arts graduate with a specialty in advertising design at Oklahoma's School of Journalism. Rose served Beta Omicron as president, pledge committee member, house manager, kitchen manager, historian and Executive Council member. He was initiated into Gamma Gamma, an honor society for the top ten percent of the junior class. Rose will travel the Southeastern states.

Brother Doyle, who distinguished himself as a consultant in the Southeast last year will travel the West this year. Brother Heckel will travel the Northeastern U.S. in 1981-82.

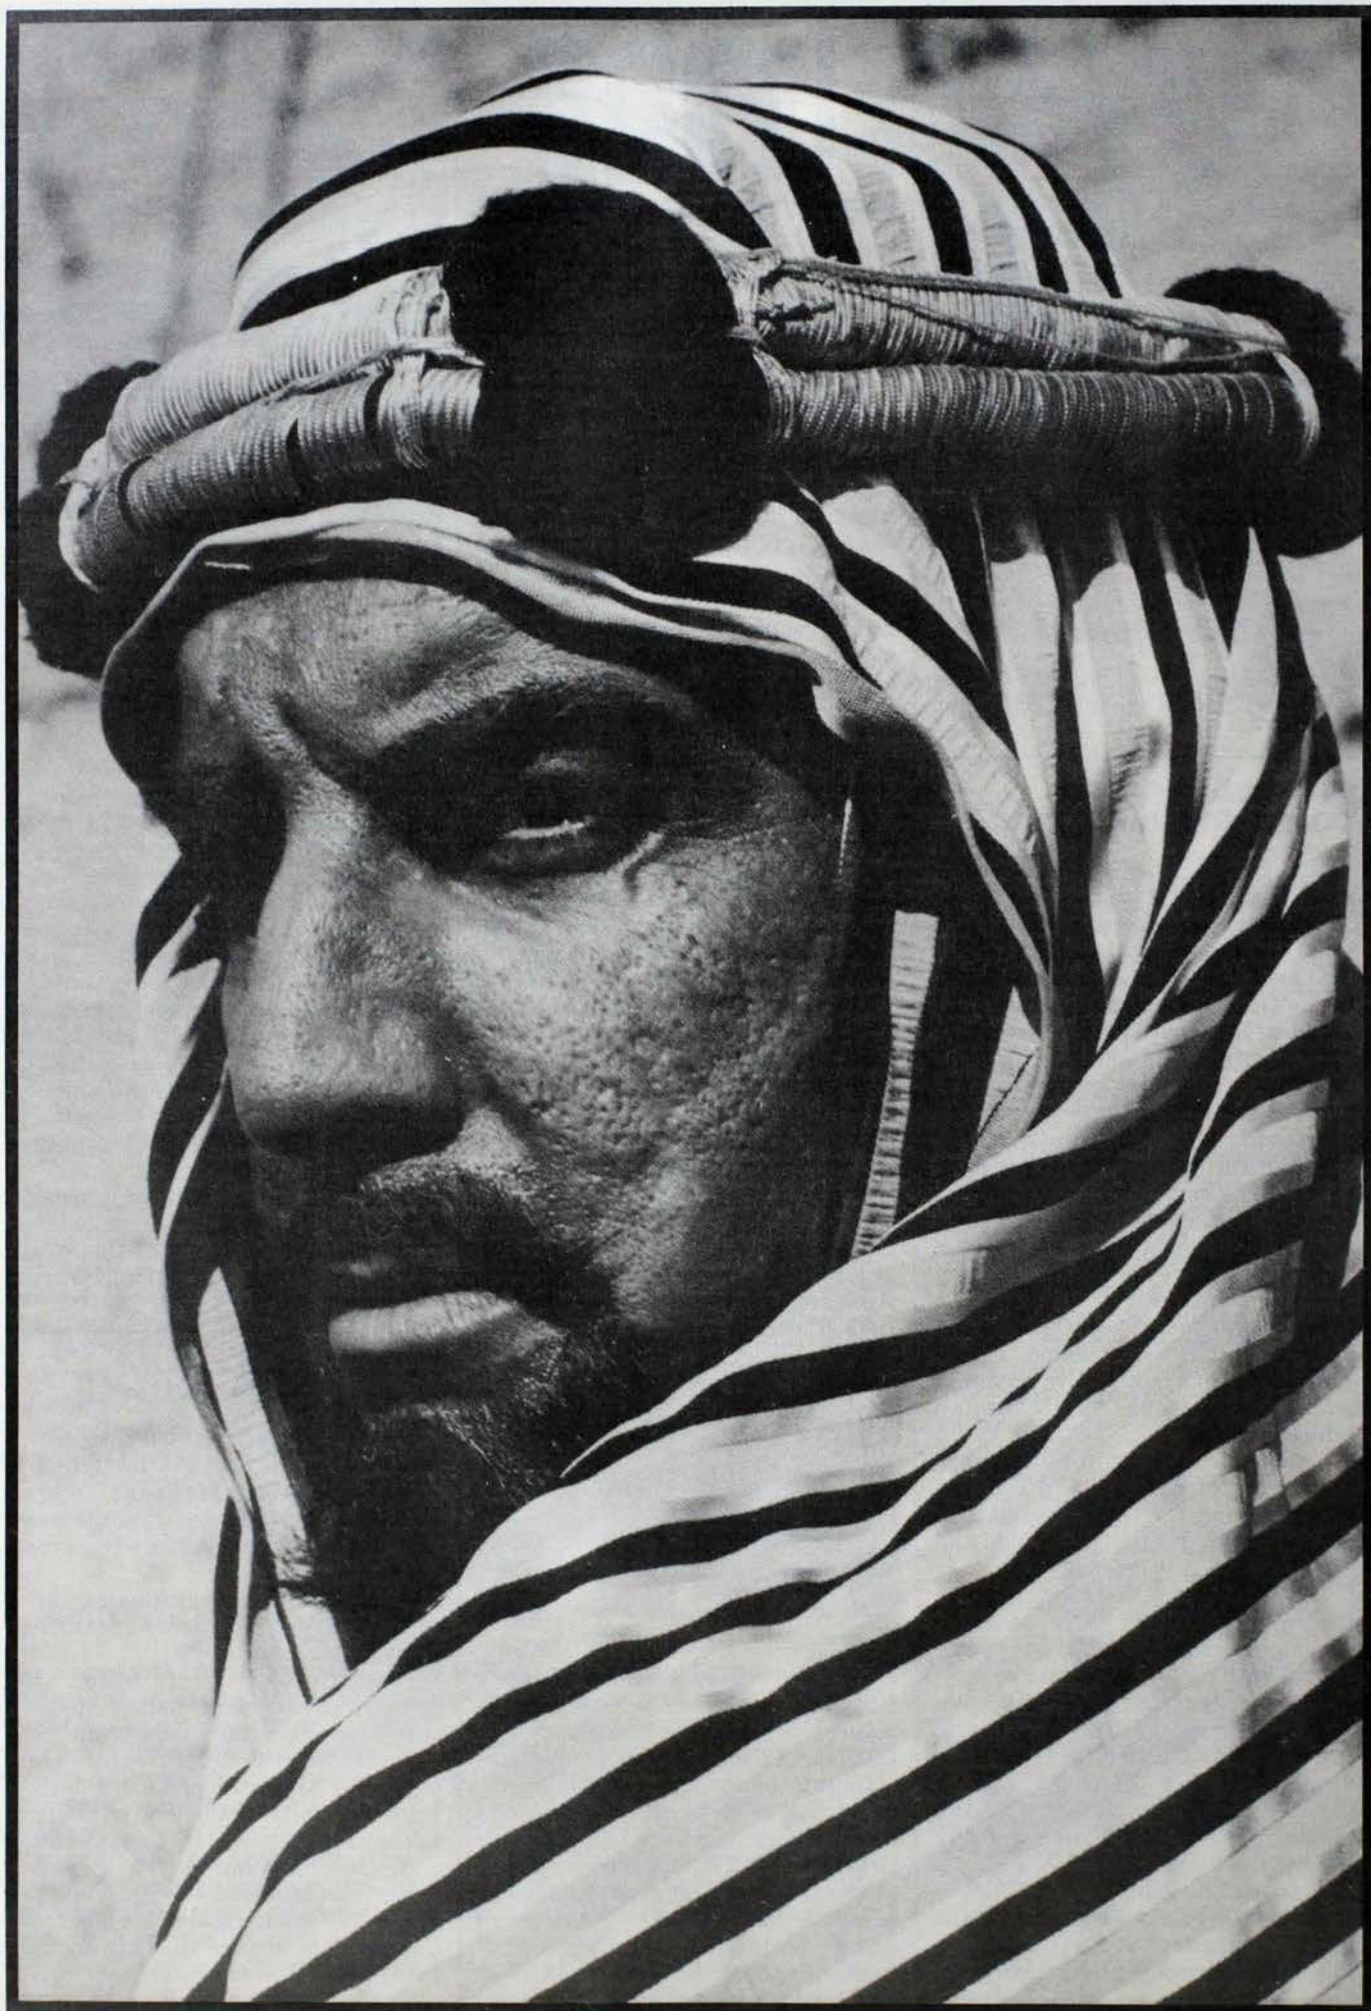

KESSLER, BYNUM ELECTED TO BODY

WILLIAM "CHIP" Kessler, Upsilon (Auburn), and Randall L. Bynum, Alpha Zeta (Arkansas), were recently elected to the Supreme Council undergraduate vice president slots.

Two new undergraduates are elected by the Council to the positions every year.

Brother Kessler, a senior, is student government liaison to the City Council committees, secretary of the Builders Guild and the administrative vice president to the Interfraternity Council at Auburn. He has also served IKA as SMC.

Brother Bynum, a senior, is a student senator and vice president of Order of Omega and a member of College Republicans at Arkansas. He too is SMC of his chapter.

THE MANY FACES OF MORGAN WOODWARD

MANY OF us fantasize about things we'll never have — fame, riches, power. I know a man who, in his industry, has all three. But he fantasizes about none of them.

Drop by an old country airport in Southern California some Saturday and you may find him there, fantasizing . . . out loud with the old timers who hang out at old country airports.

Morgan Woodward was recently named one of the six most wanted actors in television and motion pictures by casting directors. Yet he would be piloting a World War I biplane if he had his druthers. That's why he often whiles away weekends with former pilots and technicians, the men who flew the old planes, who are the aces of what Woodward calls "hanger flying" now-a-days.

But when he's not hanger flying or test flying one of his own rebuilt planes, he's working. And that's more than most Hollywood character actors can say at any given time. But Woodward works all the time. Casting directors keep his Hollywood home telephone ringing off the wall, tempting him with role after role, because Morgan is a great character actor.

In the past twenty-four years, he has appeared in over 250 films, twenty-nine motion pictures, guest starred in nearly every series made for TV and has completed, in addition, fifteen television movies.

Though his distinguished career hasn't brought him worldwide recognition, he is among the most popular where it counts — among casting directors.

And now among Pikes. For Morgan Woodward was recently named by Pi Kappa Alpha's Supreme Council as the 1981 Distinguished Achievement Award recipient. Given annually since 1936 for an alumnus who has made the most distinguished record in his profession or public service, the DAA has been awarded to such men as Senators Everett M. Dirksen and Wayne Morse, athletes Lance Alworth and Wes Fesler, educators, businessmen and philanthropists, too. Now, add entertainment, for the first time, to the list.

Other Pikes have known screen fame. Fess Parker, for example. Fess and Morgan attended the University of Texas together, were brothers at Beta Mu chapter in the late forties and early fifties. And they are best of friends, even today. And Fess will be among the first to congratulate Morgan.

"Fess and I were close at the university," recalls Morgan. "We are both fliers, so we're still close."

Morgan adds, "I stay in touch with many of my Fraternity brothers, and I have been involved financially in a lot of their business. I have invested with my Fraternity brothers and it has been very good for me."

Brother Parker, alias Davy Crockett and Daniel Boone, wasn't the only classmate at Texas who earned Hollywood success. Among Morgan's undergraduate friends were Jayne Mansfield, Kathy (Mrs. Bing) Crosby, Rip Torn, Pat Hingle and the co-authors of "The Fantastics" Tommy Jones and Harvey Schmidt.

"Texas had a sensational drama department," understates Morgan.

Yet it was Fess who remained the closest. Fess helped the Pikes throw Morgan in the Texas fountain for his success with a campus radio program which he co-hosted with a beautiful young lady on Sunday afternoons in Austin.

And it was Fess who got him his first showbiz break.

Parker was big with Walt Disney studios and had just been signed to play James J. Andrews, the famous Union spy in *The Great Locomotive Chase*. Fess told Disney that he had a friend who was a good actor. Disney sent for Woodward for a screen test, and he got the part.

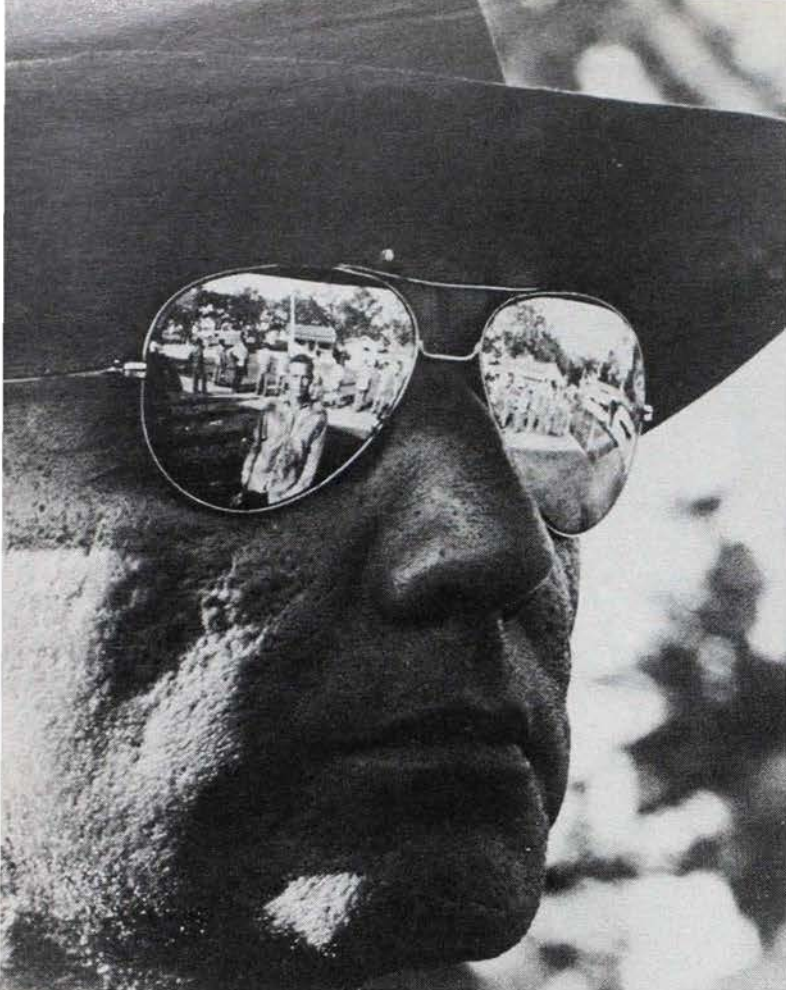

Perhaps because he has enjoyed positive fraternity relationships, Morgan makes a habit of looking up Pike chapters in his travels around the country.

"I have met some terrific guys around the country because I'm very social and, strangely enough, I seem to run into a lot of Pikes."

The Pikes he meets always ask the same question, "What was your favorite role?"

"The role I was most acclaimed for," responds Morgan, "was the role of 'the man with no eyes' in *Cool Hand Luke*. I came very close to being nominated for an Academy Award. I guess if George Kennedy hadn't been in the same picture and been so good, I would have been nominated."

"But the role that has been my favorite was on *Guns, Smoke* which was certainly one of my favorite shows to do. You really had an opportunity to do good work on that show if you were

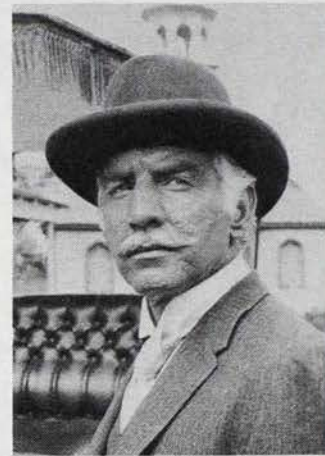

Man with no eyes in Cool Hand Luke, starring (in sunglasses) Paul Newman.

Woodward, with gun, and Brother Fess Parker in Walt Disney's Great Locomotive Chase.

With J.R. on Dallas set.

Death of a Gunfighter, 1968.

fortunate enough to be asked to guest star. It was the role of a mountain man in an episode called "Lobo" that I remember best. It was the only time in my entire film career that I ever watched myself in a performance and forgot that I was watching me."

If he could, however, Morgan would like to do a musical. "Man of La Mancha," he states positively when asked if there is a role he'd like a chance to play. Morgan started out as a singer and had aspirations toward Broadway and live performances. He still sings, but now his voice is reserved for morning showers. His favorite shower song? "Old Man River."

Except for his hanger flying, Morgan is more inclined to look toward the future. And in his business, he sees nothing but more work. Cable TV is why.

"I have been telling my fellow actors for several years that cable and pay television were going to make all the difference in the world. It is going like wild fire now."

Actors everywhere welcome the new work, even though it may mean playing roles that they would prefer to leave to others.

"Even though we do a lot of work we wouldn't ordinarily do, that is how we make our living and we just

simply cannot turn down everything until we find something that we feel is absolutely compatible with our way of thinking or that you wouldn't be ashamed to have your mother see." He adds, "It doesn't make any difference what echelon we're on, we all do work that unfortunately sometimes we are not very proud of."

Part of the blame rests with the viewing public.

"I sometimes think the viewer is a sheep and that the sheep don't make enough noise when they get satisfied. The public controls television, and if the public would let the networks know, which they do not, they could get something done about the problems of TV programming."

The Moral Majority attempted to do just that recently, and Morgan expresses what he believes most actors feel about their attempt.

"We can say that they had some impact because some of the biggest advertisers in the country changed their sponsorships. But I'm not for that type of action. We don't like censorship by an individual or any group, but on the other hand all of us would like to have better quality programming."

Woodward points to former NBC executive Fred Silverman's approach as the typical decision-

making process for television programming.

"Silverman personally thought *Sheriff Lobo* was a funny show. When it started going downhill, what is the first thing you saw coming in? A lot of good looking, well built girls. It still went down the drain. But that is one of the first prescriptions that they always write for the shows — bring on the girls."

As for the far-off future, Woodward is contemplating a directing career. Robert Redford is a prime example of actor-turned-director and making good.

"It didn't surprise me that he won an Academy Award for his first effort," Morgan says, "because Redford is a man who takes his crafts very seriously, a talented man who is always well prepared."

But for now, Morgan is content to be the most sought-after character actor in Hollywood. He is currently starring as Punk Anderson on the popular series *Dallas*, among other projects.

And he continues to fantasize. Not about worldwide acclamation and recognition, but about flying. Snoopy, move over. It's Woodward versus the Red Baron today.

Photo on page 6 taken from Sword of Ali Babba, 1961.

K.D. PULCIPHER 1899-1981

SIXTY-FOUR years a member of Pi Kappa Alpha, and perhaps one of Pi Kappa Alpha's most productive servants, Keeler DeWitt "K.D." Pulcipher died July 16. He was 82.

Beginning in 1917, when he founded the *Beta Eta News*, published continuously except for WWI since then, K.D. accomplished

K.D. Pulcipher, Shield & Diamond Editor

much for his beloved Fraternity. He was managing editor and then editor of *The Shield & Diamond*, 1924-42, national secretary, 1942-46, chairman of the Seventy-fifth Jubilee Anniversary, secretary of the Centennial Commission, 1964-68 and a valued advisor to all staff and national officers up to his death.

During his editorship, he modernized the magazine to the more popular size that it now has. He added color and colorful articles and regularly published the works of noted artists such as E. M. Jackson and Lon Keller. Issues frequently included up to ninety-six pages and were published five times per year.

In search of new and interesting magazine material in 1926, Pulcipher discovered Dr. Freeman H. Hart, history professor at Hampden-Sydney, and persuaded him to dig into the beginnings of the Fraternity and write a series of articles. His research led to contacts with descendants of the Founders. He ultimately discovered the original minutes (on display in the Freeman H. Hart Museum of the Memorial Headquarters), and unearthed original photographs of all the Founders. His research led to IKA's first history book.

Brother Pulcipher also advocated a permanent national headquarters culminating in the selection of Memphis, urged the establishment of chapter officer schools, first held in

CHAPTER ETERNAL

1948 and known now as leadership academies, pushed for establishment of a IKA museum, development of a national public relations program and the conversion of the Endowment Fund into the Memorial Foundation in honor of the war dead.

Pulcipher was also president of alumni groups in Chicago and Detroit and was president of the College Fraternity Editors Association. He attended twenty of the past twenty-six national conventions beginning in New York in 1922 at which surviving Founder William Alexander addressed the Fraternity.

Brother Pulcipher was a long time public relations, advertising and marketing executive. His son, Donald, a Princeton graduate, was the Centennial Convention initiate.

LYNN O. "PAPPY" WALDORF 1902-1981

THE GAME of football never had a more popular player, coach and recruiter as Brother Lynn "Pappy" Waldorf. Football lost its grand old man August 15 of an apparent heart attack as the seventy-nine year old Waldorf was taking his daily walk in upper north Berkeley, the California Bay area city which became home to Pappy after his golden coaching and recruiting years there.

The eldest son of a Methodist

"Pappy" Waldorf, Cal. coach

minister, Waldorf graduated from Syracuse University where he was SMC of Alpha Chi chapter, president of the senior class and IFC and a second team all-American on the football team, 1922 and 1924. He also lettered in varsity crew. Signs of success to come.

He coached college football for thirty-two years beginning at Oklahoma City University, through Kansas University and Oklahoma A&M (now Oklahoma State) where he won three Missouri Valley championships. He added a Big Six (now Big Eight) title in a year at Kansas State then three Big Ten championships in eleven years at Northwestern.

In 1947 Brother Waldorf accepted the head coaching position at volatile University of California where Stanford and Cal football reigned supreme, but also where Cal couldn't win.

Midway in Waldorf's first year at Cal, *San Francisco Chronicle* Sports Editor Bill Leiser poked fun at a *Saturday Evening Post* article entitled "Coach's Graveyard." By that time, Waldorf's team had won five games and there were signs in Berkeley shop windows, "Win with Lynn."

He retired as head coach in 1957 and answered a call from the San Francisco 49ers to be director of personnel. There he scouted and recruited pro prospects until his retirement in 1972 at the age of seventy. Even then, he continued to cover games for the 49ers.

The subject of no less than a dozen *Shield & Diamond* articles over the years, Brother Waldorf and Pi Kappa Alpha were on the best of terms.

Pappy once said, "Pi Kappa Alpha has been tremendous for me. I owe much of my personal development to the Fraternity. Would I do it again? You bet I would."

And we'd have you again, too, Pappy.

The OLDEST Living Graduate

FICTION by
Larry Lunsford

"THE CHAPTER'S oldest living graduate, huh? I never dreamed ... I thought Ben Parker ... No, I guess old Ben died a while back. There was, uh, now, let me see, what was his name? Oh, well, don't matter anyway. Guess if you say it's so, son, then it is. Guess it is."

William Underwood's words seemed to fade into sleep as we sat talking together. Little did I know that it wasn't sleep that took Mr. Underwood away from our conversation but a deep concentration on seventy-seven years of membership in Pi Kappa Alpha. As SMC of my chapter, I had come to Mr. Underwood's nursing home room to complete arrangements for him to be the guest of honor at the upcoming centennial celebration of our chapter's founding.

After checking with the folks at Memorial Headquarters, we were able to ascertain that William Underwood, initiated into our chapter in 1904, was the oldest living graduate not only of our chapter but perhaps of the entire Fraternity. I had been in the Fraternity for only three years, and there I sat with a man who was initiated seventy-seven years ago.

Even though I was excited about my pending visit with Mr. Underwood, I wasn't sure what to expect.

After all, he was ninety-five years old and could have been senile for all I knew.

After clearing plans for my visit with the nursing home officials and Mr. Underwood's family, I borrowed my roommate's car and drove the twenty-five miles to the nursing home. I considered it fortunate that Mr. Underwood lived in a city near the college.

After checking in at the reception area and learning Mr. Underwood's room number, I took the elevator to the fourth floor. As I walked down the carpeted hallway, I passed several elderly people, some who smiled gently, a few who said hello and others who struggled with walkers to take a few small steps.

My anxiety increased as I checked the numbers on the doors and I walked more quickly. I couldn't explain my own hypertension, but I was uncomfortable being in the nursing home. My mission had suddenly become an obligation rather than a privilege, and I wanted to get it done and get out.

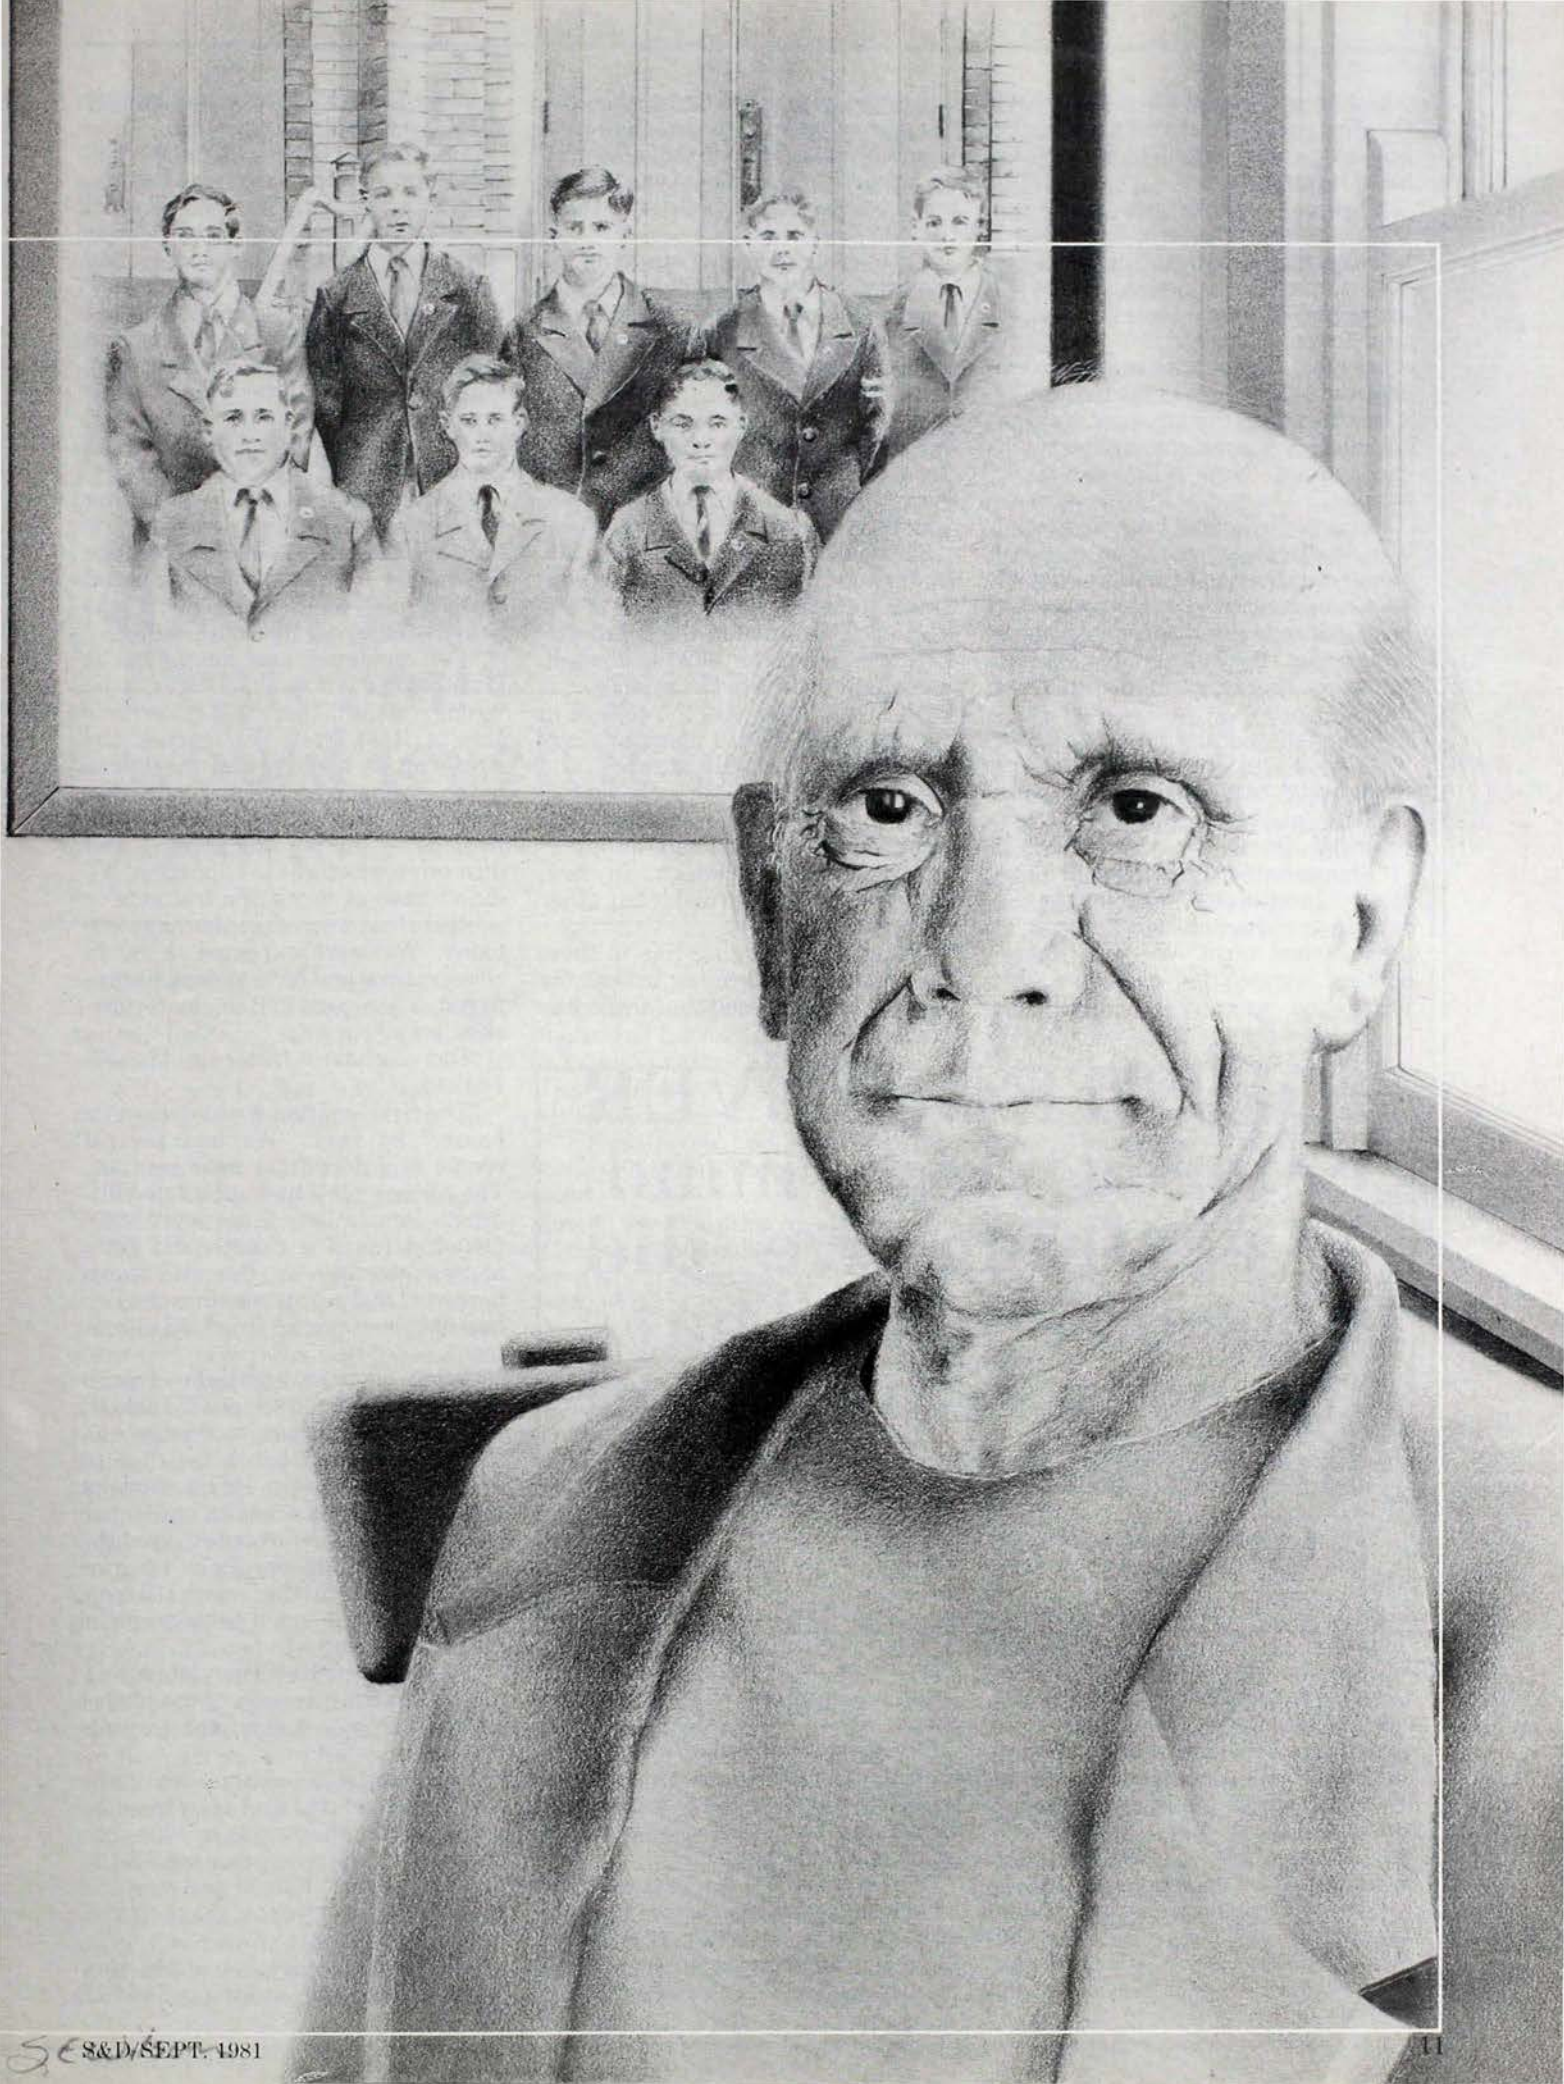

I reached the last room at that end of the hallway, and I realized that I had gone the wrong way down the hallway. I turned rapidly, and in my hurry, bumped into an elderly gentleman walking with a cane. The cane fell to the floor, and I stood

stunned, staring into his cold, blue eyes.

"Excuse me," I finally uttered with embarrassment. I reached down, picked up the cane and handed it to the man. He shook his head and continued on his way, never saying a word. I felt as though I should have said more, but I decided otherwise and resumed my search for Mr. Underwood's room.

Having located Room 416, I tapped lightly on the door. I had the feeling that I was in a hospital instead of a nursing home, and I didn't want to disturb anyone. There was no response. Good, I thought, I can go. Yet, I knew that I would only have to come back again later. The chapter was depending on Mr. Underwood's presence at our centennial celebration, so I knocked louder. I heard a faint "come in," and I turned the handle and slowly entered the room.

I still couldn't explain my uneasiness, and my embarrassment forced me to regain my composure and smile at the man I presumed to be Mr. Underwood. He sat in an old rocker and closed a book he appeared to have been reading as I entered the room. Realizing that he might try to stand to greet me, I hastened to him and offered my hand. "Mr. Underwood, my name is John Bender, SMC of your chapter," I said. I wasn't sure

whether or not to give him the grip of the Fraternity. I decided no, to spare him any embarrassment in case he had forgotten it.

"It's good to meet you, John," his voice sounded typically aged, but I was impressed with the clearness of the words. He appeared to be in possession of his mental faculties, and I was ashamed for assuming otherwise. He motioned toward a chair and told me to be seated. "Slide it a little closer, though, son," he said, "because my eyesight isn't what it used to be. Now what can I do for you?"

Supposedly he had been told why I was coming to see him, and I wondered if he had forgotten. Again I began to feel uneasy. He seemed to have sensed my apprehensiveness and broke the silence by asking, "How is the chapter doing these days?"

"Fine," I said and added quickly, "You'd be really proud of us." I thought it'd be a good idea to tell him a little about the chapter. He'd probably like that.

"Things have been going well for us lately," I continued. "We have over 80 men in the chapter, and we took 20 pledges last term. We won Homecoming competition with the Tri-Delts, and we're getting ready for

but merely pondering a thought. "Yep, if you say it's so, son, then so be it, and I'm glad to hear that all is well with the old place. Why, I can tell you there was a time that I didn't think that we'd make it."

He paused to collect his thoughts and then continued, "That chapter was dead three times before the turn of the century. Those were rough times in those days, not only for the Fraternity but for colleges in general. The college had only ninety-some students in the 1890's, all men. Not just anyone went to college back then. No sir, you had to be the son of somebody to even afford to go."

I became more impressed with Mr. Underwood's memory as he continued to recall the early days of our chapter at the turn of the century.

"Since the late 1890's, though, we've kept growing; but mind you, it wasn't easy. I came to the college in the fall of 1904 with plans to study law. My father was an attorney, and even though we weren't rich, we had more money than most folks, and both my brother and I had the opportunity to attend college. In fact, father wouldn't have had it any other way."

"What was pledging like in those days?" I asked, expecting to hear the worst since I realized that there was

I asked him whether or not he ever considered depledging.

"Oh, no," he replied. "If you weren't in a fraternity, then you were nobody. It was expected. We had several faculty members who were IIKA's as well as some in other fraternities, and they took part in the fraternities' activities, especially in stressing the value of education on the fraternity members. Quitting never even entered my mind. Everything we did was accepted. That's the way it was, and that's the way it had always been."

I began to worry that I was taking up too much of Mr. Underwood's time but once I mentioned it, he waved me off, telling me that he was fine and that he enjoyed the company. I was actually enjoying his reminiscing.

"Yes, pledging was tough, but it lasted only a few weeks. Don't get me wrong, though. There was the serious side of it as well. We learned the Fraternity's history, and there was much emphasis placed on academics. Most of us wanted to go into the professions — law or medicine — and discipline was tight in education. We didn't have as much of a free ride or control of our own education as you do today. We were expected to be in class on time and have all lessons prepared. There was hell to pay for disobedience."

"Did you have a fraternity house?" I asked.

"The first location we had wasn't a house," he said. "We had several rooms in a dormitory near campus. The college itself had but a few buildings. Remember, there were very few students. The chapter did get a house sometime in the mid-teens, however, and I presume that they've had one ever since." I nodded agreement.

"What was the highlight of your days as an undergraduate?" I asked.

He paused a minute to think about the question, and I took the time to look around his room. He had various articles of memorabilia collected over the past nine decades throughout the small, yet cozy room. I began to search for something with IIKA on it, and I spotted an old photograph in a wooden frame.

"Is that a fraternity picture?" I pointed in the direction of the photograph sitting on a shelf and leaning against the wall.

He squinted his eyes in the direction I had pointed and attempted to focus on the photograph. "I'm not sure which one you mean, son. Get it and let me see." I stood and took the photograph gently from the shelf and handed it to him.

"Oh, yes, this was taken after I was already out and studying law. I

"QUITTING NEVER entered my mind. Everything we did was accepted. That's the way it was, and that's the way it has always been."

Greek Week activities next week. Of course everyone is gearing up for our centennial celebration this spring, and that's why I came to see you, to invite you to be our guest of honor since you're our oldest living graduate." There, that was easy, I thought to myself. I waited for a response.

I thought perhaps he had fallen asleep. I wasn't sure if I should awaken him or leave. I waited and then realized that he wasn't asleep

much hazing in the early days of the Fraternity.

"Pledging occurred at any time in those days. There wasn't a formal system. There were only five fraternities on campus then, and we did pretty much what we wanted."

"The fact is that I was even pledged before I got to college. There were six of us in the pledge class, and part of the program seemed to be based on fear, as well as I can remember."

remained active with the group. We didn't have different levels of status then. Once you were in, you stayed in as long as you wanted to be involved. I believe this was taken about 1910. I don't remember all their names."

He handed me the photograph, and I looked at it more closely. Yes, there it was on each lapel of the eight men pictured — the badge of the Fraternity! "All of you are wearing the

so we passed a lot of legislation changing their titles," he laughed, "but the action I remember well was the discussion over whether or not to allow the Fraternity to go north of the Mason-Dixon Line. It was defeated, and I must admit that we voted against the expansion. Things certainly change over time. It finally passed at some convention later on, but I'm not sure which one it was."

difference, not only in the appearance of the house but in the members as well. Even the language was cleaned up. It was about that time that we started having teas with the other fraternities and sororities, so I believe that it was a good thing."

"I could see us having a tea with the Sigma Chis today," I laughed at the suggestion.

"Again, that's the way things were then," he repeated. "Each house was expected to have teas, which were formal affairs, and all the other houses were invited. Sometimes there were dances at the country club, too. The boys would dress in their finest clothes, borrow a car and ..." He was interrupted by the ringing of the telephone. As he answered the phone on the table by his rocker, I glanced at my watch and was astonished that I had been listening to Mr. Underwood for an hour.

Even though I was infatuated with the conversation, I knew that surely he needed his rest, and I had outworn my welcome. I sensed that the Fraternity had and still meant a great deal to Brother Underwood. I wished that the brothers in the chapter could all have experienced that day with me.

He replaced the receiver and I seized the opportunity to speak before he continued the conversation. "Brother Underwood, I've taken enough of your time, and I really need to be heading back to the house before dinner. I hope that you'll be able to attend our centennial celebration, and I'll be back in touch with you later to make all the arrangements." I stood and extended my hand to him, this time obviously demonstrating the grip of the Fraternity. This was my brother, and if he didn't remember the grip, I would teach it to him again.

He smiled and shook my hand lightly. He seemed more tired than when I had first arrived, but I sensed that he had enjoyed the afternoon as much as I. I turned and walked toward the door.

"Thank you, son," he beamed after me. "Tell the brothers hello for me." I said that I would and wished him well. As I was closing the door upon leaving, I remembered one last question and stuck my head back in and asked, "Do you mind if I visit you again sometime soon?"

He smiled and nodded his head approvingly as I closed the door and left our oldest living graduate.

Larry Lunsford is a former chapter consultant, advisor to the University of Pittsburgh fraternity system and past president of the Association of Fraternity Advisors.

"THIS WAS MY brother, and if he didn't remember the Fraternity grip, I would teach it to him again."

badge," I noted with excitement.

"Oh, yes, we always wore the badge," he stated with pride. "Never seen without it."

"Wish it was that way today," I said, replacing the photograph on the shelf.

"Where were we?" he asked.

"I was wondering what your highlight of college was."

"Oh, yes. That's a hard question because we did so many things that were fun and memorable. There were some bad times, too, but we seem to forget those with time. I do remember our trip to Chattanooga to the convention in 1905. I had been in the Fraternity hardly a year, so I was rather excited to have the opportunity to go to the convention and meet some of the people I had read and heard about. In those days, not too many undergraduates were able to go to conventions, and that one in particular, not too many of the national officers were able to attend. I remember we were hoping to get to meet the big man in the Fraternity who wrote the magazine and headed up just about everything, but he didn't show either. I can't seem to remember his name."

"Robert Adger Smythe," I blurted with excitement, yet blushing about my eagerness.

"Yes, that's right. The gent didn't make it, but we had a good time nonetheless. We thought we would teach the big shots a lesson for not showing

This time I didn't have an answer ready for him because my mind went blank, and I, too, couldn't remember, so I quickly asked another question: "How long did you remain active with the chapter?"

"Up until World War I, I visited the house and helped the guys out when I could. That's when not only I, but most of the chapter's members went off to work for Uncle Sam. The chapter of about thirty suddenly dropped to about eight or nine, but those few carried the chapter on."

"After 1920 and the War behind," he continued, "fraternity life perked up, and the house began to show the results. I wasn't as active because I got married and had a law practice to establish, but I stayed in touch. The fraternities at the college were scattered all over town in various dwellings. Prohibition was in effect, but the Pikas — I remember that we were called Pikas in the early days — always seemed to get hold of liquor when they wanted it. The house showed signs of wear and tear, with curtains half hung, beds unmade and trash around the house. We were still free of college control, but later when conditions worsened, we fell under regulations and we were required to have housemothers. Do you still have one?"

I shook my head in response.

"Shame. They were the best thing to happen to the Fraternity. The boys really cleaned up. There was a big

PLAYING

By Dick Murgatroyd

I'VE ALWAYS played to win. But not always as the defending champion. Like the rookie on the pro golf tour, my first year as Pi Kappa Alpha's executive director has been an uncharted course, a learning experience of just trying to make the cuts before winning the major championships.

This past year was a challenging time of simultaneously learning the IKA system and studying it for improvements and needed changes so that the Fraternity will indeed win those major titles ahead.

Becoming number one in the fraternity world is a title worth working for. And it is realistic. An independent survey firm ranks IKA among the top three men's fraternities in overall chapter quality. Pi

Kappa Alpha is one of the largest fraternities in America in terms of number of chapters and number of members and is among the leaders in pledging and initiation statistics every year.

As the title of this report implies, we will be less reactive and more proactive in the years ahead. Pi Kappa Alpha will aggressively seek the position of leadership among Greeks both nationally and on each individual campus. Though we've heard much about projected enrollment declines, we believe statistics will play less a role in our success than programming and ideas and positive, people-oriented change.

Pi Kappa Alpha's pledge and initiation statistics have plateaued the past three years, temporarily stalling

a six-year rebound from the early seventies and late sixties depression era (that seems so long ago now). Certainly, the executive staff turnover last summer has contributed to the sluggish membership and chapter financial stats. However, in our first full year Pi Kappa has achieved many noteworthy gains, made its mark upon the scene. Most visible is our staff. Certainly ours is one of the finest staffs in the fraternity world, and I would like to publicly thank each of them now for the contributions they made in 1980-81.

It was an active year for the staff. Each member played leading roles in seminars, workshops and associations within the system. I, for one, took part in two Fraternity Executive Association meetings and am

S&D/SEPT. 1981

TO WIN

A STATE OF THE FRATERNITY REPORT

serving on two committees for the FEA; I also represented IKA at the National Interfraternity Conference and Association of Fraternity Advisors co-meeting and the Interfraternity Institute more recently. And I participated on the Northeast Interfraternity Conference workshop faculty.

Our Fraternity showpiece, the *Shield & Diamond* magazine, has made an impression also. I have yet to travel anywhere without hearing commendation for our magazine, and we're proud to publish one of the truly outstanding magazines in the fraternity world.

Pi Kappa Alpha's regional conferences, a much-copied program, were enhanced last year with chapter advisor workshops. Advisors were

provided incentives resulting in a record fifty alumni advisors taking part. In our view, advisors are the single most important success factor at the chapter, and in our continuing effort to upgrade the advisory program, we have developed a chapter advisor manual in notebook form to be released at the beginning of the school year.

Another of our industry leading programs is our Presidents Conferences. Seventy SMCs and colony presidents, a new record, attended our January offering topped only by seventy-five attendees at our recent summer conference, the fifteenth held in the past eight years.

Chapter housing will be the source of many challenges in the eighties. Long range planning is a must and

has been the norm for several years now. High inflation, tight local money and doubling housing costs in the next five years are the problems with which we're faced.

One step toward alternative financing was taken in the past year. The 1980 New Orleans Convention approved a constitutional change allowing the Pi Kappa Alpha Housing Commission to loan to joint ventures in which alumni personally invest in chapter housing.

A national housing insurance program providing a premium savings in most cases is another innovation of the past year. Others include an energy efficiency program and continued encouragement to local house corporations to increase fees and rentals as their costs go up.

S&D SEPT. 1981

STATE OF THE FRATERNITY

Money will be the big problem, however. A study of possible loan requests compared to money supply over the next ten years shows that a shortage of loan funds could occur as early as 1982. The Commission has adopted a floating lending rate. All loans will be due in seven years although repayment may be based on a maximum term of thirty years.

Chapter housing continues to be a vital part of fraternity life and we are committed to courses of action that will keep IKA competitive across the nation.

Housing is an especially acute issue when taken together with chapter development. Last year was the most active expansion period of the past four years for IKA with the addition of four new chapters and three colonies. The Fraternity now has 178 active chapters and two colonies bringing us up to the 180 mark for the first time.

Two of the installations last year were recharterings (University of Washington, Beta Beta chapter, and University of Wisconsin, Beta Xi chapter).

Theta Tau (Cal State Sacramento)

held colony status for just six months while becoming the outstanding fraternity on campus. Theta Upsilon (Tennessee Tech) is IKA's newest addition. Colonies are located at Wichita State and North Carolina-Greensboro. Future expansion will also see great activity in the western region as well as recharterings at schools that once held great chapters.

Pi Kappa Alpha's resident counselor and pledge education programs also play vital roles in the Fraternity's high quality rating. Year after year, IKA is the leader among fraternities in recruiting outstanding young transfer students to inject new ideas and enthusiasm into faltering chapters. Last year six chapters benefitted from resident counselors while eight will receive such help next year.

A total revision of the IKA pledge program is now underway. We will provide more direction to chapters to improve the quality of membership coming into our bonds.

Perhaps our highest priority for chapters is improved rush techniques. It is imperative that chapters become more creative in marketing

Pi Kappa Alpha to freshmen. We do not plan to use the projected decline in enrollments as an excuse for decreasing chapter size. We plan instead to aggressively market IKA as the leader among fraternities and to increase our percentage of pledgings campus to campus. The success or failure of fraternities in the eighties will not be governed so much by the enrollment picture as the experience IKA provides its members and how that experience is sold to incoming students. Those fraternities which do not succeed in this decade will have failed to adjust to the changing needs and expectations of this new generation of college students.

Here is an opportunity for Greeks and educators to strengthen their on-and-off-again fellowship. The institution really cannot provide the social and educational experiences found in the fraternity. Yet, schools are already aggressively competing for students. Let Pi Kappa Alpha come to the forefront of the battle by making each of our campuses more attractive for our being there.

Alumni will play an important role in our efforts to attract and keep top quality young men. Not only do alumni contributions allow us to continue offering ever more valuable chapter services, they are the key ingredient to success from an advisory standpoint. The Fraternity has heavily promoted the chapter advisor program and supported it with talent banks, training programs and financial incentives since 1974. Now it becomes our task to help chapters take even more advantage of the experience and expertise offered by our graduate brothers.

The 1980 Convention gave commission status to the Alumni Committee, five outstanding alumni who help us set priorities and plans for greater alumni involvement and chapter acceptance. Their work thus

MEMBERSHIP COMPARISON:

year	total pledges	total initiates	total undergr. mbrs.	pledge retention
1971-72	4,234	3,051	8,698	72.1%
1972-73	4,082	2,895	8,313	70.9%
1973-74	3,908	2,907	8,089	74.4%
1974-75	4,167	2,931	8,114	70.3%
1975-76	4,139	2,949	8,451	71.2%
1976-77	4,459	3,231	8,915	72.5%
1977-78	4,619	3,222	9,281	69.8%
1978-79	4,915	3,355	9,712	68.3%
1979-80	4,690	3,704	10,512	78.9%
1980-81	4,631	3,465	10,694	74.8%

far has helped us to reach new levels. For example, over ninety-five percent of the chapters now have active advisors.

Alumni associations are on the rise, too. Five were added last year bulging our total active association count to ninety-two.

To stimulate even more alumni involvement, IIKA is again publishing an alumni directory. Similar though broader in scope to the 1977 offering, the new directory will contain 75,000 member listings in alphabetical, geographical and chapter references.

In response to such programming, IIKA's alumni supported the general fund campaign to the greatest extent yet in 1980-81. Well over 5,000 alumni contributed over \$125,000 making possible programs such as chapter consultant visits, regional leadership conferences, Presidents Conferences and the publication of *Shield & Diamond*.

Alumni financial support has proven to be a major factor in IIKA's chapter quality. As alumni dollars have increased, programs have improved and chapter quality has spiralled upward.

Yet more dollars will have to be raised and more alumni will have to be involved to keep IIKA on top. Bread and butter programs such as chapter consultation, advisor recruitment and training and communications are heavily dependent upon alumni support. Many creative giving programs are under study that, we hope, will increase both the number of gifts and the average size of gifts in future years.

Also in our future are many other challenges. Student leadership, financial management, behavioral problems (such as alcohol abuse) and legal liability are becoming our priorities of tomorrow.

New emphasis is planned on leadership, especially as it relates to S&D/SEPT. 1981

behavioral problems. An alcohol awareness program and improved pledge education programming are under study. Chapter leaders are learning more about liability and the growing legal entanglements.

Clearly, we have a big job ahead. Yet, we are fortunate to have a position of strength from which to accomplish these tasks. We've survived many problems and hardship eras over the past century; we've never met any problem that couldn't be solved.

When I became executive director, I dedicated this staff and the Fraternity to a decade of excellence. So, let me challenge you to make the most of these opportunities for growth that

face us and help us to reach our goal of a decade of excellence.

In the play *Green Pastures* Noah said to the Lord, "I ain't very much, but I'm all I've got." You are all you've got and all Pi Kappa Alpha's got, so the question is, what are you going to do with what you've got?

Indeed, let us be the great dreamers for tomorrow following the Woodrow Wilson creed, "All big men are dreamers." That is why I ask you to dream of that decade of excellence for Pi Kappa Alpha. To dream of meeting and beating the challenges that lie ahead so we can continue to give IIKA to the students of tomorrow.

PI KAPPA ALPHA

Briefly...

FOUNDED March 1, 1868, University of Virginia. In its 114th year.

MEMBERSHIP totals nearly 120,000 initiated brothers.

178 ACTIVE chapters and two colonies in 40 states.

INVESTED nearly \$3.5 million in chapter houses. Chapter House Fund net worth of \$2 million to assist chapters.

SCHOLARSHIP and loan fund worth \$422,000. Leadership development fund worth \$1.1 million. General operating budget of nearly \$247,000.

MAGNIFICENT Memorial Headquarters in Memphis, Tennessee houses a museum, library, meeting rooms and executive offices featuring sophisticated equipment and systems.

EXECUTIVE staff includes 11 directors and chapter consultants and nine supportive staff people working full time to help chapters and members.

PROMINENT alumni have held practically every important office in government and business and famous alumni star in athletics and entertainment.

PROVIDES the most important benefit of all — brotherhood. Everywhere a Pike goes, he will find a brother.

THE SOUTH

FIRST OF A FOUR-PART REGIONAL ANALYSIS OF IKA.

by Mark Anderson

TO GET in your car and begin driving from Charlottesville, Virginia to Lubbock, Texas taking the time to cover West Virginia, Kentucky, both Carolinas, Tennessee, Georgia, Alabama, Mississippi, Arkansas, Louisiana and through the distance of Texas would put approximately 2,000 miles on your car while giving you a firsthand view of the Southern portion of the U.S.

To be a member of Pi Kappa Alpha and make the same trip not only offers the beautiful magnolias, an array of agriculture and magnificent homes, but is enhanced by the insurmountable heritage owed by Pi Kappa Alpha to this area.

It is evident from Dr. Reel's excellent depiction of the Fraternity's birth that the Southern influence was felt from the very first meeting of the Fraternity.

The Founders' attitudes, interests and fears were formed from a struggle which had engulfed their lives. No doubt the times had a major impact on the ideals they chose on which to base their fraternity. That attitude shaped our Fraternity's early expansion philosophy which dictated that no chapter would be

chartered beyond the Mason-Dixon line. During the life of that restriction twenty-eight of the ninety-seven chapters which make up the Southern portion of Pi Kappa Alpha were founded. Even after the Northern expansion breakthrough at the 1909 New Orleans Convention the Southern states continued to produce the majority of new chapters. Today out of 180 chapters over half are located in the South.

One attraction has been the steady growth that the schools of this region have experienced, especially since the end of World War II.

Though these chapters are within the same section of the country, they are represented on varying types of campuses. Approximately seventy percent are located on state supported campuses with the remainder on private. Many are found on older campuses within large, established Greek systems (such as Auburn, South Carolina and Old Miss) while others exist on relatively new campuses like Central Florida, Arkansas-at-Little Rock and Alabama-Huntsville. Still others have very established academic roots, but the growing pains of a relatively young Greek system (as at

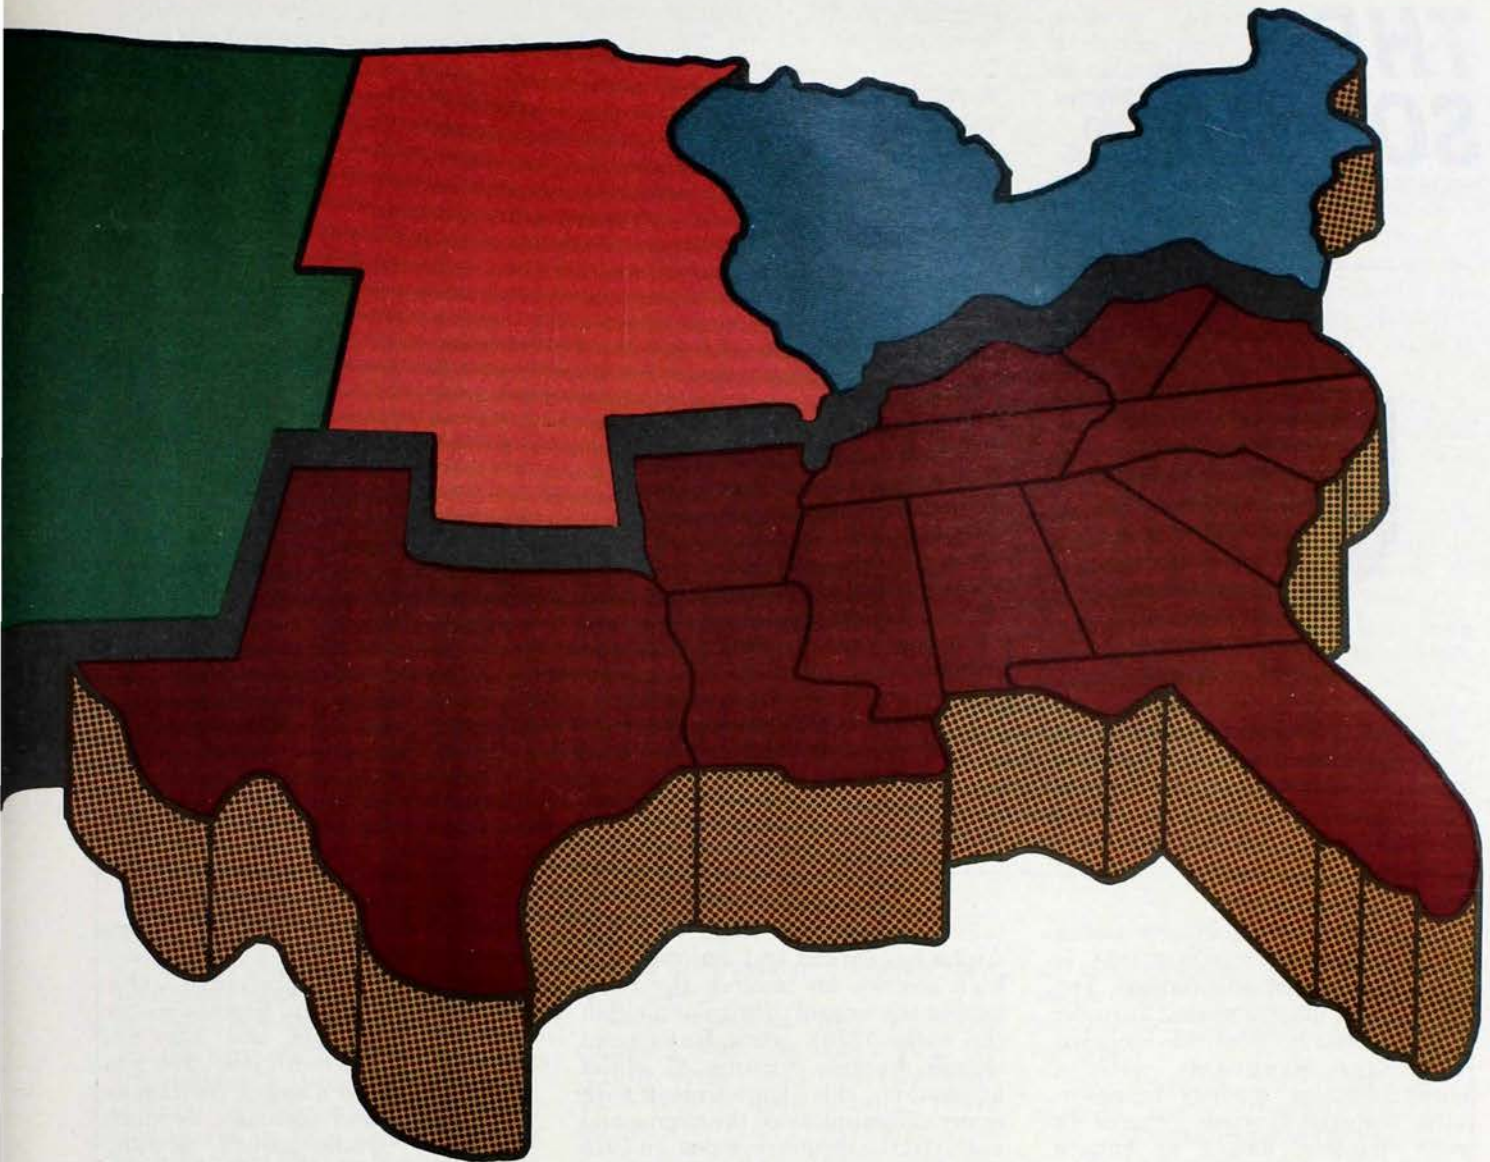

Clemson, North Carolina-at-Greensboro and Texas A&M).

One distinguishing characteristic is that chapters in the South tend to be larger on the average than those in most other areas, though this has not always been the case. Over the history of the Fraternity, the Midwest chapters tended to have larger memberships and still do. Yet, since the 1950's, the Southern chapters have managed to grow to the point where there are many which never dip below one hundred men, and the averages have increased substantially.

The Southern chapters have held on to many traditions which were popular during their early years. Some chapters such as Nu (Wofford College) have traditional cheers which are as deep rooted as any song in the chapter.

A favorite of many of these chapters is to form a circle and then begin a chant which singles out individual members who are then pushed into the center of the ring. The chant continues until nearly all the members are in the center and then it is climaxed by a rousing cheer.

Says Nu SMC Mark Reed, "This is S&D/SEPT. 1981

one of the most effective rush tools we use." Including rushees in the circle makes them feel a part of the activity and the chapter."

Such traditions are not restricted to the South. The parallels between the regions will be drawn in subsequent installments.

One characteristic that does befit the South is the role that personal appearance has always played. Its emphasis is most evident during rush periods where it is not unusual for the university to dictate coat and tie for the evening's rush event. Football games, sorority mixers, plays and weekly formal dinners are normally complemented by semiformal garb.

Formal rush periods with even more formal, staid rules evidence the predominance of older, established Greek systems in the South. These have become somewhat limited to the smaller schools. Larger systems have realized the congestion created by a program over-laden with rules. Formal smokers, silence periods and

S&D/SEPT. 1981

a swing back to non-alcoholic rush are still in vogue on many Southern campuses.

Southern chapters continue to place a heavy emphasis on their heritage. Whether you walk into Alpha Alpha chapter (Duke) and hear a recounting of their founding in 1901 or drop by Eta Alpha (Clemson) whose association with Pi Kappa Alpha began only twelve years ago, but so far has had an illustrious track record which any member would be happy to recount, the heritage always seems preeminent.

"We may have only been here twelve years, but our pride in Eta Alpha's growth and position at Clemson is as strong as if we were a single letter chapter," says Eta Alpha SMC David Deborde.

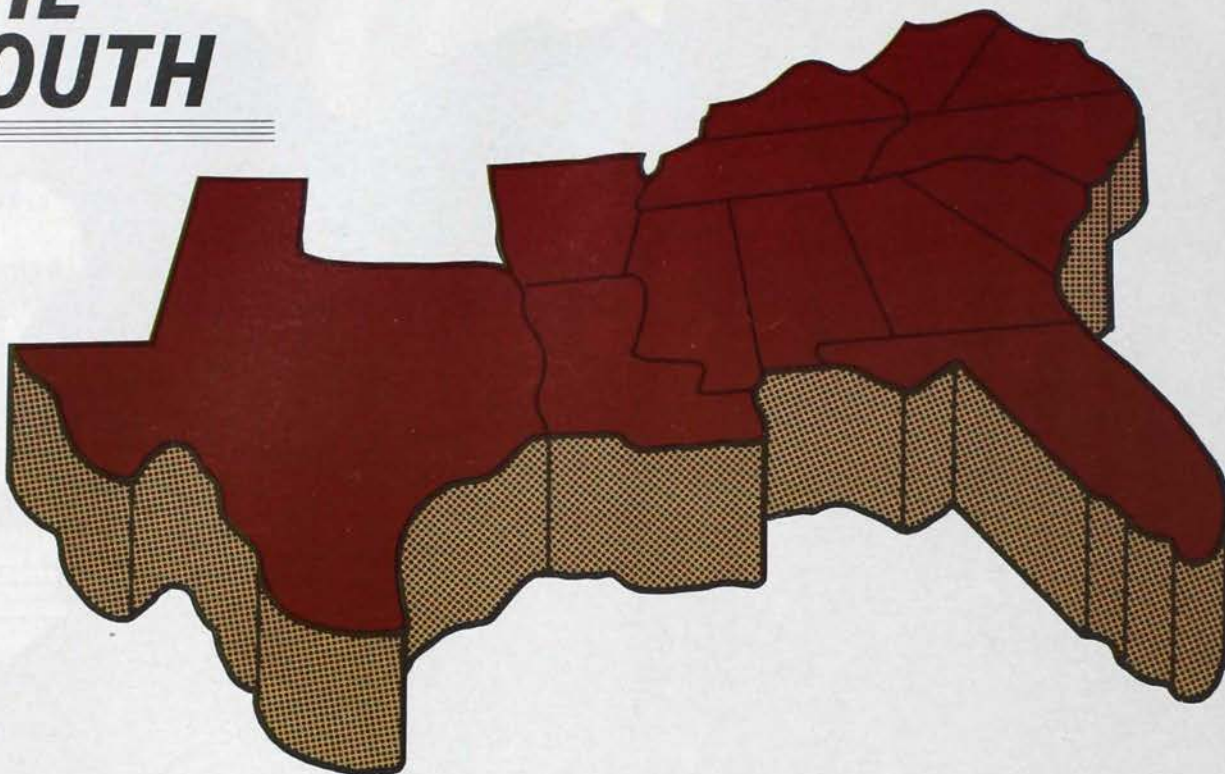

There is a definite sense of pride that all chapters take in their past. The Southern chapters seem to make a constant effort to infect the newest members with a meaningful appreciation of their past.

Symbolizing their past, many Southern chapters are blessed (and sometimes burdened) with large, old plantation-type homes. One of the most often recalled images of the South is the beautiful old homes which defy time. Many Southern campuses are fortunate enough to have Greek rows complemented by these types of houses. The value of their impression and beauty often balances out the cost and effort to keep them structurally sound.

The appearance of the chapter house plays a significant part in the image that the Dixie fraternity has. Many of these chapters depend more heavily on this than those in other regions of the country. For example, a typical Southern chapter with a large house will normally have a thirty to fifty man capacity compared to a chapter house in the Midwest which will have a capacity twice that large.

Accompanying the element of grandeur, which plays a significant

THE SOUTH

role in the older Southern Greek systems, is the emphasis that is oftentimes placed on prodigal. The "dress code" illustrates that attitude. Also etiquette is oftentimes included in pledge programs with a housemother or sorority representative featured as guest lecturer. In some chapters, having an entire chapter rise when a lady enters the room is not unusual.

Let's take a closer look at three representative chapters in the South.

In its 151st year, the University of Alabama is a bastion of the traditional university of the South. Gamma Alpha chapter was founded April 24, 1924, when the Grand Treasurer Robert A. Smythe traveled to Tuscaloosa to formally initiate the first seventeen members, nine of whom are still living including Senator John J. Sparkman, a veteran of U.S. government for over thirty-two years.

Today's Greek system is thirty fraternities strong including the Alpha chapter of Sigma Alpha Epsilon founded in 1856. Pi Kappa Alpha is in the very competitive top five.

The Pike house is twenty years old and majestically stands in the center of Fraternity Row. Four white pillars grace the front with red brick as support background. The house is dwarfed only by the pines surrounding it, and sleeps 40-50 members which necessitates one half of the membership living out of the house.

For fifty-seven years Gamma Alpha has earned and maintained a high position on campus. However, during the time of disillusionment in the early 1970's when fraternities overall became victims of elitist accusations, this chapter along with many others outlasted the stigma and survived the troubled period. In 1975 it received the Harvey T. Newell Most Improved Chapter Award and since that time has continued to make strides that have resulted in the successful eighty man chapter it is today.

The Southern influence is obvious especially on a Sunday afternoon when all members decked in coat and tie assemble for Sunday dinner. Ladies are assisted with their chairs and politeness applied during conversations which would noticeably be absent in other chapter situations. One interesting feature of the chapter is that they hire a full time "houseboy" whose function is to straighten up and maintain the condition and atmosphere of the house. This is a normal feature of many of the Southern chapters. In Gamma Alpha's case, he is a valuable part of the chapter and has become very special to the members.

As in most cases Gamma Alpha sponsors traditional formals through the year, the most notable of which is the Garnet and Gold Ball which could be considered the event of the year on anyone's social calendar. Tuxedos and formals set the tone. The elegant event is shared with the alumni who

always are represented by a large turnout.

Contrasting Alabama, the University of Central Florida is only eighteen years old and Eta Phi chapter is in her ninth year. Yet, Eta Phi has grasped a strong position on the campus and possesses as much fraternity traditionalism as any chapter. Eta Phi does not have the advantage of a picturesque house nor does the campus appear to be a set out of *Gone With the Wind*. As a matter of fact there are no houses and virtually no dormitories because the institution is a commuter school and its market lies predominantly in the Orlando area.

Any traditionalism Eta Phi possesses has been created on her own account. In eight years, Eta Phi has succeeded in dominating the campus athletically as well as continuing to hold high positions in both SGA and IFC. This was evidenced in both 1978 and 1980 when the chapter was named Fraternity of the Year on the University of Central Florida's campus.

Not necessarily looked upon as a traditional Southern Greek system chapter, Eta Phi has been able to make the gains of an aggressive chapter as well as develop the flavor of one born in the South as evidenced each fall when Eta Phi celebrates its "Cane Week." Each brother carries a cane to class and must take to dinner any sorority gal who "steals it." Cane Week is culminated with the

S&D/SEPT. 1981

"Southern Gentlemen's Ball," to which the brothers wear tuxedos or Confederate period uniforms.

In the spring, Eta Phi traditionally holds a Dream Girl Formal Pageant in Orlando followed by a three-day "Beach Weekend" at Daytona Beach.

Though they are lacking a house, their unity is maintained through a very strong communications network. Much emphasis is placed on the eight years in which Eta Phi has grown to be a power at the University of Central Florida.

Its size, position on campus and healthy reputation elevate the chapter among the highest in the region. This is most notable since a mold was not already set for them to follow.

As a third point on the Southern triangle is the small private school campus such as Southwestern-at-Memphis.

No Pike has ever completed his pledge program without learning about the debt owed Theta chapter for her efforts in revitalizing the Fraternity during the lean years of 1880 to 1890. Now with 103 years of

uninterrupted life, Theta continues to prosper on the Southwestern-at-Memphis campus.

The chapter flourishes on a Greek system hardly one-quarter of the size of an Alabama or Central Florida. Its entire chapter size could be a pledge class for a large chapter. The Greek system only has a market of approximately 600 male students. Any fraternity here is considered large at fifty members. Theta holds a top position on the campus, pledging twenty men during the 1980-81 school year.

Fraternities on the small, Southern, private campuses have traditions all their own. Though Theta has many characteristics in common with the aforementioned, the environment of the small college dictates a little different method of existence. Rush at Southwestern is still very formal with groups of rushees circulating through the fraternity houses at enforced intervals. Rush lasts anywhere from six to eight weeks with a ban placed on any rush activities after that period. Respect for the other fraternities' rights are strictly

enforced through rules. All rush activities have an air of formality oftentimes including a ban on alcohol.

Though it does not have the majestic structure of Gamma Alpha, it does have a house which could be more accurately referred to as a lodge. All the fraternities have very similar stone architecture and design so that competition between the houses is not very acute. However, there is a great deal of pride taken in the upkeep.

Going up the stairs to the TV room, the wall is lined with pictures of the Junior Founders, two of whom were Theta initiates.

All the evidence of the Southern influence previously mentioned is present here, from the circle of friendship to the formal dress.

Theta's success parallels both Gamma Alpha's and Eta Phi's though on a smaller scale.

All three chapters, taken together, illustrate the section of Pi Kappa Alpha known as Dixie, the land of cotton, drawl and Pikes. Next, the Midwest.

THE SOUTH, STATE BY STATE

TO GET an accurate glimpse at our Southern chapters, the most efficient way is to look at each state.

Appropriately beginning in Charlottesville, Virginia, the Smythe Award winning Alpha is as impressive in 1981 as she has ever been in her 113-year history. If you are fortunate to be making this trip in the spring the blossoms on the dogwoods will exhaust rolls of camera film.

West Virginia has three chapters founded from 1904 to 1969. Alpha Theta (West Virginia) led the way followed by Delta Iota (Marshall) in 1948. Zeta Upsilon (Concord) came along in 1969.

Kentucky with eight chapters represents a wide range of campuses with chapters on the old established campuses such as Omega (Kentucky) versus the small private campuses of Alpha Lambda (Georgetown) and Kappa (Transylvania) to the successes on commuter campuses such as Eta Rho (Northern Kentucky). Southward into Tennessee are ten chapters, two of which border the Memorial Headquarters in Memphis. Those are Delta Zeta which is off to a successful rebuilding at Memphis State and Theta (Southwestern-at-Memphis).

A constant foundation of strength has been the state of North Carolina over the years. Seven chapters and one colony represent Pi Kappa Alpha

and all are considered tops on their campuses.

South Carolina had only two chapters until the late 1960's, Mu (Presbyterian) and Nu (Wofford), with each dominating their respective Greek systems. The following twelve years provided growth as well as strength to Robert A. Smythe's home state. With the re-emergence of Xi (South Carolina) and the birth of Eta Alpha (Clemson) followed by Theta Delta (Francis Marion) and Theta Sigma (Winthrop), the state can claim both quantity as well as quality.

Atlanta is exciting for many commercial and historical reasons, but Pikes are able to appreciate the success of three chapters within the metroplex. Beta Kappa (Emory), Alpha Delta (Georgia Tech) and Epsilon Nu (Georgia State) are represented on varying types of campuses which hold the characteristics of successful chapter operation in common.

The nation's vacation land is also strong hope for Pi Kappa Alpha. Florida represents a great deal of pride for Pi Kappa Alphas across the country and it brings droves of them to visit during spring breaks. From our dominance at the major universities of the University of Florida (Alpha Eta) and Florida State (Delta Lambda) to the smaller campuses of Florida Southern (Delta Delta) and Stetson (Delta Upsilon),

all nine chapters continue strides which make Pi Kappa Alpha an unquestionable leader on each campus.

The Alabama and Mississippi chapters are traditional Pi Kappa Alpha strongholds from the columns of Ole Miss (Gamma Iota) and Mississippi State (Gamma Theta) to the SGA dominance of Eta Xi (Alabama-at-Birmingham) and the intramural power of Zeta Beta (Delta State). No one visits any of these thirteen campuses without being aware of the presence of Pi Kappa Alpha.

Arkansas has only four chapters, ranging from commuter to residential, but their strength on each campus is indisputable.

The final state is known for its size and Pi Kappa Alpha's position parallels that reputation. Texas has seventeen chapters, more than any other state in the union. Their size is matched only by their strengths at campuses like Texas, Texas Tech, East Texas State, Lamar, Texas A&M and Southwestern.

By now one should have the impression that Pi Kappa Alpha flourishes well in these states and that judgment is verified by the College Survey Bureau, Inc., which recently released a study ranking forty-two of the ninety-seven chapters tops on their respective campuses.

Pi Kappa Alpha Foundation
Honorary Trustees
Contributing \$1,000 Annually

250

Pi Kappa Alpha Foundation
Fellows
Contributing \$500 Annually

Your Tax-Deductible Contribution To The Pi Kappa Alpha Memorial Foundation Provides Your Undergraduate Brothers...

1. SCHOLARSHIPS FOR COMPLETING THEIR EDUCATION
2. LOANS TO THOSE WHO NEED FINANCIAL HELP
3. AN EDUCATION AND LEADERSHIP TRAINING FACILITY TO ASSURE PI KAPPA ALPHA'S CONTINUED RESPONSIBILITY TO DEVELOP OUR FUTURE LEADERS

Part of your contribution can be used to award a scholarship in your name to a Pi Kappa Alpha at the institution of your choice.

Remember: All contributions to the Memorial Foundation are tax deductible.

Write or call Pat Halloran for more information on becoming an honorary

trustee or foundation fellow or regarding contributions of stock, annuities, insurance or other special gifts.

Pat Halloran
6866 Corsica Drive
Memphis, TN 38119
Telephone: 901-754-8680 (home)
901-523-6049 (office)

We dare you.

We dare you to ship out on our tall ships to the Caribbean.

We dare you to take the helm of our 258' Polynesia or our 198' Yankee Clipper. Sleek sailing ships out of another age once owned by Onassis, Vanderbilt, and the Duke of Westminster.

We dare you to set foot on small, far away islands like Saba, Carriacou, Anegada. And we dare you to walk the footsteps of Captain Bligh, Columbus and Nelson on uninhabited tropic beaches.

We dare you to get down to your bikini and shorts and have a love affair with the sun. To take each day as it comes, sip Bloody Marys in the morning and take your ration o' grog when the sun slips down the mast.

We dare you to step out with the moon. Feel the throbbing of the steel drums. We dare you to limbo, calypso and goombay. And we dare you to fall asleep under a star-filled sky.

We dare you to snorkel amidst a rainbow of tropical fish, and to swim in waters so clear you can see 20 feet down.

We dare you to ship out with an adventurous group of guys and gals for 6 or 14 days. Your share from \$290.

We dare you to set sail to another time, another land. To do all the things you have always wanted to do.

Then we dare you to tell us that Windjammin' was something besides the greatest vacation in your life.

Windjammer 'Barefoot' Cruises

P.O. Box 120, Dept. Miami Beach, Florida 33139 305/672-2213

Cap'n Mike
Windjammer 'Barefoot' Cruises

A MONUMENTAL OCCASION

Up for a challenge? You aren't alone. In fact, some seven hundred Pikes, both students and alumni, are planning to meet the challenge issued at the 1980 New Orleans Convention: A Decade of Excellence. How?

The first step in any achievement is a sturdy foundation. Build a foundation to meet the challenges of the eighties at the 1982 Pi Kappa Alpha Convention, August 8-11, in Washington, D.C.

Each decade has offered IIAA unique challenges. The eighties will be no exception. In fact, the challenges are already upon us ... decreasing enrollment, skyrocketing inflation, housing shortages, behavioral crises, and more.

The '82 Convention is designed to meet those challenges, and the more immediate ones ... rush, financial planning and forecasting, alumni involvement ... the nuts and bolts so vital to fraternity success or failure. The foundation of a winner is built upon basics, basics that the '82 Convention will offer.

MONUMENTAL FUN

Monumental obstacles, sure, but there is much more to a Pike convention than seminars and meetings. Most remember the good times. They're hard to forget. That's why so many alumni keep coming back, year after year. Here are some of the good times planned for D.C. in '82:

- electric banquets and luncheons
- lively legislative debate
- informative career planning seminars
- exciting entertainment
- famous alumni and celebrities
- Washington-area tours
- first class hosts (the new Hyatt Regency-Crystal City)

So, if you're up for a monumental challenge, make the summer of '82 the year to build your game plan. At our nation's capitol city, August 8-11, the Hyatt Regency-Crystal City.
