EDUCATIONAL FOUNDATION: 1994 ORDER OF WEST RANGE**

Rewarding Academic Excellence

Each year the Pi Kappa Alpha Educational Foundation administers 60 academic and leadership scholarships, distributing over \$23,000 annually. These scholarships are made possible by the generous alumni and friends who have established them. Each award is named after either the primary contributor to the fund or a special member of the Fraternity who is honored or memorialized for his loyalty to Pi Kappa Alpha. All but three of these scholarships are awarded to the top student leaders in particular chapters. Below are recent comments made by a volunteer Foundation trustee, a donor and a 1994 scholarship recipient, sharing a few reasons why you should consider establishing a scholarship for your chapter.

"Establishing an unendowed or endowed scholarship, administered by the Educational Foundation, is a great way for you to honor or memorialize a fellow brother for his exceptional loyalty to Pi Kappa Alpha or to establish your own legacy, while providing much-deserved cash awards to the Fraternity's most outstanding student leaders."

Phil Goodman (Alpha Nu '45),
Chairman, Scholarship Committee

"I am the sister of Andrew Charles Lynch, who died of a heart attack in his sleep, while serving as president of Pike at the University of California, Santa Barbara (Iota Kappa) in January of 1991. My brother, John, and I just returned to the UCSB Pike house for the first time since Andrew died..."

The kind of caring and compassion John and I found at Pi Kappa Alpha is rare in this world, and my hope is that the Andrew C. Lynch Memorial Scholarship fund will make it possible for another special young man to become a member of this great Fraternity."

Mrs. Lindsay Lynch Lytle

Randall Woods

"I am a recent recipient of the Alan G. Craig Memorial Scholarship. This is the only type of scholarship established solely for the Gamma Upsilon Chapter of Pi Kappa Alpha. It is a strong reminder to all members in the house of the importance of scholastics. I believe this scholarship will encourage future pledge classes to concentrate on their studies and remain highly active with the Fraternity. I greatly appreciate your interest and efforts in our chapter. I only wait for the day that I may be able to give back to Pi Kappa Alpha what it has given to me. Thank you."

Randall Woods (Gamma Upsilon '92)

Endowed scholarships require a minimum gift of \$10,000, which may be contributed in installments. Annual proceeds are made available for distribution once this minimum level has been reached, and you determine the criteria for the annual scholarship award(s).

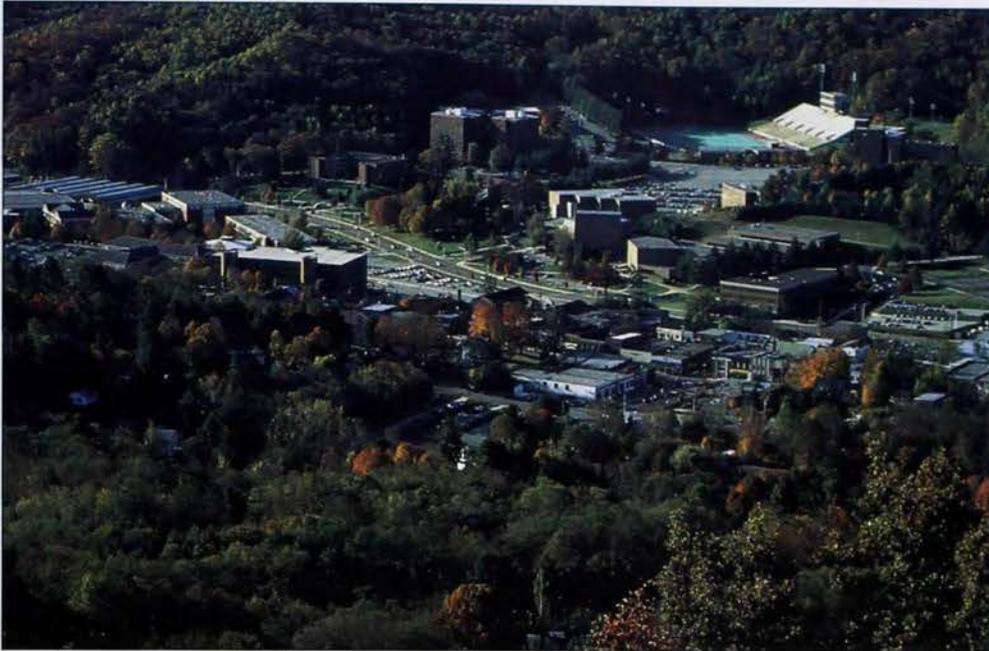

You may also establish an unendowed scholarship which requires a minimum annual contribution of \$250. These scholarships must be funded each year for cash awards to be dispersed.

If you would like more information on how you can create a new scholarship fund, please contact the Pi Kappa Alpha Educational Foundation.

Update

Chapter Consultant Corps In Place For 1994-1995

Executive Vice President Raymond L. Orians (*Memphis State, Delta Zeta '66*) is proud to announce the hiring of six new chapter consultants for the 1994-95 academic year.

Anthony C. Andujar, Jr. (*East Carolina, Epsilon Mu '89*) graduated from East Carolina University with a B.S. in industrial technology. As a member of Epsilon Mu, he served the ECU Pikes as president and as treasurer. He was vice president of Pi Kappa Alpha's Carolinas region in 1993-94.

On campus, Andujar was a member of both the Dean's List and Honor Roll. He was treasurer of the National Association of Industrial Technology Students; a member of the Associated General Contractors ECU student chapter; as well as a member of the East Carolina student government.

Clarence R. Dowdy, III (*Kentucky, Omega '89*) graduated from the University of Kentucky with a major in management and marketing. As an undergraduate member of Omega, Dowdy served as chapter president for three terms. He also served the chapter as Founders Day chairman, Homecoming chairman, and as historian/Ritualist chairman.

In the area of campus involvement, Dowdy was president of the student government in 1993-94 as well as chairman of the board of student body presidents for the Commonwealth of Kentucky. He was also a member of the University of Kentucky board of trustees.

Max G. Holland, Jr. (*Georgia Southern, Iota Upsilon '93*) graduated from Georgia Southern University with a B.S. in communication arts. He was a founding member of Iota Upsilon Chapter at Georgia Southern University. Holland served the GSU Pikes as colony president and as chapter president.

On the GSU campus, Holland was a member of the Public Relations Student Society of America. At Clemson, he was a student advisor of the university's judicial affairs. Holland was also active in community service. He was a volunteer for Special Olympics and the Statesboro Convention and Visitors Bureau.

Christopher E. Peterson (*Florida, Alpha Eta '91*) graduated from the University of Florida with a B.S. in mechanical engineering. He served the Alpha Eta Pikes as president, vice president, rush chairman and pledge educator. He was awarded the chapter's Brother of the Year

Award in 1992 and the A. Frank Smith Leadership Scholarship in 1993.

On the Florida campus, Peterson was on IFC, serving on a judicial board that worked with the administration on fraternal misconduct. He was also assistant director of the student government's Health Cabinet. In 1993 Peterson was named to the Florida Blue Key Honorary and was recipient of the Dr. Morton Wolfson Most Outstanding Fraternity President Award.

Ralph W. Simon (*Central Florida, Eta Phi '89*) graduated from the University of Central Florida with a B.A. in liberal studies. He was chapter president, public relations chairman, risk management chairman, housing chairman, social chairman, a judicial board representative, and a member of the rush committee.

In campus leadership, Simon was executive vice president of IFC. As a member of IFC, he was responsible for planning and executing a complete judicial process and maintaining the IFC's 13 committees. He was also a member of the student senate, tennis team, multicultural task force, alcohol task force, and Knights of the Round Table.

Shad D. Williams (*Oklahoma State, Gamma Chi '90*) graduated from Oklahoma State University with a B.A. in political science. He served the OSU Pikes through a term as vice president and two terms as rush chairman. He held other positions in the chapter that included risk manager and brotherhood chairman. He was also selected to serve on Gamma Chi's rush committee.

Williams represented Gamma Chi on campus by serving on an IFC special rush committee, student senate, and as a member of the student union activities board. He was also editor/owner of *The Greek Letter*, a monthly newspaper for OSU Greek students.

This group of consultants will join **Britt R. Massing** (*Central Florida, Eta Phi '89*), who joined the Fraternity's staff as a chapter consultant in January 1994. He traveled the Arkoma, Carolinas and Great Lakes regions this past spring.

Expansion Consultant Joins Team

In other staff changes, a familiar face is returning to PiKA's expansion department.

Anthony C. Andujar

Clarence R. Dowdy, III

Max G. Holland, Jr.

Christopher E. Peterson

Christopher S. Hough (*Pittsburgh, Gamma Sigma '89*) is returning to the Memorial Headquarters to serve as a 1994-95 expansion consultant. Hough served the Fraternity in the same position in 1992-93. As a part of the Fraternity's expansion program, Hough helped establish colonies at Appalachian State University, University of Louisville, Northeastern University and Princeton University.

During his undergraduate days at Gamma Sigma, Hough served the chapter as IMC, rush chairman, social chairman, and public relations chairman. He received his bachelor of arts in rhetorical communications.

Brown and Heck Depart Expansion Staff

Jeffrey S. Brown (*Southern Illinois, Iota Mu '90*) and **Steven S. Heck** (*Kansas State, Alpha Omega '88*) have left Pi Kappa Alpha's professional staff after two years at the Memorial Headquarters. Brown originally joined the staff in 1992-93 as a chapter consultant. He traveled the Golden West and Cumberland regions. Along with his chapter consultant responsibilities, Brown assisted PiKA's expansion efforts by participating in colonizations at Rockhurst College and the University of Western Ontario. In Summer 1993, Brown joined the Fraternity's expansion department full time when he was named an expansion consultant. As an expansion consultant, Brown established Pi Kappa Alpha colonies at the University of British Columbia, New Mexico State University, Old Dominion University and Rutgers University. The Rutgers colonization, with 70 members, was one of the largest colonizations in PiKA's history.

Heck was a member of the Fraternity's expansion team in both 1992-93 and 1993-94. He was an instrumental force in PiKA's expansion efforts into Canada as he helped colonize the University of Western Ontario in March 1993. The UWO colony would eventually become the largest fraternity chapter in all of Canada. Over the course of his two years with the Fraternity's expansion efforts, Heck was involved in establishing Pi Kappa Alpha's name at a number of campuses. He was a part of colonizations at Florida International University, George Mason University, Illinois State University, the University of New Hampshire, and the University of Rhode Island.

Brown's and Heck's presence within the Fraternity's staff will be missed, yet the comments of Director of Expansion Steven S. Vin-

Expansion Consultants Steven S. Heck (at left) and Jeffrey S. Brown (at right) were instrumental in achieving great strides for the Fraternity's expansion program. They worked closely with Director of Expansion Steven S. Vincent (center).

cent (*Missouri-Columbia, Alpha Nu '83*) assure that their impact upon the Fraternity has been noticed.

"Without the talents of Jeff Brown and Steve Heck, there is no way that Pi Kappa Alpha would be recognized as an expansion leader by its peers."

Brown is now employed with Sports Careers in Phoenix. Heck is a commercial real estate broker with Crye-Leike Property Management Division in Memphis.

Alumni Affairs Post Filled by Past Staffer

Another member of the 1992-93 chapter consultant corps has returned to the Memorial Headquarters staff. **Matthew P. Dey** (*Clemson, Eta Alpha '89*) has been named director of alumni affairs. His duties will include working with the Fraternity's local alumni associations across the country.

Dey's background is well-suited for his new responsibilities. As an undergraduate at Clemson, he worked with the university's alumni association. Most recently, he worked for Big Brothers/Big Sisters.

Dey's chapter experience included terms as SMC and rush chairman. Aside from his involvement with the Clemson alumni association, he was a member of the Tiger Brotherhood

Honor Society and the Collegiate Brotherhood for Youth.

Educational Foundation Executive Director Leaves Headquarters Staff

A changing of the guard is taking place within the staff of Pi Kappa Alpha's Educational Foundation. **Jeffrey M. Abraham** (*Arizona State, Delta Tau '72*), executive director of the Educational Foundation, will leave his duties effective June 30, 1994. Abraham joined the Foundation's staff on December 1, 1989. According to Executive Vice President Raymond L. Orians, Abraham's continuous promotional efforts of the Foundation's mission became widely known by both undergraduates and alumni of the Fraternity. As a result of such efforts, the Foundation was able to assist more undergraduate members in their leadership development and academic pursuits.

Prior to his tenure as executive director, Abraham worked for the Penn State Alumni Association as executive director. Fraternally, Abraham was a chapter consultant in 1975-76. While living in the Phoenix area, he coordinated alumni activities for over ten years and in 1989 he received the Delta Tau Alumni Appreciation Award. Abraham is returning to Arizona to serve as chief operating officer of Sports Careers in

Scottsdale, Arizona. Sports Careers is a company which works with individuals interested in the sports industry. The company works with organizations such as the National Football League, the National Basketball Association and Major League Baseball. □

Early 1994 Brings Three New Chapters Into The Bonds

Chartering Completes PiKA's Long Journey to UCONN Iota Chi Chapter University of Connecticut

Pi Kappa Alpha's perseverance in establishing a chapter on the campus of the University of Connecticut was rewarded on February 5, 1994, as Pi Kappa Alpha's Iota Chi Chapter was officially chartered during festivities at the installation banquet at Santes Manor in Milford, Connecticut. The evening's activities were highlighted by National President Thomas J. Turner's (*Texas Tech, Epsilon Gamma '67*) keynote address. Also in attendance were North Atlantic Regional President Howard E. Goldstein (*Lehigh, Gamma Lambda '83*), Director of Expansion Steven S. Vincent (*Missouri-Columbia, Alpha Nu '83*), Colony Advisor Thomas E. Blonski (*Trinity, Epsilon Alpha '86*), and Regional Vice President Salvatore F. Depino, Jr. (*Florida Institute of Technology, Zeta Sigma '91*). The black tie affair was also attended by over 175 guests including parents, dates, university officials, national officers, and of course, the 55 members of Iota Chi Chapter. At the conclusion of Turner's remarks, Iota Chi presented the Fraternity with authentic over-sized University of Connecticut Husky basketball shorts.

Saturday's events capped off a significant chapter in the young life of Iota Chi. On Friday evening, February 4, the Connecticut Pikes were initiated into the illustrious ranks of the Fraternity. Assisting with Friday's initiation ceremony were representatives from Gamma Tau Chapter at Rensselaer Polytechnic Institute, Epsilon Alpha at Trinity College and Theta Mu Chapter at the University of Massachusetts.

The UCONN Pikes have wasted little time in establishing a solid reputation for Iota Chi Chapter. Pikes have developed an excellent reputation on campus and have proven themselves to be true gentlemen. They have also worked to become a leader in community service. They have been involved with programs and organizations such as Adopt-A-Highway, the American Cancer Society and the Catholic Worker's House. In athletics, the Pikes are not only involved in every intramural sport, they compete for top honors in each activity. As this spring's semester was nearing its conclusion, Iota Chi was vying for first place in the overall intramural standings and reception of the intramural trophy. Strengths in all these areas do

The classical elegance of the Wilbur Cross Building graces the campus of the University of Connecticut in the city of Storrs.

not diminish the UCONN Pikes commitment to success in the classroom. All chapter members that do not maintain at least a 2.5 GPA have mandatory study hours three times a week. A test bank has also been established to assist Iota Chi and its academic endeavors.

Iota Chi History

Pi Kappa Alpha's Memorial Headquarters had been considering the possibility of chartering a Connecticut chapter since 1983. At that time, the university's Greek system was undergoing some changes and was attempting to build a larger system. Members of PiKA's national staff talked with Judy Preston, the university's Greek life coordinator, and expressed the Fraternity's interest in establishing a chapter at Connecticut. This initial contact with the university would prove to be invaluable when the time was right for Pi Kappa Alpha to establish a colony at Connecticut. The time proved to be right during the 1991-92 school year when three Pike transfers

from different chapters worked together through the National Fraternity to help bring PiKA to UCONN. The three transfers were Depino, Paul J. Kieffer (*Saint Louis, Iota Nu '90*) and Mark H. Sybrandt (*Western Carolina, Zeta Xi '88*).

In response to the three transfers and the university's willingness to expand its Greek system, Expansion Consultant Christopher M. Vining (*Central Florida, Eta Phi '88*) and Chapter Consultant Gregory C. Cohen (*Emory, Beta Kappa '88*) arrived on the Connecticut campus to establish a Pi Kappa Alpha colony in March 1992. Interviews were conducted with prospective colony members. In order to be selected as a colony member, an individual had to possess the qualities: leadership, scholarship, athletic excellence and gentlemanly conduct. The colony's Alpha class was officially pledged into the Fraternity on May 1, 1992. This ceremony was conducted with the assistance of the Pikes from Epsilon Alpha Chapter at Trinity College.

Pi Kappa Alpha's Connecticut colony was officially recognized by the university's IFC in Fall 1992. It was also during this time that the colony began rushing men to take their place in the colony's Beta pledge class. By Spring 1993 it was apparent that the Pikes had brought a much needed new presence to the Connecticut Greek system. The colony's Spring 1993 rush totals were the highest on campus. When classes resumed the following fall the Pikes continued to bring top men into the colony ranks and once again the Pikes walked away with the largest pledge class on campus.

Connecticut Greek System

Greek life at UCONN began to hit its stride during the 1940s when fraternities and sororities were assigned chapter houses and residence halls. This area of campus occupied by Greeks was known as Northwest Quad. The 1960s and 70s brought tough times for the Connecticut Greek system as it faced difficulties with the university administration. Such troubled circumstances brought membership numbers to an all time low. In 1979 the UCONN Board of Trustees adopted resolutions to re-establish this once strong Greek community by leasing university facilities or land to fraternal organizations. Through the 1980s the Greek community and university worked to strengthen relations with each other. As a result of such communication, a coordinator of Greek life position was estab-

lished. The working relationship between Greeks and university administrators has resulted in a successful rejuvenation of the UCONN Greek system. In 1979 there were 16 Greek organizations totaling 280 students and only two Greek organizations had housing. Today, there are 26 Greek organizations and 14 have housing.

University of Connecticut History

The University of Connecticut was founded in 1881 as the Storrs Agricultural School after Charles and Augustus Storrs provided 170 acres of land, several frame buildings and financial support. The university opened its doors on September 28, 1881, with 12 students in the first class. In 1893 the school changed its name to the Storrs Agricultural College. Six years later the school changed its name to Connecticut Agricultural College. In 1933 it was renamed Connecticut State College. Then, in 1939, the institution took on its final name as the University of Connecticut. Today, the university's extension services and continuing education programs reach all 169 cities and towns in the state of Connecticut.

The campus of Appalachian State University benefits from the natural beauty of the surrounding area's Blue Ridge Mountains.

Pikes of Appalachian State Answer Challenges On Way to Chartering Iota Psi Chapter Appalachian State University

When the Pikes of Appalachian State were in their initial stages as a colony, the National Fraternity presented them with several challenges. The colony was to have a minimum GPA of 3.0, 85 members, and 2,100 hours of community service. Through the tireless efforts of the scholarship committee, rush committee and community service chairman, the colony was able to accomplish the lofty goals which had been set for them. The next step for the colony was their inspection. This is one of the final stages of the colonization process where a prospective chapter's programs must pass the approval of the regional president, an expansion consultant and host chapters. Following inspection of Pi Kappa Alpha's colony at Appalachian State University on January 29, 1994, Carolinas Regional President Patrick D. Haun (*High Point, Delta Omega '89*), made a statement members had been striving to merit since their first days as a colony in September 1992.

"It would be my pleasure to recommend to the Supreme Council that a charter be granted to the Appalachian State colony of Pi Kappa Alpha."

Once traveling and scheduling details were arranged for installation teams, national officers and colony members, April 2, 1994 was selected as the official chartering date for Iota Psi Chapter at Appalachian State University. Prior to the chapter receiving its charter, colony members were initiated into the Fraternity on Friday, April 2. Conducting the initiations were teams from Delta Omega Chapter at High Point University, Epsilon Zeta Chapter at East Tennessee State University and Theta Sigma Chapter at Winthrop University. The historic weekend in Hickory,

North Carolina was highlighted by Saturday evening's installation banquet. National President Thomas J. Turner delivered a stirring keynote address to a crowd of over 350 people which included new initiates, dates, parents and university officials. Also in attendance were Haun, National Vice President Daniel F. McGehee (*Southeast Missouri State, Epsilon Iota '63*) Past Chapter Consultant Larry W. Eby (*Southeast Missouri State, Epsilon Iota '88*) and Past Expansion Consultant Christopher S. Hough (*Pittsburgh, Gamma Sigma '89*). Eby and Hough conducted the Appalachian State colonization in September 1992 when they were members of the Fraternity's professional staff. During the evening's celebration, Iota Psi presented the Fraternity with an aerial photograph of the Appalachian State campus surrounded by the Blue Ridge Mountains.

Iota Psi History

Appalachian State University approached Pi Kappa Alpha's Memorial Headquarters in 1985 to encourage the Fraternity's expansion efforts. Seven years later, in September 1992, Eby and Hough arrived on campus to recruit the university's finest men to take part in the Pi Kappa Alpha experience. The colonization process began with the solicitation of rush recommendations from sororities, faculty, athletic coaches and campus officials. Men were sought who met the Fraternity's membership requirements of leadership, scholarship, athleticism and gentle-

manly conduct. By striving to attract men who met these standards, Pi Kappa Alpha hoped to raise the standard of excellence in Appalachian State's already strong Greek system. The efforts of the expansion program were rewarded with the pledging of 43 colony members.

The next step for the colony was appointing officers. These officers, under Hough's advisement, established a set of colony objectives. A listing of colony by-laws were also developed. The by-laws were designed to serve as a means of governing the newly formed colony. Both the objectives and by-laws remained in effect until the colony was chartered.

Appalachian State Greek System

Prior to the 1970s, social fraternities were banned on the Appalachian State campus. In 1971, the university began to review the opportunity for fraternity expansion. During this time, several fraternities contacted the university about possible colonizations. The university formally established an experimental Greek system on December 13, 1972 with the colonizations of both Pi Kappa Phi and Tau Kappa Epsilon fraternities. The probationary period was established for one year. During this period another fraternity colonized on campus and was joined by three sororities. On December 3, 1973 the student senate recommended

full recognition for these social organizations. A moratorium was placed on the university's Greek system in 1976. The Greek system was "opened up" in 1980 following an extensive expansion study program that had been conducted during the 1979-80 academic year. Since the moratorium was lifted in 1980, the Appalachian State Greek system has grown to over 1,100 undergraduate members representing 14 fraternities and 9 sororities.

Appalachian State University History

Appalachian State University, located in Boone, North Carolina, opened its doors as Watauga Academy on September 5, 1899. The academy was founded by two brothers: Dauphin Disco and Branford Barnhard Dougherty. The first classes began with 53 students. The academy was a private institution and began on the second floor of an abandoned two room structure. It offered instruction in grades one through eleven and teachers training. In January 1900 the citizens of Boone gave about \$1,100 and labor to aid in the construction of an incomplete building that was on land donated by the father of the academy's two founders. By Winter 1902 more than 100 students were in the academy — the majority of them adults. Recognizing the need for well trained teachers in the area, the North Carolina General Assembly supported the

Continued on next page

Continued from previous page

school by majority vote and the Appalachian Training School was established.

In 1921, the General Assembly changed the training school into a normal school, and renamed it Appalachian State Normal School in 1925. In 1929, the state legislature renamed the school Appalachian State Teacher's College, and the school became a four year institution. By 1948, Appalachian State offered its own master's degree and had an enrollment of 1,100 students. William H. Plemmons began his term as the school's president in 1955. Under his guidance, the university developed a plan to add 24 new buildings. Also under Plemmons, the school was named Appalachian State University on July 1, 1967. By 1979, when John Helm succeeded Plemmons as president, Appalachian's enrollment nearly doubled. Under Thomas, the university grew to its current size of 325 acres. When Pi Kappa Alpha arrived at Appalachian State University in 1992, it was an institution with 83 buildings and an enrollment of 11,650 students. It offers 94 undergraduate majors and 81 graduate majors.

Western Ontario Signals PiKA's Entrance Into The International Community

Iota Omega Chapter University of Western Ontario

On Saturday, April 9, 1994, Pi Kappa Alpha rejoined the ranks of international fraternities with the installation of Iota Omega Chapter at the University of Western Ontario in London, Ontario. The Fraternity's last Canadian chapter was Eta Gamma Chapter at the University of Windsor in Windsor, Ontario. Eta Gamma has been silent since 1972. While Iota Omega's chartering brought the Fraternity into a new era, it also meant the end of another era. Western Ontario was the last chartering of the Fraternity's "Iota" series of chapters.

Although Western Ontario's chartering was significant to PiKA history, it also meant that UWO's 48 colony members were presented the privilege of joining the membership that is Pi Kappa Alpha Fraternity. On Friday, April 8, 1994, these men were initiated into the Fraternity by host chapters from Delta Nu Chapter at Wayne State University and Epsilon Epsilon Chapter at the University of Toledo. Also assisting with the initiations were Great Lakes Regional President Nicholas S. Shafor (*Cincinnati, Alpha Xi '57*), Director of Expansion Steven S. Vincent and Colony Advisor Mike G. Steele (*Arkansas State, Delta Theta '82*). The

evening's ceremony's lasted several hours and ended just before midnight. Following a night of rest for the Fraternity's newest members, the chartering ceremony was held the next morning announcing Canada's newest and largest fraternity chapter. National President Thomas

The University of Western Ontario displays classical architecture.

J. Turner presented the charter with other national officers, including Arkoma Regional President Timothy O. Brown (*Arkansas State, Delta Theta '73*), in attendance.

Saturday evening the men of Iota Omega gathered with dates, parents and national officers, at the installation banquet to take part in the chartering celebration. To commemorate the occasion, Iota Omega presented the Fraternity with an embroidered University of Western Ontario flag which was signed by every member of the chapter.

Iota Omega History

Pi Kappa Alpha's presence at UWO began when Expansion Consultants Jeffrey S. Brown (*Southern Illinois, Iota Mu '90*) and Steven S. Heck (*Kansas State, Alpha Omega '88*) stepped foot on the regal campus on March 15, 1993, to begin the colonization. Shortly after their arrival, Brown and Heck began gathering names of prospective colony members. Over the course of the next two weeks, PiKA's 1993-94 expansion consultants contacted over 80 men and arranged interviews to present PiKA's purpose on the UWO campus. Following these interviews and several social gatherings, 60 men were extended bids to become a part of the Fraternity's sole Canadian colony. This number of colony members is impressive, but it is remarkable due to the fact that UWO's administration and interfraternity council placed a moratorium on new fraternities during the colonization efforts (after Pi Kappa Alpha had initially been granted an invitation by the university to establish a UWO colony).

The lack of IFC recognition would continue to hinder the colony's efforts to take part in Greek life at UWO throughout the remainder of the 1992-93 school year. When the colony returned

for the Fall 1993 term there was still confusion due to the lack of IFC recognition and the fact that the colony membership had dropped to 43 men when several members did not return to school, including the colony president. Now the colony was placed with the additional burden of searching for internal leadership. To assist the chapter, Brown returned to UWO in late September and recruited Steele to serve as the colony advisor. Andrew Morrow and Steve Dalal were appointed colony presidents and Mark Neamtu was appointed external vice president. Now with solid leadership in place, a retreat was held to regroup and organize a game plan for the upcoming year. Colony members left the retreat with the unwavering belief they could reach the goals they had established for the 1993-94 school year.

Fall rush began on October 3 and the colony was able to bring 14 new men into the colony. Holding successful social events continued to be a battle in the fall as the IFC difficulties continued to be a problem. Yet the colony refused to let such obstacles hinder their journey towards chartering. Following the holidays, the colony reconvened in January to set goals for the upcoming semester. One of the priorities for the semester was to have an outstanding winter rush. The winter rush period started off in strong fashion with over 40 men being actively pursued by the chapter. After an intense two weeks of rush, 24 men were brought in as the Gamma pledge class of the UWO Pikes.

Following rush, the colony looked to the spring calendar of activities. The colony held a community service activity for the rehabilitation unit at the Parkwood Hospital on March 2. Immediately following the event, the Pikes had to make final preparations for their inspection on March 5-6. Although just a year old, the colony had proven itself capable of overcoming adversity and finding the leaders and members necessary to be a viable chapter of Pi Kappa Alpha Chapter. The UWO Colony passed inspection and was approved for chartering. Pi Kappa Alpha was once again an international fraternity.

Western Ontario's History

Originally named the University of London, Ontario, the university received its charter from the province in 1878. The first students graduated in Arts and Medicine in 1883. In 1923, the name was formally changed to the University of Western Ontario. Since 1878 over 138,000 students have graduated from UWO. The university currently has 17 faculties and professional schools that offer over 40 degrees, diplomas and documents to over 26,000 students. Over 4,000 faculty and staff serve the university. There are 68 buildings on campus. As for the UWO Greek system, it is composed of 22 fraternities and 6 sororities.

PiKA's Chapters Close the Books On Another Outstanding Year

THETA CHAPTER *Rhodes College*

In the spring, the men of Theta Chapter held a sports clinic for the children of Snowden Elementary School in Memphis, Tennessee. The brothers also spent the spring involved in campus organizations. Four Pikes served as members of the college's Social Regulations Council, with Ravi D. Chauhan serving as recording secretary. Two Pikes served on the student assembly, with Scott B. Brown serving as vice president. Another member of the chapter served on the Honor Council and Martin O. LeRoy was president of the Institute of Management Accountants.

Led by Rush Chairman Frank H. Pinkerton, Theta Chapter fared well in rush. 19 men were pledged and 17 men were initiated. Part of the chapter's success in rush was attributed to a chapter-sponsored event known as Spikefest. The event was a three-on-three volleyball tournament that teamed two rushees with an active member of the chapter. The tournament also raised money for the Children's Fund of Memphis.

Theta's John P. Fonseca, a five time National Karate Champion, continued his excellence in the sport by placing second this year in Nationals and the team trials. He will be representing the United States in karate as a participant in next year's Pan-Am games. At the college level, Jon M. Morgan was named to the all conference cross country team. Morgan and PiKA's Brendan P. Minihan led the Rhodes cross country team to a conference title.

IOTA CHAPTER *Hampden-Sydney College*

Iota Chapter sponsored the first PiKA/GMGC (Good Men, Good Citizens) Volleyball Tournament. The event, organized by PiKA Senior Sean P. Pepe, raised \$700 for Special Olympics and was so successful that the chapter created a position to organize the tournament every year. The men of Iota Chapter also assisted Special Olympics during their yearly event at Hampden-Sydney.

On campus, Matthew E. Malone was selected as one of three head resident advisors. Seven chapter members were on the lacrosse team, two

The men of Gamma Omega Chapter at the University of Miami show off their Pike pride in their customized pool.

members were on the soccer team, and two were on the football team.

UPSILON CHAPTER *Auburn University*

During the spring, the Auburn Pikes sponsored the Pi Kappa Alpha Youth Olympics. 70 kids between the ages of nine and ten were invited over to the chapter house for an afternoon of pizza and games. Parents were also encouraged to attend the event. Newspaper reporters were in attendance and an article was printed in the Auburn/Opelika newspaper and in *Between the Columns*, a Greek newspaper that is distributed on the Auburn campus every quarter.

OMEGA CHAPTER *University of Kentucky*

The men of Omega Chapter continued their vigorous support of the community by initiating a fund raising drive for the National Pet Assistance and Adoption Network, Inc. This program provides trained assistance dogs to paralyzed and handicapped students at the University of Kentucky.

Along with their community service efforts, the Kentucky Pikes maintained their reputation at UK for being campus leaders. Grant I. Vorhauer was elected vice president of IFC and Robert Warrington was campaigning to follow Omega's Clarence R. Dowdy as president of the Student Government Association.

ALPHA ETA CHAPTER *University of Florida*

Alpha Eta's Vince Marconi maintained his 4.0

grade point average this past semester while serving as the chapter's internal vice president.

As for the chapter's alumni relations program, 70 alumni and their families returned for the chapter's annual Founders Day celebration.

The Pikes once again held their annual Volleyfest philanthropy to benefit Big Brothers and Big Sisters. The event, which consisted of a volleyball tournament, sorority line dance competition, and penny voting, raised \$5,000.

In the area of campus involvement, Senior Antony Ciccone joined Freshman Mark A. Thacker and Sophomore Andy Kallenberg as three of Florida's 80 student senators. Freshman Michael P. Griffin was appointed cabinet director in charge of disability affairs. Sophomore T.J. Graczewski was named supervisor of campus elections. Cameron Dezfulian was tapped into Florida Blue Key. Also, Sophomore Chris C. Todd earned a program directorship for Gator Bowl, the largest student-run university homecoming pep rally in the nation.

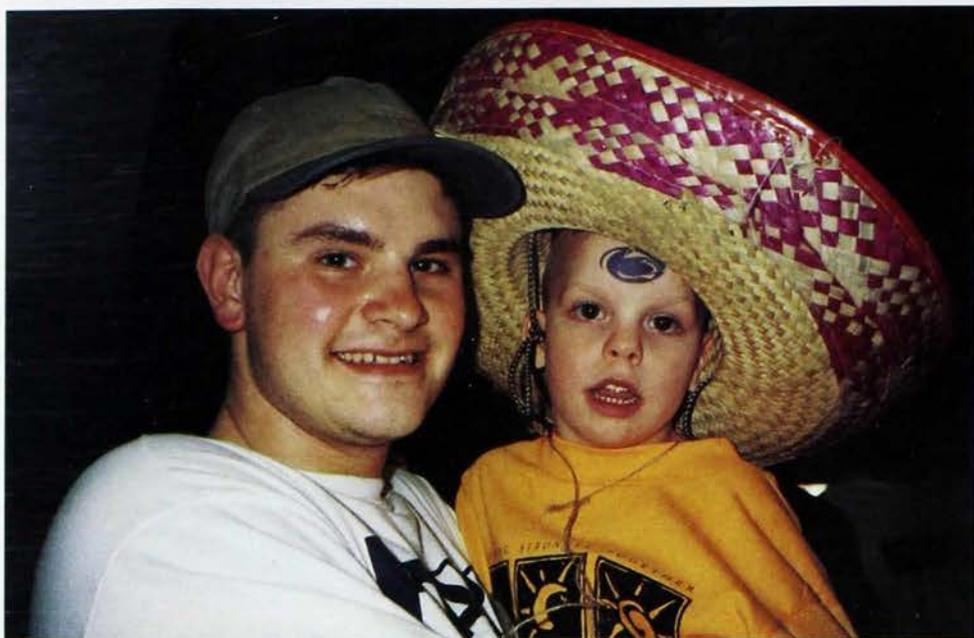

Pike athletics again placed themselves above the rest as the Fraternity captured intramural championships in football, softball and basketball. The chapter also took second place in volleyball.

AK ALPHA KAPPA CHAPTER *University of Missouri-Rolla*

The chapter used the university's annual St. Patrick's Day festivities to reunite alumni. Alpha Kappa also finished an alumni directory and held an alumni golf tournament in June.

On campus, the Pikes continued to take their place as campus leaders. Denis A. Mink was

Community service is top priority for the men of Beta Alpha Chapter at Penn State. Above, Ted Dwyer receives a show of support from one of the many recipients of the Four Diamonds Fund. On the youngster's forehead is the Penn State Nittany Lion insignia.

president of the American Foundryman's Society; Terry R. Shockley was vice president of the American Society for Engineering Management; Marty A. Voss was secretary of American Society of Civil Engineers; and Jarod P. Stock served Phi Eta Sigma as vice president while Dale Spence served as its secretary.

Alpha Kappa set a community service goal of 750 hours. The chapter was well on its way to reaching the goal through highway clean-ups, tutoring programs, and blood drives. The funds raised by the chapter went to help fight Multiple Sclerosis and Diabetes.

AE ALPHA XI CHAPTER *University of Cincinnati*

Founders Day 1994 was a great success for Alpha Xi Chapter. The festivities were held at The Phoenix in downtown Cincinnati.

During the winter, the Pike Annual Clothing Drive collected 2,000 articles of clothing from neighborhoods surrounding the campus. Saturday, May 7, 1994, was the first annual Pikefest. It was held at Nippert Stadium. Five bands performed for the benefit of the American Cancer Society and the Freestore/Foodbank of Cincinnati.

On the Cincinnati campus, 15 of the 30 student senators were Pikes.

AP ALPHA RHO CHAPTER *The Ohio State University*

March 5 was the date of Alpha Rho's memorable Founders Day celebration. A number of alumni participated in the day's activities. In

April, alumni returned for the chapter's annual alumni golf outing.

Many Alpha Rho members devoted their community service efforts to OSU's Adopt-A-School program. The program focuses on offering guidance, leadership and tutorial assistance to elementary school children. The OSU Pikes also continued to be involved in the Adopt-A-Highway program.

E. Gordon Gee (*Utah, Alpha Tau '63*), president of Ohio State, was honored at the chapter house in February. Gee was presented with a bow tie, which he has become famous for wearing, in traditional Garnet and Old Gold colors.

AΣ ALPHA SIGMA CHAPTER *Univ. of California-Berkeley*

Pikes were well represented on the Berkeley campus during Spring 1994. They were involved in activities such as IFC, honor societies, and the campus newspaper. 21 members of Alpha Sigma participated in varsity athletics.

In February, Alpha Sigma won the Golden West Region's Community Service Award. One of the chapter's fund raising events was "Battle of the Bands" for the Oakland Children's Hospital.

AΩ ALPHA OMEGA CHAPTER *Kansas State University*

During the 1993-94 academic year the KSU Pikes brought home an all university ranking in arm wrestling. Damon M. Herbst and Michael O. Skahan both took first place, and Robert M. Rhoney captured second place.

Eric A. Stonestreet and Jason F. Posch worked with the Big Brothers program in the Manhattan, Kansas, community.

BA BETA ALPHA CHAPTER *Pennsylvania State Univ.*

Pi Kappa Alpha and Delta Zeta Sorority joined forces in Dance Marathon 1994 to raise \$13,185.98 for the Four Diamonds Fund. The fund assists the families of children who are being treated for cancer at the Milton S. Hershey Medical Center. The Penn State Dance Marathon has benefited the fund since 1977 and is the largest student-run philanthropy in the nation.

BΓ BETA GAMMA CHAPTER *University of Kansas*

Beta Gamma Chapter Advisor Kenny K. George (*Beta Gamma '83*) presented the chapter with a new printer for their computer.

Over the summer break the house will undergo some minor renovations and upkeep projects. If any alumnus is interested in making contributions or donating materials for these projects, please call Kenny George at (913) 780-1175.

The Pikes won third place in community service during the university's annual Rock Chalk competition. Beta Gamma also sponsored the Piezo Cup Soccer Tournament, which benefits Big Brothers/Big Sisters.

BZ BETA ZETA CHAPTER *Southern Methodist Univ.*

On March 24, the men of Beta Zeta hosted Pi Kappa Alpha National President Tommy J. Turner (*Texas Tech, Epsilon Gamma '67*). He was responsible for giving a risk management seminar for the entire university. Elsewhere on campus, the chapter placed ten members, more than any other fraternity, on the student orientation staff. Beta Zeta also has three senators and a vice-chairman residing in the 1994-95 student senate.

The SMU Pikes held their Founders Day in March. Many alumni began the day's festivities by taking part in an alumni golf tournament. Later that evening a banquet was held to cap off Founders Day 1994.

Beta Zeta continued its involvement in the community during the spring by joining with Kappa Alpha Theta Sorority to take a group of young orphans bowling. The Pikes also raised the most money of all SMU fraternities in a campus charity lock-up for the Muscular Dystrophy Association.

BK BETA KAPPA CHAPTER Emory University

The Beta Kappa Pikes were an athletic force in the spring as they won both the wrestling and the basketball championships. These victories put the Pikes in an excellent position to win the All-Row title for the third year in a row.

On Founders Day the chapter dedicated a new sun deck attached to the chapter house. This gift was the direct result of the Beta Kappa Housing Corporation and the contributions of alumni such as Henry W. Hill (*Beta Kappa '48*). The deck was dedicated to Laurence A. Stoumen (*Beta Kappa '82*) for his involvement with the chapter and his dedication to PiKA.

The second Chaikin Scholarship was awarded to Darryl Phillips at Beta Kappa's Founders Day. The scholarship is given in memory of Lieutenant J.G. David Chaikin (*Beta Kappa '84*). To ensure that this annual award is given to a Beta Kappa undergraduate on a continuing basis, alumni may make contributions to the Pi Kappa Alpha Educational Foundation in Chaikin's name.

BM BETA MU CHAPTER University of Texas

The men of Beta Mu Chapter extend many thanks to Chapter Advisor Mark Hruzek (*Beta Mu '80*). According to the chapter, his patient guidance has allowed the chapter to understand fraternal responsibility while maintaining the top spot on campus.

Beta Mu held its most successful Founders Day in recent memory as over 120 alumni returned to partake in a golf tournament and alumni banquet.

Two members of the chapter were elected to the Texas IFC. Ethan Underwood is the new philanthropy chairman and Jeff D. Thornton is the new risk management committee chairman.

Beta Mu met its spring rush goal with the pledging of 15 new members. In athletics, the Pikes were 4-0 and out-scored opponents 43-2.

BO BETA OMICRON CHAPTER University of Oklahoma

On March 18, at the OU Greek Awards Reception, Beta Omicron was presented with awards for Most Improved GPA Award from Spring 1993 to Fall 1993 and Chapter Efficiency for Spring 1994. The efficiency award recognizes the fraternity chapter which contributes to the overall efficiency of the Greek Affairs Office and IFC.

BΣ BETA SIGMA CHAPTER Carnegie-Mellon University

The Beta Sigma Pikes had one of their best spring semesters in chapter history. In February, the chapter brought home three awards from the North Atlantic Regional Leadership Conference: Most Improved Chapter, Outstanding Chapter Advisor and Most Man Miles. On campus, the Pikes brought home first place in the Fraternity Division at Greek Sing in March. The fund raising efforts of the chapter went towards raising money for the Juvenile Diabetes Foundation. The majors IM softball and indoor soccer teams spent the spring charging towards their respective championships for the second year in a row. SMC John D. Gebicki was on the ballot for Greek Council President.

Finally, the effort put forth by buggy chairmen Andrew J. Bordick and Rossos J. Kladakis was rewarded with wins in both the men's and women's divisions of this year's Spring Carnival Sweepstakes races.

ΓΔ GAMMA DELTA CHAPTER University of Arizona

Despite winning three straight Smythe Awards, the men of Gamma Delta did not rest on their laurels in 1993-94. The chapter was able to get 38 excellent men in spring rush. This was the highest spring total of any Arizona fraternity.

A number of Pikes were members of the #9

At Beta Kappa Chapter's Founders Day celebration, Darryl Phillips (*left*) was presented with the Chaikin Scholarship, and a new deck was dedicated in honor of Past House Corporation President Larry Stoumen (*right*).

ranked, Fiesta Bowl Champion, football team. Besides PiKA's presence in Division I sports, the chapter also took the intramural league by storm as the Pikes led all fraternities in total intramural championships for the year.

ΓΞ GAMMA XI CHAPTER Washington State University

This past March, Washington State's Pikes teamed up with Lambda Chi Alpha Fraternity to raise \$2,140 for the Make A Wish Foundation. "Make A Wish" is an organization that donates an all expense paid trip for a child with a life-threatening disease and his/her parents to visit Disney World, MGM Studios and Sea World. To raise the money, the Pikes and Lambda Chi Alpha Fraternity sponsored a two day women's flag football tournament known as the first annual Spring Pigskin Shuffle.

For the second time in three years, Gamma Xi captured the Kappa Delta Sorority soccer tournament. The Pikes competed against WSU's 26 fraternities and student living groups.

E. Gordon Gee (*center, with bow tie*), president of The Ohio State University and a 1963 initiate of Alpha Tau Chapter, was honored by the men of Alpha Rho Chapter during festivities in February 1994.

Continued on next page

ΓO GAMMA OMICRON CHAPTER
Ohio University

Gamma Omicron had three men initiated into Ohio University's Mortar Board, four men into Order of Omega, and three men into Omicron Delta Kappa.

The Ohio Pikes were represented on the IFC executive committee with the election of Chris L. Mitchell as vice president of athletics. On the playing field, the Pikes clinched the annual IFC Athletics Trophy for the second year in a row by compiling 285 points. The next closest fraternity was 90 points behind the men of Gamma Omicron Chapter.

Gamma Omicron hosted the 1994 Great Lakes Regional Leadership Conference February 4-5.

ΓT GAMMA TAU CHAPTER
Rensselaer Polytechnic Inst.

Gamma Tau alumni braved one of the worst storms of the year to attend their chapters 1994 Founders Day. At the celebration, Keith D. Leonard received the Pike of the Year Award; John A. Cococcia received the Frederick Southgate Taylor Gentleman Award; and Bryan M. Beauchesne received a scholarship award for attaining a 4.0 GPA, the highest in the chapter. Arthur A. Auchenbach III received an award for most improved GPA in the chapter. The chapter credits much of its improvement in the area of alumni relations through the presence of a monthly alumni newsletter and an updated alumni database.

In the area of campus relations, the chapter held a semi-annual faculty dinner that attracted over 30 members of the faculty and staff of the institute. The Pikes also raised over \$40,000 for Rensselaer through the institute's phone-a-thon.

At the 1994 North Atlantic Regional Leadership Conference, Gamma Tau was selected to host the 1994 North Atlantic Regional Sports Challenge September 9-11.

ΓΩ GAMMA OMEGA CHAPTER
University of Miami

Gamma Omega continued to serve the community throughout the spring semester. They initiated the first Adopt-A-Highway program at Miami, donated over \$2,000 to United Cerebral Palsy, and were involved in programs such as Habitat for Humanity, Best Buddies, Big Brothers/Big Sisters of Miami, and Boys Town.

The Miami Pikes made a strong presence on campus by holding positions such as student government president, student government treasurer, Order of Omega president, and Order of Omega vice president. They also won Greek Week for the fifth time in six years.

In rush, the chapter rushed 45 men, compared to the overall average of 27 men. At the 1994 Sunshine Regional Leadership Conference, Gam-

ma Omega won the rush award for the fifth consecutive year.

On the playing field, the Pikes clinched the President's Cup sports trophy with wins in all four major sports. It was the largest margin of victory in intramural sports in over a decade.

ΔA DELTA ALPHA CHAPTER
George Washington Univ.

Robert L. Snyder was elected vice president of risk management for IFC. Devon A. Klein participated in the Greek Leadership Conference at the Washington Marriott. The Pikes also participated in Marvin Gras '94 for the benefit for GWU's division of student & academic support services.

ΔN DELTA NU CHAPTER
Wayne State University

Continuing its prowess on the Wayne State campus, Delta Nu's Michael S. Roberts and Allan D. Julian were elected to the student council in a landslide vote in April. The elections marked the fourth straight year that at least one Pike was elected to the council.

Delta Nu hosted its Founders Day banquet March 11 at the Detroit Athletic Club. Jeffery S. Aughton (*Delta Nu '89*) was awarded the Donald J. Miller Outstanding Alumnus Award for his work on the Delta Nu House Corporation.

For the fourth time in the last five years, the Pikes won the Greek Week '94 championship. Chris R. Tranchida garnered the Greek King award for raising the most money for the Children's Leukemia Foundation of Michigan.

ΔX DELTA CHI CHAPTER
Univ. of Nebraska-Omaha

Once again the Pikes of UNO led the way in athletics. At the conclusion of the intramural basketball season the Pikes were ahead in points in the race for the annual Sports Cup. This is the fifth year in a row that the Pikes have achieved this distinction and seven out of the eight years the award has been in existence. UNO's lacrosse team has a roster that is almost 50 percent Delta Chi Pikes.

New initiate Chris S. Bollinger earned a 4.0 GPA his pledge semester. This was the highest GPA of all pledges on campus.

EA EPSILON LAMBDA CHAPTER
Murray State University

The MSU Pikes started off the spring semester by taking 22 pledges, the largest on campus. Brian W. Van Horn was re-elected president of the student government association. Brian D. Long was elected as senator-at-large and Jerry Rust was elected as a senator from the College of Business. Jason Miller, Chris Powless,

Jonathan M. Bell, James T. Shelton, and Nicklas C. Winsett made the men's cheerleading team.

In athletics, Paul T. Clements and Brandon L. Tucker helped lead the men's golf team. David L. Jackson, Jason D. Weatherford, Russell A. Jennings and Gregory S. Barlow played on the men's volleyball club team.

During the All Campus Sing competition, the Pikes placed first in the fraternity division, first in overall costume, and first among fraternities and sororities.

Epsilon Lambda took part in community service through activities such as a canned food drive and work with the American Heart Association.

EE EPSILON XI CHAPTER
Case Western Reserve Univ.

Chris A. Ricklic won the national championship title for the 167 lb. weight class at the NCAA Division III wrestling championships. He compiled a season record of 33-0 and was the only undefeated wrestler in Division III in 1993-94. Ricklic co-captained the team with fellow Pike David Ciacci, who captured fourth place in the 134 lb. weight class at the wrestling championship. He ended his college career with a record of 120 - 20 and set a record for most wins.

ZA ZETA ALPHA 'A' CHAPTER
GMI Engineering & Management Institute

Zeta Alpha "A" had a strong academic showing in 1993-94. The Fraternity dominated the student senate, holding five of the twelve votes, including president. The chapter won the Dean's Cup, which recognizes the fraternity that excels in athletics, academics, community service, and overall campus involvement. The Pikes also won the floor hockey and softball championships. In community service, the chapter completed 620 hours of volunteer work.

Zeta Alpha "A's" class of 1990 made a generous donation to the chapter during the Pikes semi-formal. During rush, the chapter pledged 24 men, the most on campus. They initiated 22 of these men, also the largest number on campus.

ZB ZETA BETA CHAPTER
Delta State University

Zeta Beta held two canned food drives during the school year. The most recent food drive was for the earthquake victims in Los Angeles. The Delta State Pikes also participated in Adopt-A-Highway and Chapter Church. They set a goal of 3,000 community service hours for the year.

On campus, the chapter won the Phi Mu Outstanding Fraternity Award. C. Anthony Labella was elected Freshman Class Favorite by the student body. David J. Myres was an active

part of the DSU Army ROTC and was IFC president. Edwin H. Harrington was elected SGA Cabinet Member of the Year. Brian K. Henry, Brian A. Pender, David W. Peyton, and Labella all served on the SGA senate. Labella was also named Omicron Delta Kappa's Freshman of the Year.

After restructuring the rush program, Zeta Beta had the largest pledge class on campus. The Pikes were also on their way to winning the intramurals competition for the twenty-sixth time out of the last twenty-seven years. In varsity athletics, Zeta Beta had six members on DSU sports teams.

ZETA GAMMA CHAPTER Eastern Illinois University

An alumni weekend was held April 30, to celebrate Zeta Gamma's 30 years on the Eastern Illinois campus. The chapter also took time during the spring to sponsor "Walk America" for the benefit of the March of Dimes and they also participated in Bowl For Kids Sake.

The chapter held a new event known as the "Gentlemen's Soiree." This was a non-alcoholic cocktail party in which sorority leaders were picked up in a limousine and were brought to the chapter house. The event also raised money to buy a plaque in memory of Bryan M. Rouse who was killed in an automobile accident last November.

Zeta Gamma had a number of varsity athletes in the chapter ranks. Dennis K. Alexander, Brandon M. Kuhl, Ryan D. Ivers, and Brad E. Rozboril were all members of the tennis team. Michael C. Quinlan was a member of the track team. Henry Ospina and Mark J. Valentis were members of the soccer team.

ZETA OMICRON CHAPTER California State University-Northridge

Despite the fact that many chapter members lost homes and property due to the Los Angeles earthquake in January, Zeta Omicron was still committed to helping the American Red Cross assist earthquake victims. The Pikes also made a renewed effort to help schools in the community and provide leadership for the youth of Los Angeles.

In February, the Zeta Omicron Pikes organized and hosted the 1994 Golden West Regional Leadership Conference.

ETA ALPHA CHAPTER Clemson University

Nathan E. Manning received the Jerome V. Reel Scholarship for Scholastic Achievement at this year's Founders Day banquet. Dean J. Papas received the chapter's award for most improved GPA while James E. Schwartz received an award

for the highest pledge GPA. John E. Hughes received the Colonel Robbins award for leadership at the banquet.

Three members of Eta Alpha were elected to the student senate and three brothers joined the student alumni council. The Blue Key Honor Society invited two brothers to join the chapter while the Tiger Brotherhood invited yet another PiKA.

John S. Britton was elected president of the IPTAY student advisory board and Jeffrey Brown was elected president of the student alumni council. J. Reid Rucker received the student services cabinet position under the student body president.

The Pike's Gold basketball team dominated the IFC tournament and brought home the championship trophy by defeating Sigma Alpha Epsilon Fraternity. The chapter strengthened its community service efforts with an Easter egg sale that raised over \$300 for Helping Hands of Clemson.

Eta Alpha will celebrate its 25th anniversary next November. Alumni will be notified of further details as the date approaches.

ETA EPSILON CHAPTER Angelo State University

Eta Epsilon's Tarrance L. Parish placed first at the 6th Annual Texas Invitational Tae Kwon Do Tournament. Parish competed in both sparring and form challenges. In past competitions he has won several awards for his skills, and has even won the national competition which gives him a shot at the 1996 Olympics. "Now with the support of my brothers in Pi Kappa Alpha, I feel I can accomplish anything," Parish said.

THETA ALPHA CHAPTER University of North Alabama

An alumni association was started by the chapter to keep alumni updated on the chapter and to increase alumni involvement. The contact for the association is Shaun T. Butler (205-764-8400).

On the UNA campus, several Pikes held prominent leadership positions. Alan G. Watkins was elected vice president of IFC; Frank J. Wiedergeses was elected to the IFC judicial board; Stephen M. Flanagan was elected president of Order of Omega; and Scott W. Stooksberry was named a summer orientation counselor. R. Glenn Harscheid was selected by the faculty as Greek Man of the Year.

In other activities, the Pikes won the All-Sports Trophy and raised over \$300 for Big Brothers/Big Sisters. They also sponsored a risk management seminar for UNA.

THETA BETA CHAPTER University of Montevallo

On April 23, the Pikes hosted Alumni Day at Oak Mountain State Park in Birmingham, Alabama. On that same day, the chapter held their first annual Brotherhood Retreat. Several team-building exercises highlighted the retreat.

In the area of campus relations, Pikes currently serve as IFC president; SGA treasurer; SGA administrative vice president; SGA director of student life; and SGA entertainment director. Theta Beta hosted a faculty reception in the spring. The president of the university attended along with many members of the faculty. An outstanding professor from each college was presented with a plaque.

THETA THETA CHAPTER Texas A&M University

In 1993-94 the Pikes of Theta Theta accomplished some major goals through the leadership and dedication of SMC Justin P. Wilde. The chapter erased a debt that burdened the chapter for a number of years. The Pikes leased an interim chapter house and have made plans for the construction of a new house. House Manager J. Ryan Rogers, headed the committee for acquiring the new house and oversaw every phase of its renovation.

The A&M Pikes were also active in a number of campus and Greek activities. Theta Theta participated in Songfest, an annual charity fund raiser sponsored by Chi Omega Sorority.

The chapter also participated in the "Big Event," a city wide service project sponsored by the Texas A&M student council.

The Pikes won the 1994 Alpha Delta Pi Tug of War and were the reigning champions of Sigma Phi Epsilon Annual Fight Night.

THETA LAMBDA CHAPTER Creighton University

Theta Lambda mourns the loss of alumnus Scott B. Cool (*Theta Lambda '89*). In honor of Cool, the chapter dedicated the formal room of the chapter to Cool and his family.

Community service has always been a source of strength for the men of Theta Lambda. This past year the chapter volunteered its time to a number of causes, including a local soup kitchen and a tutorial program for inner city youth. Other projects included the Adopt-A-Highway program.

The springs IFC elections resulted in 60 percent of the council being composed of Pikes. Elsewhere on campus, Theta Lambda sponsored a campus wide alcohol awareness seminar.

In rush, the chapter pledged 21 quality men during the spring. A number of different rush events were held, including "Pikes at the Dog Track" and house tours.

The Pikes of Theta Theta Chapter at Texas A&M University won the 1994 Alpha Delta Pi tug-of-war.

ΘΘ THETA OMICRON CHAPTER
Indiana State University

Spring 1994 was one of the best terms in Theta Omicron history. The ISU Pikes were victorious in both Greek Week and Tandemonia, completing the "Triple Crown" after winning the fall Homecoming competition. Theta Omicron also finished first overall in the Fraternity and All-University intramural events.

During the All Greek Spring Meeting, the fall associate classes were congratulated for achieving the highest GPA of any fraternity pledge class during the fall semester. Theta Omicron was honored with ten awards at the meeting — the most of any ISU fraternity or sorority. Also recognized during the spring were Douglas S. Collins and Gregory J. Goode as two of the university's Outstanding Juniors on campus. SMC Bradley A. Fentress was a finalist for the Alan C. Rankin Distinguished Senior Award.

In addition to the many awards and successes, Theta Omicron celebrated its 15th anniversary with a banquet at the Indianapolis Convention Center

IA IOTA ALPHA CHAPTER
University of Wyoming

The 1993-94 academic campaign ended in strong fashion. George E. Mathes received Greek Man of the Year honors, and Benjamin Whitfield was named Senator of the Year by ASUW. Also, the Student Activities Committee, which is chaired by and consists mainly of Pikes, won ASUW Committee of the Year. Earlier in the spring, IFC recognized Pi Kappa

Alpha as the best overall fraternity at UW for the second straight year.

Never resting on their laurels, Iota Alpha organized numerous community service activities. Chapter Vice President John E. Carr organized a benefit for the American Cancer Society. The chapter also organized a "community service day" and a picnic for the Association of Retarded Citizens. Iota Alpha's largest community service project is the annual Fight Night. This event is the second largest amateur sporting event in the state of Wyoming and has raised over \$10,000 for charity in three years.

IA IOTA DELTA CHAPTER
Rose Hulman Institute of Technology

The Iota Delta Pikes were once again the top scholastic fraternity on campus. The chapter recognized outstanding scholars through quarterly banquets and weekly announcements for members that received "A's" on test during the week.

A skate-a-thon was sponsored by the chapter for the benefit of Big Brothers. In April, Iota Delta's annual Moench Crit bike race was held, with proceeds going to United Cerebral Palsy.

Throughout the year, the chapter participated in the Adopt-A-Highway program and Red Cross Blood drives.

On campus, L. Parker Lucas and Eric J. Hansen, received parts in the spring musical *Guys and Dolls*. Lucas had the lead role in the production.

The Pikes won Delta Gamma's Anchor Splash for the third year in a row. Robert J. Danforth

set four new school records for Rose Hulman's swimming program. He was joined on the team by two other chapter members.

II IOTA IOTA CHAPTER
Michigan State University

Iota Iota's annual Alumni Banquet was held in March. James A. Kielbaso was recognized as Internal Pike of the Year and Daniel J. Oginsky was named External Pike of the Year. Matthew P. Scalabrino was honored for his athletic abilities as Pike Athlete of the Year. Matthew C. Tindall was named Pike Man of the Year.

Thanks to the support of chapter member's parents, Iota Iota was able to hold a successful "Father's Day" and make long needed improvements to the chapter house.

The MSU Pikes won the rush award for rush and they raised \$800 for Huntington's Disease through community service.

IK IOTA KAPPA CHAPTER
University of California Santa Barbara

Alumni weekend was March 5. The weekend's activities began on Saturday with a dedication of the chapter's new den in memory of Andrew C. Lynch (*Iota Kappa '89*). Later that evening, Iota Kappa held its third annual Fight Night. The top boxers in the UCSB Greek community slugged it out for charity. The Pikes spent 1,400 hours organizing the event and raised \$6,000 to benefit "Say Yes To Kids." This is an organization committed to keeping kids off the streets.

The spring also saw Iota Kappa win the Golden West Region's Chapter of the Year award, Alumni Relations Award, and Campus Involvement.

In rush, the Iota Kappa had a successful spring recruiting effort with the pledging of 22 men.

IA IOTA LAMBDA CHAPTER
Columbia University

Steve Kovacs received the George Cointe Fencing Award, a national honor, which is given to the athlete that embodies the excellence and sportsmanship of college fencing. In other athletic news, Stephen Cumbie was elected captain of the wrestling team.

On campus, six Pikes were voted into the Order of Omega, which gave Iota Lambda eight members out of the organization's 31. Alexander Cortez was a finalist in the Truman Scholarship competition. Pikes also held positions as president of the Undergraduate Dormitory Council, members of the student council, members of the college board of trustees, and as a university senator.

ΙΣ IOTA SIGMA CHAPTER James Madison University

Jeffrey S. Beliek has been elected to serve as an assistant Greek coordinator at JMU. Beliek's prominent position will be an invaluable opportunity to promote stronger Greek relations between Iota Sigma Chapter and other Greek organizations. Another highlight of the spring was the chapter's third place finish in Greek Sing.

In rush, 12 bids were extended for the spring semester and 11 men accepted the opportunity to take a place in the ranks of PiKA. The chapter has used the school newspaper and campus radio station to publish rush events.

As for scholastic achievement, the JMU Pikes continued to rank among the top three fraternities on campus.

IT IOTA TAU CHAPTER Johns Hopkins University

Late in the spring, the men of Iota Tau Chapter were in first place in the overall intramural competition with only three events remaining. Elsewhere on campus, the chapter accumulated a GPA just under 3.2.

On April 15, the chapter held an alumni event during Homecoming weekend. During the weekend, the chapter held its spring formal and presented a slide show. Awards for philanthropy, scholastics, athletics, and Pike of the Year were presented at the banquet.

The Johns Hopkins Pikes had the largest spring pledge class on campus as Rush Chairmen J. Bradley Beckman and S. Derek Seabury signed 21 men.

In the area of community service, the chapter accumulated over 1,000 hours by late March.

IX IOTA CHI CHAPTER University of Connecticut

The UCONN Pikes acquired a chapter house during the spring semester. The structure houses 22 brothers and rest on six and-a-half acres of land. Chapter members will be able to move into the house next fall.

Iota Chi's Gary C. Caserta is the 1994 Connecticut tae-kwon-do state champion and is the 1994 United States Cup Middleweight Champion.

The Pikes would like to extend an invitation to any alumni in the university's vicinity that want to get involved with one of the Fraternity's newest chapters.

GAMMA MU COLONY University of New Hampshire

Gamma Mu is extremely excited to be associated with Pi Kappa Alpha once again. Since their return to the UNH campus, the Pikes

The pledge class of Zeta Alpha "A" Chapter at GMI Engineering & Management Institute let all of Flint know that Pi Kappa Alpha is #1.

have achieved success in numerous areas. At the UNH Greek Awards Banquet, the Pikes were named Most Improved Chapter and Aaron Parkington was named Outstanding Greek Sophomore.

In community service, the Pikes held a Bike Rodeo to benefit an area children's home. The chapter also raised \$800 for the Sea Coast United Way.

An aggressive spring rush program resulted in pledging 12 men. The colony is now over 70 members strong.

NORTHEASTERN UNIVERSITY COLONY

In February the colony hosted an alumni

reception and the 1994 North Atlantic Regional Leadership Conference in Boston. An alumni newsletter was also sent out to Boston area alumni to notify them of the colony's inception and establishment of alumni relations.

The colony received an award from the city of Boston Parkland Commission for their work in maintaining a section of one of the city's parks. Chapter members also participated in the Adopt-A-School program and a dance to benefit disabled young people.

On campus, Jim Cooper was elected president of IFC and Joseph E. Macrillo was elected treasurer. In a little over a year, the Northeastern Pikes are one of the three largest fraternities on campus. □

(Texas Tech, Epsilon Gamma '67)*

Sending A Message

Thomas J. Turner discusses PiKA and his role as national president over the last two years.

by Timothy J. McNary

On Sunday evening, August 7, 1994, Pi Kappa Alpha's National President Thomas J. Turner (*Texas Tech, Epsilon Gamma '67*) will stand at the podium making the final address of his national presidency. The setting will be the Fraternity's 1994 International Convention in Tarpon Springs, Florida. The occasion will be the National President's Banquet. This will offer Pi Kappa Alpha's 28th national president the opportunity to look back over his two year journey as national president that began when he made his acceptance speech at the National Presidents Banquet during the Fraternity's 1992 National Convention in Phoenix.

Although serving as PiKA's national president is something that only a small group of men in the Fraternity share as a common bond, they are part of a much larger group of the Fraternity that is composed of men who are united by their unending dedication and service to Pi Kappa Alpha. To understand Turner's commitment to PiKA it is necessary to examine his record of service that goes well beyond his past two years as national president. He served Epsilon Gamma Chapter at Texas Tech University as chapter advisor from 1974-78. He was then appointed to serve as Lone Star regional president from 1978-80. He was legal counsel to the Supreme Council from 1980-84. At the 1984 Dallas National Convention, Turner was elected a Supreme Council vice president. He was a member of the council until 1988. From 1988-92, he was a trustee for the Pi Kappa Alpha Educational Foundation.

Along with his fraternal activities, Turner practices law as a partner with Turner, Medina & O'Neal, P.C. in Lubbock, Texas. He is a member of the State Bar of Texas, the American Bar Association, American Trial Lawyers Association and the State Bar of Texas Committee on Lawyer Advertising. He is also a director of the Texas Trial Lawyers Association. Turner and his wife Lou Pat have two children, Lisa and T.J.

Q. When readers of the *Shield & Diamond* see the cover of this issue, the first thing they see will be you standing next to your airplane at the airport in Lubbock. Has the airplane been an asset to your presidency as far as making it easier to travel across North America?

A. Yes, it sure has. There have been some times when the weather has been too bad for me to fly myself but in all honesty, it is a bit difficult to travel out of Lubbock — so the airplane has

helped a lot . . . I use it for business and pleasure. Mostly for business. My law firm owns it.

Q. I imagine as busy as you've been with the Fraternity, your law career and personal life, that flying, whether for business or Fraternity matters, is an ideal time to think about a number of things as you travel from one place to the next.

A. It does offer some time for thought. I've done a lot of thinking about the Fraternity and where we're going and where I'm going while I fly, because there's not a whole lot to look at. Believe it or not, although it's a lot of fun and it's different, the ground looks the same at 12,000 feet no matter where you are unless there is the occasional river or mountain to look at. So you do get introspective.

Q. During your interview with the *Shield & Diamond* in September 1992, you said if you could accomplish just one task over the next two years, it would be to make all members of the Fraternity realize how important it is to make a commitment to Pi Kappa Alpha that goes beyond the undergraduate years. Do you think this message has been delivered to PiKA's undergraduate members over the past two years?

A. I know the message has been delivered because I delivered it! I know that the other members of the Supreme Council delivered the message every chance they had. I also know the members of the Educational Foundation, when they've had a chance to interact with a group of alumni in a one-on-one meeting with an alumnus, have done the same thing. So I know the message has been delivered. Whether the delivery of the message has been successful in terms of increased alumni involvement remains to be seen. I don't think we'll see the results of that for several years.

Q. Do you think the establishment of a national alumni association is a step that may take the Fraternity's alumni relations to the next level?

A. Yes, because I think it will be a vehicle for people to remain in contact in some other way than just getting information through the magazine and through their own chapters.

Q. Also during the September 1992 *Shield & Diamond* interview, you said the Fraternity needed to strengthen its membership development and

membership recruitment programs. How do you think PiKA is doing in both of these areas?

A. I think the membership development programs have been as good, or better, than ever because programs such as the Officers Leadership Academy and the Chapter Presidents Conference continually revise, review and upgrade the Fraternity's programming. I think you can measure the effectiveness of these programs by the ratings of the undergraduates in attendance.

It's a little difficult to say whether the membership development programs in the field have improved, because you just can't get a feel for the results except through the chapter consultant reports. However, I review the consultant reports and it appears by the ratings chapters are receiving from the consultants, that membership development programs are working well at the chapter level.

Q. What about membership recruitment?

A. I think the success of our membership recruitment story can be told in the numbers. Our competitors showed decreases in overall membership in the past two years. While we have not shown the great increase we'd like to have, we have still managed to show an increase during a period when people going through formal rush have declined. All over the country, college students are not looking toward the Greek experience as something to do in college so we are faced with a declining market, yet PiKA is doing well. I think the membership recruitment program we are presenting on campuses has seen the best results through our expansion program.

Q. What do you think needs to happen within the Greek system as a whole to start attracting more members?

A. I think fraternities are going to have to continue to work to dispel the negative image that they have and replace the image of an elitist, wealthy club. People need to be made aware that Greek life enhances the overall collegiate experience through campus involvement, community service and social interaction. We need to develop a positive image that combats the thoughts of people who believe the Greek system is one-dimensional.

Continued on next page

Q. *Where does Pi Kappa Alpha go from Rush 2000? (Rush 2000 was the program adopted by delegates to the 1992 National Convention. It established the goal for chapters to pledge ten more men in the 1993-94 academic year than in the 1991-92 academic year, or five more per year, by the 1994 International Convention). Where do you think we go after this summer once Rush 2000 has run its course?*

A. Well, I think we need to narrow the focus a bit and change the dynamics of rush. I think one problem that fraternities and sororities have in general in terms of rush, is that they're relying on formal rush far, far too much. They're using the declining rush numbers as an excuse for not wanting to work as hard as it takes to keep people interested in recruiting members. The Founders didn't have formal rush and the Junior Founders didn't have formal rush. Formal rush is a creature that was created by the universities. Rush is nothing more than meeting people and making friends. One reason our expansion program is so successful is because it does not rely on formal rush. It gets a group of people that are like-minded together in a social setting and it helps them make friends. This is exactly what our Founders did when they formed the Fraternity. Unless we develop a rush philosophy that includes one-on-one rush, and demands that one-on-one rush work hand-in-hand with formal rush, we are going to continue to have problems.

Q. *You've mentioned expansion several times over the course of this interview, and you've spent much of your spring going from one chartering to the next. Obviously, Pi Kappa Alpha has an aggressive, if not the most aggressive expansion program today. Why do you think the Fraternity's expansion efforts are so successful?*

A. A lot of the credit has to go to Steve Vincent (director of expansion) and to Steve Heck and Jeff Brown (1993-94 expansion consultants). You have to have good sales people to sell a good product. If you have a good product without the right people present it, you may as well have no product at all. Our expansion program is second to none in the fraternity world and I have to give credit to those guys (Vincent, Heck and Brown). There is quite a bit that goes into establishing a chapter, they don't just happen. Our expansion people go on a campus and identify leaders and the kind of people that we want in our Fraternity. To get these type of men, our expansion staff uses sources from places such as the university administration, faculty and athletic department and other people that our Fraternity members will be interacting with on campus. Our colonies start off with a corps of people who are already motivated and who are well-liked and respected leaders on their campus. Then we tell these people 'go out and get some more just like you' and then we give them a set of goals and it's a business deal. You make the goals, you get a reward. . . it's not a paycheck, it's a charter. So, if you start off with a good program to give to them and start off with the right type of people to sell it, then recruit the right types of representatives on campus, it's hard to fail.

Q. *As a result of the Fraternity's aggressive expansion, you've made appearances at a number of charterings. At these charterings, are you seeing some constants from chapter to chapter as a result of PiKA's expansion program?*

A. Yes, the constant is that our chapters are very competitive in existing Greek systems and in a number of cases our new colonies have easily been recognized as the number one fraternity by the time they get their charter. They have been so good, so quickly, that they're perceived as the top competition on campus. This is even true in cases where we have colonies at old, established Greek systems. We are successfully competing against fraternities who are established on campus and have a large number of alumni in the area.

Q. *Over the past two years you have had the opportunity to meet hundreds, if not thousands, of undergraduates. What comes to mind when you think of today's college student or today's Pike?*

A. Today's Pike really isn't much different from yesterday's Pike. But today's Pike is faced with an opportunity to be a member as an undergraduate of the best fraternity in the world. We have the best programming, the best professional staff, and we're recognized as leaders in the fraternity world. We just can't be beat.

Q. *What do think are the expectations of today's undergraduates?*

A. I think we're seeing different expectations from the young men who pledge the Fraternity. There was a period of time, for a long time, when people came in and didn't ask questions about 'what's in it for me?' or 'what does the Fraternity do?' This isn't true anymore. I think that today's entering freshman is a much more serious-minded individual overall than I've seen in the past 25 years, from the time I was an undergraduate. I think today's college student is a little more focused and a little more inquisitive and a little more conservative.

Q. *As national president, has your perspective changed at all regarding the Fraternity and what it's capable of doing?*

A. My perspective has changed. I didn't realize what a challenge this office was and that surprised me because I've served on the upper level for so long. But I didn't realize what a challenge it was from the standpoint of whether I think the Fraternity can do more. I think given the caliber of our staff and our volunteer leaders, we've just started to scratch the surface. We have shown that we have a program that will sell on campuses to undergraduates and we are about to put together a program to try and sell those undergraduates toward a longer term commitment through an alumni association. When the alumni association is finally started and it begins working, I think we're going to be very, very pleased because it's something people want and we're going to open up some resources that we've never had before and we're going to tap some talent that we didn't know we had. When we tap this

talent, then I think it would be difficult for me to imagine the things that we could do.

Q. *As long as we are talking about challenges, what has been your single greatest challenge as National President?*

A. Well, probably the biggest challenge has been traveling from Lubbock, Texas to the rest of the country. That's the biggest challenge, along with finding the time to do the things I want to do. This office does require a great deal of time and fortunately we have the best fraternity executive in the country and many times the right decision was made and all I and the Supreme Council have to do is endorse it. Not everybody can be that lucky. So, the actual managing of the affairs of the Fraternity has not been much of a challenge because it's done so well by the people in Memphis. The biggest challenge has been trying to be every place that I wanted to be and make that compatible with my home life and my professional life. Sometimes one or the other, or both of them, didn't get all the attention that I would like to have given.

Q. *Any advice for the next man coming in as national president that may face some of the challenges you faced in balancing the national presidency with running a business, as well as being a father and a husband?*

A. I would say be humble enough to admit that you can't be all things to all people. Be willing to make the tough decisions that will come along because regardless of how well things are going, there will be some things that will occur that will require the national president, to say, 'o.k., this is the way it has to be' and 'this is the way it has to be for the good of the Fraternity', realizing that some feelings may be hurt and that there will probably be some negative impact because of the decision. Yet for the overall good of the Fraternity, somebody has to make the decision and my successor needs to realize that those tough spots will come. But the fun outweighs that.

Q. *Speaking of fun, what is the one thing that is going to stand out in your mind when you look back on your term as national president?*

A. Well, that's sort of like asking 'which of your children do you like best?' Naturally, I've enjoyed meeting the undergraduates when I've traveled. That's probably the most rewarding thing that has occurred. The opportunity to meet all of the undergraduates I've had a chance to shake hands has been highlighted by the charterings we've done because you get to see, first hand, the excitement of a birth of a chapter and you get to see the excitement on the faces of the undergraduates that made it happen. You get to see the admiration on the faces of their parents, you get to see a little bit of pride on behalf of the university people who have worked with our undergraduates and got a chance to work with a good group instead of having to play policeman to a bad group. Charterings are overall just a great experiences with no negatives. And I guess if I had to pick one thing that was most exciting, I would pick the night in Phoenix when I got to

walk down the aisle in the spotlight being recognized as national president. That's been the single most exciting thing, but it was just a precursor to a lot more fun and some more gratifying things as I've gotten to travel as national president.

Q. *Have there been some frustrations for you while you served as national president?*

A. Yes, at times it has been frustrating because I've had to say 'no' to some people. There were three occasions when I was very frustrated that I was unable to make regional conferences but I just couldn't be everywhere at once. That was very frustrating.

Q. *What kind of role do you see yourself playing as you sit on the Supreme Council as past national president?*

A. I intend to be there as an advisor if someone asks; and to be there to assist my successor if I think I can make a project a little easier or decision a little easier. That's how I see my role.

Q. *You've been involved in the upper level of the Fraternity at a number of different positions, as you look down the road, what do you see happening with your involvement in PiKA?*

A. I want to get active with the chapter at Texas Tech again — more active than I've been able

to as national president. I have stayed somewhat active with them, but not much, because I didn't think it would be fair to them to have the national president looking over their shoulder every time they had a chapter meeting. I want to become more involved with the chapter, because in my estimation, being a chapter advisor is the best job in the Fraternity. As far as what I would like to do in the future with the national office, I'd like to be available for anything that I'm needed to do. I would also like to be in a position to work with the Educational Foundation again because I think we're really going to see a big change in the Fraternity once the national alumni association is formulated and I really want to have an opportunity to work with that.

Q. *In the instances where the Texas Tech chapter did want more involvement from you, was it tough to stay in the role of national president and back away?*

A. When they've asked, I've been there.

Q. *Earlier in the interview you talked about instances in the Fraternity's expansion program where the university and Fraternity were able to establish a working relationship. Overall, do you think the point is getting across to universities that Greeks are a vital part of campus life and that there is a definite advantage to being a member of the Greek system?*

A. Yes, I do, because I see many of our chapters involved, not only in philanthropy, but becoming involved more in campus philanthropy: tutoring students, taking care of students who are physically challenged, doing things with the university community that universities don't have the money to fund for themselves. Our colonies have done a good job in convincing those administrations that we are serious about grades because our colonies all have the better grades among the Greek groups on campus and the universities like to see that. I think it may be slow progress, but I do think we're getting the message across that Pi Kappa Alpha, as a National Fraternity, has a commitment to making sure our members are a valuable part of the university and I'll tell you why. At the National Interfraternity Conference meeting in San Diego, which meets at the same time as the Association of Fraternity Advisors, a group of Greek advisors from around the country were talking about expansion. They were talking about whether to expand their Greek systems, whether they wanted to invite more groups on their campuses, if they did invite them, how to do it and so forth. Finally, one lady spoke up uninvited, and she didn't know that members of Pi Kappa Alpha's staff were in the room. She said, "Well, we're wasting time in talking about this. If you want to know how to do this right, go ask the Pikes." That incident tells me we're doing things right and that we have a good image. □

Quality.

Tradition.

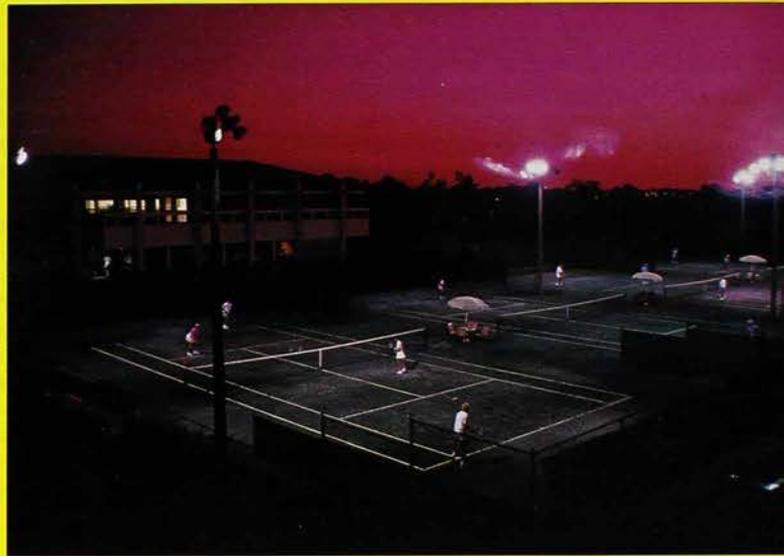

INTRODUCING THE OFFICIAL NECKTIE OF THE PI KAPPA ALPHA FRATERNITY

Crafted in English silk, the Pi Kappa Alpha necktie is steeped in tradition. The design is reflective of the simplistic yet powerful bonds of brotherhood. In the English "regimental tie" tradition, the silk threads have been dyed a deep garnet and rich old gold to symbolize the colors selected by the founders of the Fraternity. For 125 years, these colors have symbolized the tradition of excellence that is Pi Kappa Alpha.

Feel the tradition, the honor and the pride of Pi Kappa Alpha, and show off your true colors.

Necktie: \$39.95, Bowtie: \$37.95

1994 International Convention:

HIGHLIGHTS

- Announcement of the 1994 National award winners, including the presentation of the prestigious Robert Adger Smythe trophies to Pi Kappa Alpha's top chapters.
- Election of the 1994-96 Supreme Council Officers.
- Legislative sessions to chart the future course of the Fraternity.
- Two dinner banquets and two lunch banquets featuring addresses from our most prominent alumni.
- A recreation day with a golf tournament hosted by area alumni, tennis, volleyball, or a day at the beach.
- The opportunity to meet fellow PiKAs from across the continent, and renew old friendships from previous conventions and conferences.

A PiKA Paradise

Innisbrook-Hilton Resort
Tarpon Springs, Florida
August 6-10, 1994

REGISTRATION

Registration material will be sent to each chapter, chapter advisor, alumni association, and national officer. If you desire a registration packet or have general questions about registration please call Administrative Assistant Carol Patton at **(901) 748-1868**. On-site check-in will begin at 9:00 am on Saturday August 6 and will be open until 5:00 pm. If you plan to attend please send in an advance registration form.

The Convention Registration Fee is \$225 per person. Each attendee must pay a registration fee to attend banquets, legislative sessions, educational programs, and social activities.

Registration forms and fees are due by June 15 1994. Registration fees are not refundable or transferable after June 30, 1994.

The Innisbrook-Hilton Resort is a secluded thousand acre estate on Florida's Gulf, located just south of the Greek sponge diving and fishing community of Tarpon Springs near the Gulf of Mexico. The resort is located 35 minutes northwest of Tampa International Airport. Convention participants can enjoy 63 holes of championship golf, outstanding tennis, and numerous other recreational activities. Attractive lodge buildings provide guests with spacious club, one bedroom, two bedroom and two bedroom deluxe suites.

Hotel Reservations should be made directly with Innisbrook-Hilton Resort by calling **(813) 942-2000**. A special Convention rate has been secured for attendees. These rates may be available before or after August 6-10 if you plan to come early or stay longer. Be sure to book your hotel accommodation well in advance to guarantee space.

Travel Arrangements can be made by calling Suzette at George Garner Travel at **1 (800) 624-6579**. Special Convention fares are available and there is no cost to you for using this service.

Mileage Reimbursement — Each undergraduate chapter, if it has a \$0 balance with the General Fund and Self-Retention Fund by June 30, 1994, will receive a mileage allowance of 10 cents per mile roundtrip from the chapter location to Tarpon Springs, Florida. One-half of the allowance will be mailed in late July and the remaining half will be distributed at the end of the Convention.

Attendance is open to all members and their families. Each chapter is encouraged to send 15% of their full membership.

A Delegate must be appointed by each chapter and alumni association. Delegates will participate on Convention Committees and will debate and vote on legislation.

Appropriate Attire for the convention will be casual, however, jeans, cut-offs and t-shirts are discouraged for luncheon banquets, business, sessions and educational programs. Coat and tie are required for evening banquets and receptions.

Special events for Area Alumni are available. Sunday, August 7, offers the Educational Foundation Luncheon (\$25) and the National President's Banquet (\$40). On Monday, August 8, there will be a golf tournament. Tuesday, August 9, will be the Awards Luncheon (\$25), and the National Officers Banquet (\$47). All of these events will take place at the Innisbrook-Hilton Resort.

An Alumni Reception will be held on Saturday evening August 6. Details on this reception will be sent to you through the mail.

Ask Gwen

A Very Important Staffer Celebrates 20 Years with Pi Kappa Alpha

by Timothy J. McNary and Barbara E. Perkins

Gwendolyn DeShazo, Pi Kappa Alpha's membership records coordinator, is something of an institution at the Memorial Headquarters. On July 29, 1994, she will mark 20 years of service to the Fraternity.

Her first job with the Fraternity was tracking the General Fund. For the past 14 years, though, in her duties as membership records coordinator, DeShazo has maintained all the records that track a young man's life as an undergraduate member of the Fraternity. When a man is pledged, she enters his name into the Fraternity's official membership records. Then, when he is initiated, she is the one who completes the paper work that officially brings him into the ranks of the Fraternity. Since she began her duties as membership records coordinator in 1980, DeShazo has entered the names of 78,782 pledges. 60,159 men have been initiated into the Fraternity during her watch.

The numbers alone do not measure the impact of DeShazo's years with the Fraternity. These numbers are made up of individual people, and in these people can be found DeShazo's profound impact upon the daily operations of Pi Kappa Alpha.

The First Days

On July 24, 1974, Gwen DeShazo was at home in Memphis, Tennessee, reading the classified advertisements in the local newspaper. An advertisement for an accounts receivable clerk/bookkeeper for a "college oriented establishment" caught her eye. Along with the job description was a phone number and the address, 577 University. DeShazo thought the job might be at Southwestern University (now Rhodes College) or Christian Brothers College, both in the midtown Memphis area. When she dialed the phone number, she found herself talking to the receptionist at Pi Kappa Alpha's Memorial Headquarters (which was located directly across the street from the Southwestern campus from 1954-1988).

DeShazo interviewed with Donna Visconti, who was in charge of all the support staff hiring for the Fraternity. Later, DeShazo received a phone call: Visconti asked her if she could start working for Pi Kappa Alpha the following week.

When DeShazo arrived for her first day of work on Monday, July 29, 1974, Pat Halloran

(*Nebraska-Omaha, Delta Chi '62*) was executive director, and the Headquarters staff was in the midst of preparing for the 1974 National Convention in Vail, Colorado. It was a chaotic time to say the least. "I came to work on Monday the 29th. Three or four days later, everyone left for Vail. I was a brand new employee," DeShazo recalls.

One of the members of the Fraternity's staff in 1974 was former Supreme Council Vice President Larry W. Lunsford (*Tennessee, Zeta '71*), who was a chapter consultant at the time. Twenty years later, Lunsford still has vivid memories of DeShazo's first days on staff. "We were kind of in awe of her," recounts Lunsford, "from day one, Gwen proved she was going to be a dedicated and loyal staff member."

DeShazo came to work with a fierce determination to succeed. She was born with clubbed feet and hands, and, as a result, has a dislocated right hip. She was no stranger to the obstacles which the handicapped face in the workplace. A graduate of the Shrine School and Memphis School of Commerce, DeShazo had worked in a public accountant's office, at Snell's Limbs and Braces, and at Leader Federal Savings & Loan prior to coming to Pi Kappa Alpha. Soon, PiKA's staff found out that her physical condition had no effect on DeShazo's potential for success.

While it was still relatively uncommon for physically challenged individuals to find equal opportunities in employment during the early 1970s, Donna Visconti (Darwin) did not see hiring DeShazo as unusual. It was a simple case of hiring according to merits and qualifications. This was not the first time in DeShazo's job search that her professional manner and abilities prevailed. During the time when the famous former Memphis Mayor Henry Loeb was head of the Mayor's Council on Hiring the Handicapped, DeShazo had contacted the Mayor's council while looking for employment. Mayor Loeb was so impressed with her that he encouraged her to mention his name "whenever you go on an interview."

DeShazo also came to work for Pi Kappa

Alpha with a particular advantage. Her immediate knowledge of fraternal proceedings was a product of DeShazo's involvement with The Order of The Eastern Star, a philanthropic fraternal organization sponsored by the Masonic Fraternity. It is the world's largest organization for both men and women. Within her local chapter, DeShazo has held the position of Worthy Matron, as well as other offices. In the Eastern Star, DeShazo enjoys a far reaching reputation for her proficiency at the Order's ritual, and for her singing. A talented vocalist, DeShazo has been invited to perform at conventions and meetings in Toronto, Seattle, Atlanta and St. Louis.

Building Friendships

DeShazo says that by the late 1970s, she realized that she wanted to stay on as a permanent employee at Pi Kappa Alpha's Memorial Headquarters. During this period she established close friendships on PiKA's staff. Two staff members during this time were Past National President Jerry W. Askew (*North Carolina, Tau '73*) and Dixie Regional President D. Mark Anderson (*Wofford College, Nu '76*). Askew, who is currently vice chancellor for development and faculty member at the University of Tennessee-Knoxville, described DeShazo as a "confidante" and as "one of a core group of individuals that I will always identify with my Fraternity experience."

Askew recalled coming in off the road as a chapter consultant and always getting a hug from DeShazo. Through the years, Askew has entered the doors of the Memorial Headquarters in a wide range of volunteer roles with the Fraternity. As was the case when he was a chapter consultant, DeShazo is still one of the first people he looks for when he returns.

Anderson recalls how important DeShazo's

Larry W. Lunsford

Jerry W. Askew

D. Mark Anderson

support was to him when he had just joined the staff following graduation from Wofford College. "Gwen is the person, more than anybody else, who made Memphis home for me," he said. While DeShazo helped Anderson adjust to his new surroundings, he returned the show of support by encouraging her to accomplish a goal that most people take for granted — obtaining her driver's license.

Prior to that time, DeShazo had relied on her parents and friends to provide transportation. According to Anderson, DeShazo was so independent in so many ways that it was a must for her to obtain her license. Anderson and Executive Director Allen Groves (*Stetson, Delta Upsilon '79*) even volunteered their cars so she could practice driving. In return, DeShazo promised that someday she would get her license and serve as their chauffeur anytime they returned to Memphis after leaving the staff.

While not forgetting her promise, DeShazo realized that she needed even more motivation. So in September 1987, still without a driver's license, she bought a Cutlass Calais. It sat in her driveway as a constant reminder. "I knew that if I had that much money tied up in a piece of machinery, I would eventually get my license."

In December 1987, DeShazo received her driver's license and the Cutlass Calais was finally backed out of the driveway. "I know why 16-year-olds get spastic about it (a driver's license). It opened up a whole new world of freedom, being able to do things on my own," DeShazo said. One of the first people she called was Mark Anderson. To this day, driving a sporty new Chrysler LeBaron convertible, DeShazo honors her promise to Groves and Anderson.

Over the years, DeShazo developed a strong friendship with yet another past staff member who went on to become the Fraternity's national president. Edward A. Pease (*Indiana, Delta Xi '71*) was a member of the Fraternity's staff serving as director of alumni affairs in 1975-76. He served as Pi Kappa Alpha's national president from 1988-1990. Although it has been 18 years since he left staff,

Edward A. Pease

Gwendolyn DeShazo

Pease says one of things he remembers most about DeShazo is her work ethic and how "she got her work done and you better get yours done." But equally important was the personal interest she took in staff members. According to Pease, DeShazo was aware of the difficulty that many staff members faced in adjusting to a new job and a new city. "She was interested in your family and how things were at home," Pease said. He also talked about how undergraduates can always call DeShazo if they need assistance.

This same sentiment is echoed by current National Housing Officer Daniel W. Corah (*Colorado State, Epsilon Theta '83*). Corah joined the Memorial Headquarters staff in 1986 and had an office next to DeShazo for six years. However,

Daniel W. Corah

he first became aware of her when he was a founding member of Epsilon Theta in 1983. "She establishes friendships with the students. She's legendary before you get here (Memorial Headquarters) as a staffer." Once Corah joined the Headquarters staff, he found in DeShazo someone who was interested in "getting to know about you." Due to her daily communication with undergraduates, DeShazo is able to establish a common ground with staff members by talking knowledgeably about their chapters. To Corah, DeShazo's ability to listen is a "gift" because "she always has an ear for you. . . . She's kind of like the well-liked house mom."

DeShazo's genuine concern for staff members is a characteristic mentioned by a number of individuals interviewed for this article. When speaking of DeShazo, many past staff members fondly recalled personal experiences that occurred when they worked for the Fraternity years earlier.

Continued on next page

Louis B. Quinto (*Purdue, Beta Phi '79*), who was on staff from 1982-89, reflected on his days as a chapter consultant and the meaning of DeShazo's friendship, particularly during those times when he was having a difficult visit at a chapter. "I could always call in and talk to Gwen and she'd make me laugh and forget where I was," Quinto said. When he was told that other former staff members were being contacted in regard to DeShazo's 20th anniversary, he made a statement that definitely proved to be true. "You won't find a person to say a negative thing about Gwen DeShazo," he noted.

Louis B. Quinto

Another staff member during the same era was Cumberland Regional President Patrick F. Haynes (*Arkansas State, Delta Theta '81*). He was on the Headquarters staff from 1984-89. DeShazo still recalls when he came to Memphis as an undergraduate to interview for a chapter consultant position. The two have been friends ever since. "Gwen has always been a very special person to past and present PiKA staffers. Her genuine friendliness and accessibility has always made her an immediate 'hit' with new staff members far from home in a new environment," Haynes said.

Patrick F. Haynes

Richard L. Murgatroyd (*Ohio State, Alpha Rho '56*), Pi Kappa Alpha's executive director from 1980-83, marveled at the thought of DeShazo's 20 years with the Fraternity. Murgatroyd is the chapter advisor for Eta Rho Chapter at Northern Kentucky University and still talks with DeShazo from time to time. According to Murgatroyd, DeShazo has yet to lose her enthusiasm for her work, even after two decades. "She is as fresh today as she was 12 years ago...I can't say enough about her," he commented.

Richard L. Murgatroyd

Ask Gwen

Over the course of her 20 years with the Fraternity, Gwen has formed relationships with many of the Fraternity's staff members, but to thousands of PiKA undergraduates, Gwen is the voice that links an undergraduate chapter to the Headquarters in Memphis. A typical day for DeShazo is filled with countless phone calls from Pi Kappa Alpha's 200 chapters and colonies. Undergraduates often open the conversation by saying, "You may not be able to answer this question, but you are the only name I know."

DeShazo fields questions ranging from inquiries about pledge and initiation fees to questions on ordering membership supplies, copies

of the Fraternity's history and initiation certificates. Although she answers a number of tough questions, DeShazo is hard to surprise. "I think after 20 years they've thought them all up," DeShazo said.

However, there have been occasions when an undergraduate has believed he wasn't getting fair treatment, and at times, phone conversations can become fiery. Yet DeShazo has learned to get her point across to the chapters and still present the National Fraternity in a positive light.

This ability earned DeShazo a nickname many years ago when Chapter Consultant Charles R. Barnes (*Florida State, Delta Lambda '65*) overheard a difficult phone conversation. At the time, DeShazo was responsible for monitoring chapter's General Fund payments. Barnes happened to walk by DeShazo's office as she was calling a chapter to find out why they hadn't paid their bill to the National Fraternity. Barnes leaned in DeShazo's office and told her, "I want to start calling you the 'velvet hammer': you hammer the message home, but it feels like velvet." Thus Gwen "The Velvet Hammer" DeShazo was born.

Charles R. Barnes

The *Forum*, Pi Kappa Alpha's monthly undergraduate newsletter, displays a bold line: "Membership Records Questions? Ask Gwen. 901/748-1868". Every undergrad member knows that he can call the Headquarters and make contact with the woman who knows the answers. What DeShazo doesn't know, she will find out. In many cases, DeShazo never gets to meet the countless individuals she talks with on the phone. But she does meet many undergraduates who come to Memphis for the Officers Leadership Academy and the Chapter Presidents Conference.

One such individual was Floyd D. Hollon (*Colorado State, Epsilon Theta '84*). Hollon and DeShazo talked over the phone and corresponded by mail about various activities at Epsilon Theta. DeShazo remembers him scrawling notes and smiley faces on documents that he forwarded. The two finally met face to face at the 1988 National Convention. These first time meetings inevitably begin with the undergraduate introducing himself and then saying "I've talked to you over the phone..."

DeShazo has developed a clear understanding of what it takes to sit at her desk and answer the questions that come on just about any given day in the office.

"You have to be patient. You have to be able to listen, with a very open mind, because we are an international fraternity. On the West Coast they use different Fraternity terms than they do in the east. Initiation certificates are called 'shingles' in one part of the country and something else in another part of the country. You have to play Sherlock Holmes. To give an answer you usually have to ask the caller several questions, so you must be open-minded and patient."

A Constant Presence

After 20 years on the job, Gwen DeShazo has

seen every current staff member go through their own "first day" on the job experiences, with the exception of one individual. Executive Vice President Raymond L. Orians (*Memphis State, Delta Zeta '66*) was the Fraternity's director of housing and had just completed his fourth year on staff when DeShazo joined the Headquarters. He was appointed executive vice president in 1984. DeShazo was not surprised to see Orians move up through the ranks to serve as the Fraternity's chief executive officer. "I felt that in time it was something that would probably happen, and when the time came, I was sure he was the man to do the job. Ray has really done well for the Fraternity and for the staff...Ray lets you run your area within reason, but he always knows what's going on," DeShazo said.

Raymond L. Orians

Having had the opportunity to witness DeShazo's work over the last 20 years, Orians has seen her define the true essence of teamwork. "Gwen has served as an inspiration to her fellow staff members. Her loyalty and dedication to the Fraternity is unmatched. She is a model of the team spirit which exemplifies the Fraternity's staff, and has been a friend and compatriot of past and present staff members who continue to stay in touch with her," Orians said.

When July 29, 1994 rolls around, the Pi Kappa Alpha Memorial Headquarters will have much the same atmosphere it did when DeShazo walked through the doors of the old building at 577 University 20 years earlier. Activity will be hectic as the staff prepares to leave for the 1994 International Convention and preparations will be underway for the upcoming academic year. But there will be some differences. If you plan to go to the Memorial Headquarters to find DeShazo on her 20th anniversary, you'll need to keep walking out the back door and onto the #2 tee of the Tournament Players Club at Southwind.

DeShazo will be volunteering as a gallery marshal during the 1994 Federal Express-St. Jude Golf Classic. Her annual involvement with this world-famous Memphis event has allowed DeShazo to meet such personalities as Vice President Dan Quayle and country singer Vince Gill, among others. Always enthusiastic and gregarious, DeShazo adds panache to her duties of hoisting a "Hush Y'all" sign to encourage the gallery to be quiet.

It is safe to say that the countless members of the Fraternity with whom she has interacted will be in her thoughts as she commemorates 20 years as a staff member of the Pi Kappa Alpha Memorial Headquarters. "I appreciate what the Fraternity has done for me in my life. I think my life is much different than it would have been than if I hadn't come to work here...I appreciate the friendships I've made through the years with people that have been on staff, and the people out there that I've dealt with. I hope that people feel that when they've called here and talked to me that they have been dealt with fairly and in a confident way, and were helped by something I might have done for them." □

Risk Management

A Newcomer to the Fraternity World

by Scott A. Russell

Many alumni returning to their undergraduate chapter for the first time in years for Founders Day this past spring may have been surprised by what they saw and heard. Chapters can no longer buy alcohol with chapter funds. "Little Sister" organizations are prohibited. Uniformed security guards patrol parties. Guest lists regulate who may and may not enter social events. When these alumni ask the young men who now reside in their old chapter house what this is all about, their young brothers will talk of risk management, date rape, incident reports, self-retention funds, designated drivers and on and on. An alumnus might even talk to the chapter risk management chairman, a position that did not exist until recent years.

Welcome to the new fraternity chapter, a safer, more scrutinized place. This new fraternity chapter is the product of one of the most significant movements in fraternity history, the risk management movement.

Risk Management: A Brief History

To an alumnus who has not been closely involved in the past ten years, the college fraternity chapter has changed quite a bit. An alumnus who has been away even five years should be prepared for some surprises. This is because, as universal a concept as it is today, risk management as we know it today is a fairly recent development in the Fraternity.

Risk management's recent climb to preeminence as the topic for discussion is very much the product of some significant society changes that have occurred in recent years. The increasing propensity to sue, the growth of shotgun litigation, the reassessment of the Fraternity as a deep pocket and the increase in the drinking age with the accompanying shift of responsibility away from the individual toward the institution, have added up to create an often threatening environment within which college fraternities must exist. These factors have also prompted some much needed changes in the Greek world.

Risk management's history is brief because the factors that created modern Greek risk management simply did not exist until recent years.

Risk Management in the Undergraduate Chapter

So what does this all mean? What are the concrete manifestations of risk management in the undergraduate chapter?

Risk management in the Fraternity chapter is a combination of preventative medicine as well as preparation to react to an accident should one occur. The stress in Pi Kappa Alpha's programming is preventative, though a good deal of attention has been given to helping chapter leaders learn how to react to and control a crisis situation.

Pi Kappa Alpha's approach to risk management is the product of many minds approaching the issue from many different directions. In its earliest stages, Pi Kappa Alpha's approach to risk management rested to a great extent on the shoulders of our brothers with legal educations.

Risk management seminars and articles were written from a legal perspective focused at reducing exposure to liability. The participants in risk management programs ten years were often placed on the witness stand. This approach eventually led to the very successful program "Pi Kappa Alpha On Trial." In this program, which is still being used today, an alumnus serves in the role of prosecutor. The audience, typically young brothers attending an educational program, listen to his case and then provide a defense. This type of program prompts serious considerations of the Fraternity's role in past risk management problems and the important role played by undergraduate members in addressing those concerns.

As Pi Kappa Alpha's approach to risk management develops, the focus is moving from a strictly legal interpretation of liability to encompass a common-sense approach to creating a safe, responsible environment in Pi Kappa Alpha's chapters. This approach rests in the belief that one need not be a lawyer to be a responsible individual. To be a responsible, reasonable individual, one needs to consider the possible consequences of his actions. To accomplish this end, current risk management seminars and practices focus on establishing general parameters of behavior and engaging in activities that encourage brothers to consider the possible consequences of their actions.

Among the documents establishing general parameters of behavior, one of the most important items is known as the *Standards for Retention of Membership, Officer Status and Chapter Charter in Good Standing*. This document, which is printed in its entirety in this article, is the product of a Supreme Council mandate or Memorial Headquarters directive. It states the expectations of members of the Fraternity and is the product of a lot of hard work on the part of undergraduates and alumni. The *Standards* were created and adopted by delegates representing Pi Kappa Alpha's chapters, alumni and national officers, and provides critical parameters within which Pi Kappa Alpha's chapters and members are expected to operate.

Each section of the *Standards* touches upon an area that has proven to be an issue of concern to those involved with Greek organizations. As the document indicates, its sweep covers issues affecting personal wellness and gender relations as well as the physical safety of the chapter houses in which many of Pi Kappa Alpha's chapters exist.

Another important statement related to risk management is the Fraternity's statement on female auxiliary groups, otherwise known as little sister groups. These groups were prohibited by the Supreme Council of the Fraternity in the spring of 1989. This decision came after extensive discussion over a long period of time. There were two significant motivations for this very difficult decision. First, prior to their dissolution, more than half of the litigation facing the Fraternity and its chapters involved these groups. Removing these groups from our chapters greatly decreased the exposure our young brothers experienced. And if you ask any brother today he will probably verify the fact that it has not significantly impacted his social life for the worse. Another impetus for this decision was a lawsuit filed by a little sister of another fraternity in which the plaintiff sued

Continued on next page

for and won the right to live in the chapter house and participate in fraternity activities on the basis that she was already a member. The threat posed by these organizations was very real and the decision of the Supreme Council, though difficult, was clearly the right decision.

To support chapters in their risk management efforts, the Fraternity engages in a number of educational activities. The principal sources for support of these programs in the Risk Awareness Foundation and the Pi Kappa Alpha Educational Foundation. These two organizations provide financial support for regional leadership conferences which include risk management sessions. Both foundations also provide support for the biennial convention and Officers Leadership Academy as well as the annual Chapter Presidents Conference. Risk management figures in largely at these educational conclaves.

In addition to its financial support of educational programs, the Risk Awareness Foundation publishes a risk management manual and produces educational videos dealing with areas such as general risk management and gender relations issues. Also, the Risk Awareness Foundation coordinates the general liability insurance program of the Fraternity and pro-

vides advisory and financial assistance to chapters that are involved in risk management related situations in spite of adherence to Pi Kappa Alpha's *Standards* statement.

What's the bottom line?

What is the bottom line of all this talk about risk management? The bottom line is that Pi Kappa Alpha's membership has responded to the call for improved risk management and is passing through a treacherous time through responsible actions. Pi Kappa Alpha's chapter houses are safer places than they were and its members are better educated in areas such as risk management and personal wellness. Through the educational efforts of the Fraternity, Pi Kappa Alpha's members have a better idea of the potential impact of certain types of behavior and are better able to make the kinds of decisions that will allow the Fraternity and them to prosper. □

STANDARDS FOR RETENTION OF MEMBERSHIP, OFFICER STATUS AND CHAPTER CHARTER IN GOOD STANDING

Each and every member, officer and chapter of the Pi Kappa Alpha Fraternity shall comply with certain standards to maintain his membership in good standing with the Fraternity, his position as an officer of the chapter, and/or to maintain its charter as a chapter of the Fraternity. These standards are as follows:

ALCOHOL AND DRUGS

1. The possession, use and/or consumption of ALCOHOLIC BEVERAGES, while on chapter premises, during an official fraternity event, or in any situation sponsored or endorsed by the chapter, must be in compliance with any and all applicable laws of the state, county, city and university.
2. OPEN PARTIES, meaning those activities where alcohol is served which have unrestricted access by non-members of the Fraternity, without specific invitation, shall be prohibited.
3. No member shall permit, tolerate, encourage or participate in "drinking games" at a Fraternity sponsored event.
4. The possession, sale and/or use of any ILLEGAL DRUGS or CONTROLLED SUBSTANCES at any chapter house, sponsored event, or at any event that an observer would associate with the Fraternity, is strictly prohibited.
5. No alcoholic beverages may be purchased through the chapter treasury nor may the purchase of same for the members or guests be undertaken or coordinated by any member in the name of or on behalf of the chapter.
6. All chapters will implement and adhere to non-alcoholic formal rush programs.

HAZING

No member or chapter shall conduct hazing activities. Hazing is defined as:

- Any form of physical abuse;
- Any activity that might reasonably be expected to bring embarrassment or psychological harm to the individual;
- Any activity that might reasonably be expected to bring physical harm to the individual;

- Any activity that might reasonably be expected to degrade or otherwise compromise the dignity of the individual;
- Any activity that might reasonably be expected to require an unreasonable or inordinate amount of the individual's time, or in any manner impair the individual's academic efforts;
- Any activity that might reasonably be expected to make the individual an object of amusement or ridicule;
- The required consumption of any liquid, gas or solid matter;
- Any requirement which compels an individual to participate in any activity which is illegal or contrary to the individual's genuine moral and/or religious beliefs, or contrary to the rules and regulations of the educational institution.

SEXUAL ABUSE

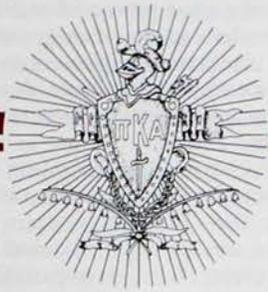

No member or chapter shall participate in any form of sexually abusive behavior, whether physical, mental or emotional. This includes any actions which are demeaning to women, including but not limited to date rape, gang rape, verbal harassment, or publications which diminish the integrity of women.

FIRE, HEALTH AND SAFETY

1. All chapter houses should, prior to, during, and following occupancy, meet all local fire and health codes and standards.
2. All chapters should have posted by common phones emergency numbers for fire, police, and ambulance and must have posted evacuation routes on the back of the door of each sleeping room.
3. All chapters and housing corporations should comply with reasonable engineering recommendations, which are financially feasible to the chapter and housing corporation, as reported by the insurance company.

EDUCATION

Annually, each chapter shall educate every member and pledge in proper risk management practices with the purpose of providing a deeper awareness which will help identify and prevent incidents related to hazing; sexual abuse; alcohol and drug usage; and fire, health and safety. Furthermore, each chapter should have a written risk management program specific to its local needs. This program should be maintained and revised on an annual basis.

Pi Kappa Alpha Educational Foundation

Alumni supporting scholastic achievement, leadership training and personal development since 1948.

Foundation Honors Distinguished Alumni

Eleven outstanding alumni are selected for the Foundation's Order of West Range in 1994

The Pi Kappa Alpha Educational Foundation began recognizing the Fraternity's most exceptional alumni with the Order of West Range in 1986. Since then, 72 Pikes, representing all three branches of government, entertainment, sports, journalism and many other fields, have been inducted into this special Order.

This year the Educational Foundation has selected five living and six deceased brothers to join this accomplished group of men. Each man has distinguished himself by excelling in his profession, in service to the community and/or in service to the Fraternity.

Portraits and more extensive biographies of these men and the other members of the Order of West Range are displayed at the Pi Kappa Alpha Memorial Headquarters in Memphis.

R. Don Cash

Epsilon Gamma 1962

"Don Cash...through your commitment to family, your professional career and volunteerism, you make a difference in the lives of many."

— Texas Tech University

R. Don Cash

Since 1985, R. Don Cash has served as chairman, president and chief executive officer of Questar Corporation, a fully integrated natural gas business, headquartered in Salt Lake City, Utah. Questar has over \$1.4 billion in assets equally distributed in three areas: oil and gas exploration, production and marketing, interstate gas transmis-

sion and retail gas distribution. In 1993, for the fifth consecutive year, the corporation enjoyed double-digit growth at 14%. Profits rose to \$84.5 million.

Born in Shamrock, Texas on June 27, 1942, Cash grew up in nearby McLean in the Texas panhandle. He said, "We were rural folk, mostly farmers and ranchers with a small oil and gas industry on the fringe of our town. All three industries were represented in my family. So I grew up riding horses, picking cotton and rubbing shoulders with people in the oil fields."

Cash's appreciation for a strong teamwork ethic began on the high school football field. "For most Texans, football is like a second religion," Don said, "When you were a player, everyone had an opinion of your ability — just as they do when you are president and chairman of the board. Sometimes it was like having 300 or 400 coaches to please. Today, I have to please 11 directors, 11,000 shareholders, 2,800 employees and many customers." He also played basketball and ran track and often participated in the local rodeo.

"My mother never could understand why I would pay money to ride on a bucking horse," he said, "I sometimes wonder myself now that I'm older..."

Cash went on to receive his bachelor's degree in industrial engineering from Texas Tech University, where he earned the nickname, "Country," met his future wife, Kay Burleson, and was initiated into Pi Kappa Alpha by Epsilon Gamma Chapter in 1962. He served the chapter as treasurer and pledge educator.

On marriage, his father advised him to wait until he had professionally established himself and could afford to support a family. But sometimes a father's wisdom cannot penetrate the skin of a young man in love. "So in 1966, 20 days after I graduated and twelve hours after Kay gave up a beauty queen title, we tied the knot," he said, "I am now trying to give my son some of that same advice."

Suggestions for Successful Living

David H. Dyson (Upsilon '72)

Brother Cash began working with Amoco Production Company as an engineer in 1966. Four years later, he was promoted to supervisor of Amoco's engineering in Oklahoma, where he found himself in charge of men with three decades of experience. After seven relocations with Amoco in eleven years, Cash and his family found themselves in Denver, where Cash was introduced to Mountain Fuel Supply Company, based in Salt Lake City, Utah. In 1976, he joined Mountain Fuel as vice president of exploration and drilling, an area of operations the company longed to strengthen. "My career with Amoco... gave me a good foundation for what I do now," he said, "but I was ready to stop moving, and Salt Lake City looked like a good place to live and work." This region of the country is perfect for a man who enjoys fishing, boating, hunting and skiing as much as Cash does.

In 1979, he became president of Wexpro Company, a subsidiary solely owned by Mountain Fuel Supply. He was promoted to president and chief operating officer of Mountain Fuel Supply Company in November 1980, and on March 1, 1982, he was named president and chief executive officer.

On October 2, 1984, the Corporation's board approved a major reorganization which established Questar Corporation, a new holding corporation, and they appointed Cash to serve as its president and chief executive officer. Then on May 14, 1985, he was also named chairman of Questar, where he currently resides.

Cash is a director of Questar and all its subsidiaries, Zions Bancorporation, Zions First National Bank, the American Gas Association, the Independent Petroleum Association of America, the Utah Symphony and the Alta Club. He was appointed by the Secretary of Energy to serve on the National Petroleum Council. He is chairman of the Institute of Gas Technology and the Salt Lake Bid Committee for the Olympic Winter Games, and is a director and past president of the Rocky Mountain Oil & Gas Association.

Don's past directorships include the Salt Lake Area Chamber of Commerce (chairman), the Utah Manufacturers Association (chairman), the American Petroleum Institute and the Gas Research Institute. He is a member of the Courts Complex Committee of the Downtown Alliance and several associations, including the Society of Petroleum Engineers, the Texas Tech University Academy of Industrial Engineers, the Utah National Guard Honorary Colonels Corps and the Salt Lake City Police Honorary Colonels.

Recipient of Texas Tech University's 1993 Distinguished Alumnus Award, Brother Cash is a regular donor to the Pi Kappa Alpha Educational Foundation. He and his wife, Kay, have one son, Clay, and they live in Salt Lake City.

Edward N. Cole

Zeta Alpha 1964

"Talent, leadership and service earned Edward Cole a place among the great names in the automotive industry."

— Henry Ford, II

Edward N. Cole

Edward N. Cole was known by his peers as one of the most innovative engineers and top executives in the American car industry. Prior to his tragic death in a plane crash in 1977, he was the last of a vanishing breed of automotive product engineers who quickly rose through the ranks because of his ability to turn ideas into products as a shrewd salesman.

Cole was elected president and chief operating officer of General Motors and appointed chairman of the corporation's administration committee on October 30, 1967. He then became chairman of the executive committee, the second most powerful position in the corporation, on January 1, 1972 and served in that capacity until he reached the mandatory retirement age of 65 in 1974.

Born in Marne, Michigan on September 17, 1909, Cole's childhood ambition was to become a lawyer. While attending nearby Grand Rapids Junior College, his interests turned to mechanics after a summer job at a local automobile supply company.

Sponsored by GM's Cadillac Motor Car Division in 1930, Cole enrolled at General Motors Institute in Flint, Michigan, where he was later initiated into Pi Kappa Alpha as a special dispensation initiate of Zeta Alpha Chapter in 1964. GM was so impressed with Cole's talents that Cadillac assigned him to a special engineering project before he graduated.

During his 44 year career with GM, he advanced swiftly, first through the Cadillac division, reaching the position of works manager in 1949. Then, on the eve of the Korean conflict, Cole took over a crucial division project, building the Walker Bulldog tank. In ten short months, he found a suitable plant in Cleveland, hired 7,000 workers, redesigned the tank and got it into production.

In 1952, Cole was promoted to the position of chief engineer of Chevrolet where he was charged with quickly developing a V-8 engine to compete with Ford's. Cole immediately scrapped the Chevrolet division's V-8 plans which were already prepared because he believed the engine would be too heavy and too expensive. In short order, he redesigned the V-8 which became the staple engine at Chevrolet during the 1950s and early 1960s.

Cole was again promoted in 1956 to serve as Chevrolet's general manager and General Motors vice president. He went on to become group vice president in charge of car and truck divisions and director of General Motors in November 1961.

Best known for his major role in developing and promoting the automotive safety air bag system, the Chevrolet Corvair, the anti-pollution catalytic converter and the rotary Wankel engine, Cole was responsible for many inventions, 18 of which were patented. His air-cooled, rear-engine Corvair received the most attention in 1965 when a young, then-unknown consumer advocate Ralph Nader published his book about the Corvair, *Unsafe at Any Speed*, which contributed to the demise of this popular six year old model. One month after retiring from GM in 1974, Cole did what no other automotive executive would dare to do — he publicly debated Ralph Nader about the safety of the Corvair and other automotive engineering matters. Members of the audience were surprised about Cole's ability to effectively match wits with Nader, a highly talented debater.

After leaving GM, Cole did not rest for a moment. He quickly founded and headed International Husky, Inc., a company which was working with the Boeing Company and government officials to manufacture a fleet of huge freight aircraft. The proposed aircraft, dubbed the 754, was to be three times larger than the Boeing 747 and capable of transporting 75 full-sized cars or 16 twenty foot long containers, each with a 25,000 pound capacity.

The emergency military use of this proposed freighter was particularly impressive as it could cut the loading and unloading time from several hours to about 25 minutes. A prototype had not been built when he died.

Cole was also involved with projects to build a hydrazine plant in Kuwait to capture and use this natural gas which was quickly being wasted in this oil-rich country and to reactivate dormant oil wells using powerful explosives.

In March 1976, Cole and seven other investors bought controlling interest in Checker Motors Corporation, which primarily built taxi cabs. Cole became chairman and chief executive officer of Checker. He pursued plans to redesign the Checker cab to be smaller, lighter and more fuel efficient and to expand sales to the general public.

Cole's friends in the automotive industry were shocked to hear of his untimely death in a plane crash in route to Checker Motors in Kalamazoo, Michigan. Henry Ford, II, chairman of the Ford Motor Co. said, "He had few equals in his chosen field of engineering and production, but he will be remembered just as much for his personal dedication to making the Michigan community a better place to live and work."

Active in community affairs, Cole served as president of the Detroit United Foundation and the Detroit Area Council of the Boy Scouts of America and trustee of the Michigan Heart Association, the Young Men's Christian Association and the American Red Cross. He

was also a member of the mayor's committee for economic growth and the executive committee for Recordings for the Blind, Inc.

Pi Kappa Alpha's 1972 Distinguished Achievement Award recipient, Brother Cole is a member of the Educational Foundation's Shield & Diamond Society, which recognizes donors who have contributed between \$1,000 and \$2,499. Cole and his first wife, Esther, had one son, David, and one daughter, Martha LeFever. He had one son, Edward N. Jr., with his second wife, Dollie.

Dr. Stephen R. Covey

Alpha Tau 1950

"Dr. Covey's work has saved Saturn literally millions of dollars. It's made the difference between high performance and mediocrity."

— Mike Bennett, Saturn union leader

Dr. Stephen R. Covey

A noted author and speaker, Stephen R. Covey is founder and chairman of Covey Leadership Center, a more than 700-member international company with a mission "to empower people and organizations to significantly increase their performance capability in order to achieve worthwhile purposes through understanding and living principle-centered leadership." Covey also created The Institute for Principle-Centered Family Living, a non-profit research and development organization aimed at revamping education and enhancing the quality of life in the American family and local communities.

Covey earned his bachelor's degree from the University of Utah, where he was initiated into Pi Kappa Alpha by Alpha Tau Chapter in 1950. He went on to receive his MBA from Harvard and his doctorate from Brigham Young University, where he was a professor of organizational behavior and business management for 25 years.

During the last two decades, Dr. Covey has consulted more than half of the nation's Fortune 500 companies and hundreds of mid-size and smaller companies, government officials and leaders in education. In many ways he has revolutionized the personal and corporate planning and leadership industry. *USA Today* reported that "Covey is the hottest self-improvement consultant to hit U.S. business since Dale Carnegie." Thousands of organizations have adopted Covey's principle-centered leadership methods to improve the quality of their products or "customer-focused" services by empowering employees and volunteers to be innovative and to trust one another. Covey says, "People are used to hierarchy and totalitarian

control and being told what to do. Now they need a new set of skills. We have to teach trust, communication, team-work and (create a workplace) where differences aren't just respected or tolerated, but celebrated." He teaches the belief that, "Every person must start within their own circle of influence," and urges his readers and listeners to "(live by) your own principles, your sense of vision of what your life is about." He says, "If there is any constant today, it is change. So the key to responding to all these changes... lies in three areas: be adaptable, engage in constant education and professional development, and focus on developing and nurturing relationships that are transformational in nature, not just transactional."

Every month, 150 chief executive officers and other top corporate executives attend the Covey Leadership Center's \$3,500, one week leadership training seminar in Sundance, Utah. The Center is one of Covey's many lucrative ventures which produces over \$50 million in annual revenue.

An author of six books and articles on leadership, personal and organizational effectiveness and interpersonal relationships, Covey is probably most widely known for his #1 *New York Times* bestseller book, *The Seven Habits of Highly Effective People*, over 5 million copies of which have sold worldwide. The book has been published in 24 languages. Conoco's director of personnel development said, "*Seven Habits* has had more impact at Conoco than any other book." President Clinton said it is one of three books that should be read by every American worker "to dramatically boost the nation's productivity."

Covey has also written *Principle-Centered Leadership* and his latest bestseller, *First Things First*. Larry King said, "Covey has reached the apex with this publication [*First Things First*]. This is an important work. I can't think of anyone who wouldn't be helped by reading it." For 10 years, he has published his monthly leadership advisory magazine, *Executive Excellence*.

An immensely effective speaker, Dr. Covey is frequently asked to conduct inspirational management workshops. Covey is in great demand for speaking engagements often with a price tag as high as \$25,000. His good friend and scholar, Truman Madsen, said, "He has a gift for identifying with an audience. He watches their faces, reads their responses and knows at what level to hit them. And when he delivers, they go away singing."

In 1994, he has already been heard by 70 million people on Radio Free Europe and 30 million on Voice of America, and he has reached 10 million on the Notre Dame Cable Channel. At his current pace, he will make about 100 personal appearances and be involved with 47 programs sponsored by the chamber of commerce and universities across America this year. Dr. Covey has recently appeared on *Larry King Live* and Robert Schuler's program. Writer of a weekly *USA Today* column, Covey has recently been featured in periodicals, in-

cluding *Fortune*, *Success*, *Business Week*, *The Wall Street Journal*, and many others.

When asked about his leadership center, Covey said, "The goal in all this is not simply to make money. We're teaching people to fish the stream for themselves." This ancient philosophy can also be found in the subtitle of *Principle-Centered Leadership*, "Give a man a fish and you feed him for a day; teach him how to fish and you feed him for a lifetime."

Brother Covey has earned tremendous respect in international business and education. His recent honors include the first Thomas More College Medallion for continued service to humanity in 1990, the Utah Symphony's 50th Anniversary Award for outstanding national and international contribution in 1990, the International Management Council's Wilbur M. McFeely Award for significant contributions to management and education in 1991 and the International Entrepreneur of the Year Award from the BYU Marriott School of Management in 1994.

Covey's friends and colleagues all know his greatest interest is his family. He and his wife, Sandra, have nine children and live in Provo, Utah. Sandra says, "As a father, he gets involved with each child's personal mission. He and the kids have developed an appreciation of the arts, and that's given broader meaning to their lives." Covey enjoys being a prankster from time to time. Sandra says, "He doesn't have a lot of formality or pretense. He's very natural and authentic. He could be in an intellectual conversation with someone and end up in an arm wrestle on the table. He's not too worried about what people might think."

Everett M. Dirksen

Delta Sigma 1960

"Everett McKinley Dirksen was one of a kind — and a remarkable, likeable man. To politics and government he brought a dedication matched by few and a style and eloquence matched by no political leader in our time..."

— President Richard M. Nixon

Everett M. Dirksen

Born on January 4, 1896, in Pekin, Illinois, the son of a German immigrant, Dirksen was given the middle name of U.S. President McKinley, and seemed destined to enter the

Continued on next page

world of politics. He attended the University of Minnesota Law School and served overseas for seventeen months in the U.S. Army during World War II, rising to the rank of 2nd lieutenant. When he returned to civilian life, he manufactured electric washing machines, worked as a dredging and draining contractor and produced and acted in a couple of local theatrical productions, before entering politics. He married Louella Carver in 1927.

Dirksen's public service career began in 1926 when he was elected commissioner of finance in Pekin. Four years later, he was defeated in the Congressional primaries. The next morning Dirksen said he ran into the political editor of the *The Peoria Star* who said to him, "What are you doing out on the street this morning?" Dirksen replied, "Why, I'm running for office." The editor said, "What? You just got licked yesterday!" Dirksen's retort was, "Oh well, that was just a trial heat." In 1932, his second Congressional race was successful as he, a Republican, was elected to fill a seat in the U.S. House of Representatives, even though Franklin D. Roosevelt won a landslide in his district. Dirksen served eight consecutive terms.

After suffering from chorioretinitis, inflammation of the retina, in his right eye, nearly losing his sight altogether, he was forced to relinquish his Congressional seat to receive extensive treatments and rest as his doctors prescribed. He took a well-deserved two year sabbatical from politics and returned in 1950 as a candidate for the U.S. Senate, defeating the Senate minority leader Scott W. Lucas. Senator Dirksen served his constituents from Illinois and the American people with utmost care and integrity as Senate Republican leader until his death on September 7, 1969.

Brother Dirksen gained national prominence in 1952 when he was fighting for the nomination of Robert A. Taft at the televised Republican presidential convention, directing his comments to Thomas Dewey, Dwight D. Eisenhower's floor leader, in his familiar dramatic style, "We followed you in before and you took us down the path to defeat."

He based all of his hard work on Lincoln-like principles of government. In a 1965 interview, he said, "We must go back to first principles, and you can go no further back, nor do better, than to go back to the Republican patron saint, Abraham Lincoln. Remember what he spelled out as the object of government. 'The legitimate object of government is to do for people what needs to be done which they cannot do so well in their separate or individual capacities.'" Senator Howard H. Baker, Jr. [R. Tennessee], Dirksen's son-in-law, said Lincoln and Dirksen both "understood with singular clarity that a great and diverse people do not speak with a single voice and that adherence to rigid ideology leaves little room for compromise and response to change."

When questioned about the Republican Party's minority status, he said, "What is forgotten so often is the actual role of the (Senate) minority. Its role is to serve the country, and you justify the existence of a party when

you objectively and constructively serve the well-being of the country. If you don't do that, I don't know how you can justify asking somebody to vote for you."

Known as the "Wizard of Ooze" for his skill in producing some of the most memorable rhetoric to ever pervade the halls of Congress, some people would argue that Dirksen's burning youthful ambition to be an actor was indeed fulfilled through his many artful speeches, Senate addresses and media interviews. He once said, "The oil can is mightier than the sword."

"When you speak," he exclaimed, "you're striving for an end. It may be persuasion for a vote. Sometimes a flight of Shakespeare fancy helps to nurse it along. Then you move in for the kill."

In 1966, at age 70, he reflected on one of his proudest achievements as the leading proponent of the Civil Rights Act of 1964, saying, "One of the real blessings and one of the most joyful things that can happen to you is when bellboys, waiters and waitresses will come up and shake hands with you because they have been following what is going on." He was also instrumental in the passing of the limited nuclear test ban treaty of 1963.

He was affiliated with many organizations, including the American Legion, the Veterans of Foreign Wars, Masons-Shrine, Elks, Moose, the Illinois Bar Association, the District of Columbia Bar Association and the American Bar Association.

Brother Dirksen was initiated through special dispensation into Pi Kappa Alpha by Delta Sigma Chapter in 1960. Pi Kappa Alpha's 1966 Distinguished Achievement Award recipient, Dirksen served as the honorary chairman of the Fraternity's Centennial Commission. The only Pike ever to be featured on a United States postage stamp, Dirksen and his wife, Louella, lived in Northern Virginia and had one daughter, Danice Joy (Mrs. Howard H. Baker, Jr.).

President Richard M. Nixon eulogized Senator Dirksen at a memorial service in the Capital Rotunda on September 9, 1969, saying, "Through four Presidents and throughout the lives of most Americans living today, Everett Dirksen had a hand in shaping almost every important law that shapes our lives. . . . He put his nation before himself and before his party. . . a politician in the finest sense of the word. Although he never became President, his impact and influence on the nation was greater than most Presidents. . . . He cultivated an appearance that made him seem old-fashioned, but his character was as modern as Saturn 5."

Richard L. Evans

Alpha Tau 1930

"Richard Evans has a great conviction that the things men have in common far exceed their differences. He is at home with all sincere and honest men anywhere he finds himself in the world."

— G. Homer Durham

Richard L. Evans

For 41 years Richard L. Evans was the voice of the "Spoken Word," part of the *Music and the Spoken Word* broadcast, the oldest continuously presented nationwide network broadcast on American radio. Each Sunday the program was broadcast on CBS radio with the Mormon Tabernacle Choir and Organ from Salt Lake City, Utah.

Born in Salt Lake City in 1906, his father died when he was only ten months old. With great faith and love, Evans' mother taught him to be resourceful and to always act with purpose. He attended the University of Utah where he managed the freshman debate team. Between 1926 and 1929, his university education was interrupted during his Church of Jesus Christ of Latter-day Saints mission to Great Britain and Europe, where he studied under Dr. James E. Talmage, a geologist and past president of the University of Utah, and Dr. John A. Widtsoe, a chemist and also past president of the University of Utah. During this time, Evans learned economy of language and extraordinary wisdom from these distinguished scholars. It was here where he further developed his passion for literature and fine language.

At the completion of his mission, Evans returned to the University of Utah, where he was initiated into Pi Kappa Alpha by Alpha Tau Chapter in 1930 and later earned his bachelor's degree in English in 1931 and master's degree in economics in 1932. During the early years of his "Spoken Word," Evans began writing books and articles which were widely published in newspapers and periodicals, including *The Reader's Digest*, *Look* and *Encyclopedia Britannica*. *Faith in the Future*, *The Everlasting Things* and *Thoughts for 100 Days* are among the 11 books he wrote.

Brother Evans' service to The Church of Jesus Christ of Latter-day Saints was exemplary. He was a member of the Young Men's Mutual Improvement Association and the Young Women's MIA boards from 1935 to 1948, a member of the First Council of Seventy from 1938 to 1953, when he became a member of "The Quorum of Twelve," president of the Temple Square Mission, director of the Temple Square Bureau of Information and adviser to the board of the Deseret Sunday School Union. For many years, he worked

closely with Lester F. Hewlett (*Alpha Tau '39*), who had served as president of the Tabernacle Choir.

In addition to his service to the Church, Evans was regent of the University of Utah for 15 years and trustee of Brigham Young University for nearly 14 years. He was also a director of Radio Station KSL, David W. Evans Advertising Agency, Salt Lake Union Stockyards, Western States Title Insurance Company, Bank of Kearns, First Security Corporation, Bountiful State Bank, Bonneville International Corporation, Deseret Management Corporation and Evans and Associates.

Throughout his career of service to community, Brother Evans was deeply entrenched in his work with Rotary. His first exposure to Rotary was in 1919 when he, a 13 year old boy scout, was a messenger boy during Rotary International's World Convention in Salt Lake City. He later recalled the fine impression the Rotarians left with him and his desire to be one of them when he grew up. His aspirations became a rich reality as he eventually served as president of the Salt Lake City Rotary Club and district president, president (1966-1967), trustee (1967-1973) and executive committee member (1971-1972) for Rotary International.

Evans was widely recognized for his contributions to each organization with which he was involved. In 1939, he received the Salt Lake City Junior Chamber of Commerce's Distinguished Achievement Award for outstanding community service. He was Pi Kappa Alpha's 1961 Distinguished Achievement Award recipient at the Fraternity's 1962 summer leadership school in Lexington, Kentucky, where he delivered the keynote speech. Also in 1961, Evans received the Freedom Foundation Award for one of his "Spoken Word" broadcasts.

Richard Evans and his wife, Alice, had four sons, Richard, Jr., John, Stephen and William. Brother Evans died on November 1, 1971. Many people still remember his voice abounding over the airwaves, "May peace be with you, this day — and always," as he concluded each and every Sunday broadcasts.

Luther H. Hodges, Jr.

Tau 1960

"I sincerely hope that the Country raises more Luther and Martha Hodgeses. It's a privilege when . . . you can enlist this splendid kind of public servant."

— Mrs. Lyndon B. Johnson

After 31 years in the textile industry, Luther H. Hodges, Jr. pursued a public service career in government and ultimately became Governor of North Carolina in 1954 and United States Secretary of Commerce in 1961.

Born on a tenant farm in Pittsylvania County, Virginia, in 1898, Hodges was eighth of

Luther H. Hodges, Jr.

In 1915, Hodges enrolled at the University of North Carolina in Chapel Hill, where he financed his own education by waiting tables at the University dining room, firing furnaces, managing a clothes pressing club and working in a textile mill. During the summers, he sold books. UNC was Hodges' first "proving ground." He was a superb student, basketball player, baseball manager, student body president and senior class president, and his peers voted him "the best all-around man on campus." Hodges and his fellow student, Thomas Wolfe, the author of *Look Homeward Angel*, were contemporaries at UNC and attended some of the same classes. Brother Hodges was later initiated into Tau Chapter of Pi Kappa Alpha at the University of North Carolina on August 30, 1960, soon after his son, Roy, served as an officer in the chapter.

After graduating in 1919, Hodges worked for Marshall Field & Company in various production and management capacities. In his early post-graduate years, he became a charter member of the Leaksville, North Carolina, Rotary Club where he served as secretary and president, initiating what turned out to be a lifelong record of service with Rotary International, the largest civic service organization in the world.

Over the years, Hodges served Rotary International as chairman of the 1948 Convention, director (1953-1954; 1966-1967) and president (1967-1968). During his last few years with Marshall Field, he began his involvement with the United States Government as the head of the Office of Price Administration's textile division.

Upon retiring from Marshall Field & Company as vice president in 1950, Hodges became chief of the Economic Cooperation Administration's industry division in West Germany and served there as a consultant until 1951 when he was appointed to serve as a consultant to the U.S. Department of State on International Management Conference. Elected lieutenant governor of North Carolina in 1952, Hodges became governor in 1954 when Gov. William B. Umstead died. He enjoyed a landslide victory for an additional four year term as governor in 1956.

During his six years as governor of North Carolina, Hodges had many notable achievements. He industrialized the state through a self-help economic advancement program, called "Operation Bootstraps," changing the state's tax structure to attract industry. He was instrumental in founding the prominent North

Carolina Research Triangle, a non-profit foundation formed by the University of North Carolina, Duke University and North Carolina State University for technical research and development. Hodges later served as chairman of that foundation. He was known as a leading southern governor in promoting racial harmony at the peak of the civil rights movement. Because of his proven success in this area, the Voice of America asked him to give the international broadcast of "The 1954 Supreme Court Decision — Segregation in the South."

President John F. Kennedy appointed Hodges to serve as U.S. Secretary of Commerce in 1961. At age 63, he was the oldest member of Kennedy's cabinet. When asked about Kennedy, Hodges said, "President Kennedy was a great inspiration to me. He had that spirit of leadership and influence. He made old people think young . . . and picked the brains of all those around him." As secretary of commerce, Hodges encouraged the passage of the Trade Expansion Act of 1962, opening the United States to vast international exporting.

Brother Hodges died on October 6, 1974. He and his wife, Martha, had three children, Betsy, Nancy and Luther, Jr. (*Tau '54*), and nine grandchildren.

William P. McCartney

Alpha Nu 1961

"He's got a great work ethic. He's totally focused and he's got a high level of enthusiasm. It's contagious."

— Bill Marolt, Athletic Director
University of Colorado

William P. McCartney

William P. McCartney recently completed his 12th season as head football coach of the University of Colorado Buffaloes in Boulder, Colorado. He is the University's 20th head coach with a record of 82-54-5, and he led the team to its first ever national championship in 1990.

McCartney has also guided CU to three Big Eight titles and a 42-28-4 conference record, both of which are unprecedented at Colorado.

Born on August 22, 1940, McCartney grew up in Riverview, Michigan. Captain of Riverview High School's football and basketball teams during his senior year, he earned 11 letters in football, basketball and baseball.

He left Michigan to attend the University of Missouri-Columbia on a football scholarship, lettering three times as a center-linebacker and playing in two Orange Bowl games. During his senior season, he was named second team All-Big Eight. A year before graduating with a bachelor's degree

Continued on next page

in education, McCartney was initiated into Pi Kappa Alpha by Alpha Nu Chapter in 1961.

After college, he began his coaching career at Joplin High School in Missouri as an assistant coach from 1963 to 1964. From there he moved back to Michigan to coach the Holy Redeemer High School basketball team in Detroit from 1964 to 1968. In 1969, McCartney was hired as head basketball coach by Divine Child High School in nearby Dearborn, winning the Detroit Catholic League title in his first year. He became Divine Child's head football coach in 1971. Before leaving Divine Child in 1973, McCartney's three football teams compiled an impressive 30-5 record, securing the Detroit Catholic League title for three consecutive years and the state championship in 1971 and 1973. He became the first coach ever to win both the football and basketball state titles in the same year in the Michigan prep ranks.

As his coaching career gained momentum, Brother McCartney joined Bo Schembechler's coaching staff at the University of Michigan as a defensive coach in 1974. He spent three years coaching the team's outside linebackers, and then in 1977 he became the Wolverines' defensive coordinator. During his years in Ann Arbor, McCartney gained a reputation as one of the nation's finest recruiters. His most notable achievement at U of M was receiving the Big Ten's "player" of the week honors in 1980, after his team used six defensive backs and successfully neutralized Purdue quarterback Mark Herrmann and his receivers. He was widely regarded as one of the nation's best defensive coordinators in 1981.

After suffering through three of their worst seasons ever, the University of Colorado, hired McCartney as head football coach in June of 1982. In four short years, Coach McCartney built a winning team which was honored as the NCAA's Most Improved Team in 1985. He achieved this by making the biggest change in CU football history from a predominantly passing offense to a wishbone offense. This monumental shift in strategy brought the team seven victories, the most in as many years, a trip to play the University of Washington in the Freedom bowl, the team's first bowl appearance in nine years, and earned McCartney Big Eight "Coach-of-the-Year" honors.

The team continued to improve and reached a landmark in 1989 when it attained its first #1 national ranking in CU's 100-year football history with an 11-0 regular season record. McCartney was unanimously chosen National Coach-of-the-Year. A loss to Notre Dame in the Orange Bowl ended the team's hopes for a national championship, but its #4 ranking at the end of the season was CU's second best ever.

Hungry for the championship which eluded them, McCartney's Buffaloes managed to reach the pinnacle of college football in 1990, winning the national championship after a breathtaking 10-9 victory over Notre Dame in the Orange Bowl, Colorado's first bowl win in 19 seasons. McCartney was named Coach-of-the-Year for the third time and nine of his players were drafted into the NFL, three of whom earned unanimous All-American honors. Eric Bieniemy won the Butkus Award and finished third in the Heisman

Trophy race and Joe Garten was second in line for the Outland Trophy.

From 1988 to 1992, the Buffaloes went 25 consecutive games without a Big Eight loss, the fourth best streak in conference history. In 1991, Colorado boasted a sixth consecutive Big Eight title and in 1992 they appeared in their seventh bowl game, losing a heartbreaker to Syracuse, 26-22, in the Fiesta Bowl. Last season, McCartney led his team to its sixth consecutive bowl game, beating Fresno State 41-30 in the Aloha Bowl.

Bill McCartney has coached more games (140) and taken his Buffaloes to more bowl games (8) than any other head coach in University of Colorado's history. If his teams continue to win consistently as they have since 1985, it is likely that Coach McCartney will accumulate more wins than any other CU football coach since his contract runs through 2005.

Brother McCartney makes a habit of stopping by the Alpha Nu Chapter house every two years when Colorado plays his alma mater, the University of Missouri. This year the Buffaloes will be traveling to Columbia for Mizzou's Homecoming on October 8, 1994. McCartney is deeply involved with the Fellowship of Christian Athletes. He was FCA's "Man-of-the-Year" in Colorado in 1986. He is the author of the book, *From Ashes to Glory*, published to share his Christian faith which has guided him through some troubling times. Bill and his wife, Lynne, have four children, Michael, Thomas, Kristyn and Marc, and they live in Boulder, Colorado.

C. Lee Talley Beta Kappa 1920

"He had a great breath of vision and complete empathy for his fellow man."

— Mary Helen and Henry Eggers

C. Lee Talley

C. Lee Talley is one of The Coca-Cola Company's most widely remembered and respected top executives. Talley, a Methodist preacher's son, became the first man in Coca-Cola's history to begin as an entry level fountain salesman and later become president and chairman of the board.

Born in Monroeville, Alabama, in 1901, Talley attended Emory University in Atlanta, Georgia, where he was initiated into Pi Kappa Alpha by Beta Kappa Chapter in 1920. It was also at Emory where Talley was first introduced to Coca-Cola as he worked behind a soda fountain on campus. Talley recalled his senior year, "I noticed that people were buying a lot of Coca-Cola. I figured someone had to sell it, so I applied for a job to do just that." The Coca-Cola Company hired Talley to represent them as a fountain field

salesman in St. Paul, Minnesota, and Madison, Wisconsin, immediately after graduation from Emory in 1923.

Accepting the job in this far off region was the first of many challenges Coca-Cola offered Talley. He explained, "I had never been north of the Mason-Dixon Line but once before — that was as a delegate to a Pi Kappa Alpha Fraternity Convention in New York — and St. Paul seemed a long way off. But that didn't stop me. I was given the longest railroad ticket I had ever seen in my life, and off I went."

For four years he worked this almost virgin territory for Coca-Cola, traveling through blizzards on unpaved roads and often being forced to sleep in farmhouses due to inclement weather. He provided soda fountain proprietors and other Coca-Cola dealers with signs and other promotional materials. You might say this was the company's testing ground for Talley who passed with flying colors.

In 1927, he was named Coca-Cola's branch manager in Vancouver, British Columbia. Talley once recalled an associate there saying, "That young red-head was a ball of fire on the job. We felt then that he was going places." But Talley modestly said, "I felt more like a wet match." Then, in 1930, Talley was promoted to manager of Coca-Cola's Canadian Western Region, headquartered in Winnipeg, where he managed the bottling plant and married Marjorie Moxam. Three years later he was made Eastern Region manager where he managed the Montreal plant. Elected vice president of Coca-Cola's Canadian operations in Toronto in 1936, Talley was responsible for advertising, merchandising and public relations.

Transferred to New York City in 1943, Talley became vice president of The Coca-Cola Export Corporation and served in that capacity until 1950 when he moved to Atlanta, taking the job of vice president of the manufacturing division of The Coca-Cola Company. Two years later he was elected president of the Canadian and Cuban Companies, and in 1954 he became president and director of The Coca-Cola Export Corporation. Finally, in 1958 Talley became president and director of The Coca-Cola Company, and 36 months later he was elected chairman of the board. He retired in 1966 but remained chairman until May of 1970.

When Talley began working for the Company in 1923, 6 million bottles of Coke were being sold each day. At his retirement, the rate was 65 million a day and was quickly climbing. Talley once said, "Our market is as big as the world and the people in it."

Commenting on the extraordinary success of Coke as president of The Coca-Cola Company, Talley wrote, "They [Coca-Cola bottlers] have taken this product from its humble beginnings in a kettle on Marietta Street in Atlanta, Georgia, and they have carried it farther and made it penetrate more deeply into the lives of more people, in more languages, in the most remote corners of the world, than any other item or idea save the Christian religion."

Pi Kappa Alpha's 1964 Distinguished Achievement Award recipient, Brother Talley is a member

of the Educational Foundation's Shield & Diamond Society, which recognizes donors who have contributed between \$1,000 and \$2,499. Talley and his wife, Marjorie, had two children, Mary Lee and John Eugene. Talley died on August 28, 1976. Close friends of the Talleys, Mary Helen and Henry Eggers, wrote, "Lee Talley placed his family, his love and devotion to his friends above all other consideration."

Dr. Luther L. Terry

Delta 1928

"He was a genuine hero, a man of extraordinary courage. . . He persevered and. . . revolutionized our thinking about the causes of modern-day diseases."

— Joseph A. Califano, Jr.

Luther L. Terry

After a 23-year career in public health, Dr. Luther L. Terry was appointed by President John F. Kennedy to serve as United States Surgeon General in 1961. It was in this capacity that Terry gained national notoriety with his 1964 report which declared that cigarette smoking is unequivocally harmful to health.

Born in Red Level, Alabama, in 1911, Terry was named after a respected local physician named Luther Leonidas Hill. In 1931, Terry graduated from Birmingham Southern, where he was initiated into Pi Kappa Alpha by Delta Chapter in 1928. He then went on to earn his M.D. from Tulane in 1935.

Brother Terry interned in Birmingham and Cleveland, Ohio, before serving in the Public Health Service during World War II. After teaching at the University of Washington in St. Louis and the University of Texas at Galveston, he joined the faculty at Johns Hopkins University Medical School and was assigned to the Public Health Service Hospital in Baltimore, Maryland, where he remained until 1953 as chief of the medical service. While there, Terry started the first medical residency training program and established a new unit for research and training in cardiovascular disease that became part of the National Heart Institute. During the mid-50s, he was chief of laboratory and general medicine and experimental therapeutics of the National Heart Institute in Bethesda, Maryland, and chairman of the medical board of the Clinical Center for two years, remaining on the board for an additional five years.

In 1958, Brother Terry was appointed assistant director of the National Heart Institute, where he continued clinical research on new drugs in the treatment of hypertension and heart disease. Three years later, President Kennedy appointed

Terry to the high post of surgeon general.

As surgeon general, Terry's 387-page report on the harmful effects of cigarette smoking probably had "the greatest impact of any government report ever issued," he claimed. After 15 months of deliberation, Terry, with the aid of his advisory committee on smoking and health, concluded that cigarette smoking causes lung cancer and increases the risk of heart disease, arteriosclerosis, emphysema and chronic bronchitis.

Twenty years later, he reflected on this monumental report in a *Washington Post* interview, stating, "The immediate impact was really quite bombastic. It really shook things up for the first time, even though the evidence had been accumulating for quite a few years." The "Terry report," was only just the beginning of a movement to educate the general public about the effects of smoking. Terry summed up the significance of this report in saying, "Today we are on the threshold of a new era, a time of action, a time for public and private agencies, community groups and individual citizens to work together to bring this hydra-headed monster under control."

Prior to stepping down as surgeon general in 1965, Terry convinced Congress to require tobacco companies to include the following message, "The surgeon general has determined that cigarette smoking is dangerous to your health," on every pack of cigarettes produced. He served as vice president for medical affairs at the University of Pennsylvania until 1971, the year he was instrumental in banning cigarette advertising on television and radio. While teaching at the university until 1982, he served as president of University Associates of Washington. From 1980 to 1983, he worked as vice president for medical affairs of ARA Services, Inc. in Philadelphia. In his remaining years, he often lectured employers to protect their non-smoking employees from cigarette smoke exposure.

Governor of the American College of Physicians and diplomat of the American Board of Internal Medicine, Terry was a member of the American Medical Association, the American Heart Association, the American Public Health Association, the American Hospital Association, the National Board of Medical Examiners, the advisory boards of Leonard Wood Memorial, the American Social Health Association, the Institute of Nutrition Sciences of Columbia University, the Harvard University School of Public Health, Johns Hopkins University School of Hygiene and Public Health, The American Museum of Health of the New York Academy of Medicine and the Cleveland Health Museum. He was also a member of the National Council of Boy Scouts.

Terry died on March 29, 1985, of heart failure at age 73. Recipient of 17 honorary degrees and Pi Kappa Alpha's 1962 Distinguished Achievement Award, Brother Terry and his wife, Janet, had two sons, Luther, Jr. and Michael, and one daughter, Jan Kollock. Terry was a consistent donor to the Educational Foundation.

Dr. William P. Tolley

Alpha Chi 1919

"For more than four decades William Pearson Tolley was known as one of the most influential leaders in all of higher education. . . he provided inspiration for generations of young people and their faculty."

— Kenneth A. Shaw, Chancellor
Syracuse University

William P. Tolley

After 27 years as president of Syracuse University, Dr. William P. Tolley has served as president emeritus since 1969. Throughout his lifetime, he has promoted academic freedom and the importance of liberal education. Speaking to the university's trustees in 1953, Tolley said, "We

too often forget that even in a world of relative freedoms, freedom of mind is an absolute. Either the mind is free or it is not. It is the peculiar function of universities to preserve freedom of inquiry. It is a calculated risk of universities to permit intellectual error. The fundamental creed of universities is that in unfettered intellectual inquiry and the free competition of ideas, we discover new knowledge and advance the cause of truth."

Tolley was born in Honesdale, Pennsylvania, on September 13, 1900, the grandson of two Methodist ministers and son of parents deeply involved with the Centenary Methodist Church of Binghamton, New York. His father served as trustee and president on the board of the church for over 20 years, and his mother was a church leader and soloist. His brothers, Rev. Harold S. Tolley (*Alpha Chi '13*) and Rev. Earl V. Tolley (*Alpha Chi '18*), and his nephew, Harold S. Tolley, Jr. (*Alpha Chi '47*), were all initiated into Pi Kappa Alpha at Syracuse University.

Following in his brothers' footsteps, Tolley was initiated into Pi Kappa Alpha on March 1, 1919, by Alpha Chi Chapter at Syracuse, where he was yearbook editor, chief debater on the debate team, president of the Boar's Head Dramatic Society, saxophone player in a musical group called "The Synful Syncopators" and a member of seven honoraries, including Phi Beta Kappa and Omicron Delta Kappa. Keeping the family tradition alive, Tolley served Alpha Chi Chapter as SMC as his two other brothers had done before him. He graduated magna cum laude in 1922 and later earned masters degrees from Syracuse in 1924 and Columbia University in 1927, a bachelor of divinity degree from Drew Theological Seminary in 1925 and a doctor of philosophy degree from Columbia in 1930.

Brother Tolley married the late Ruth Canfield, a fellow Class of 1922 University of Syracuse graduate, on July 3, 1925, and they had three children, Nelda, William, Jr. and Katryn.

Continued on next page

An ordained minister and teacher of theology at the Drew Theological Seminary, Tolley became dean of the Seminary's Brothers College in 1929 and was also a professor of philosophy there until 1931. At age 30 he was appointed president of Allegheny College in Meadville, Pennsylvania, becoming the youngest ever college president. He relinquished this position in 1942 to become the seventh chancellor and president of his alma mater, Syracuse University, where he resided for an unprecedented 27 years. He has served the University as president emeritus since 1969.

During Dr. Tolley's years as president, Syracuse University's gross assets grew from \$15 million to over \$150 million and the endowment multiplied from \$4.7 million to over \$30 million. More than \$50 million dollars was used to construct new buildings, increasing the University's physical plant assets five-fold.

Throughout his tenure at Syracuse, Tolley served as a director of New York Telephone Company, First Trust & Deposit Company, Security Mutual Life Insurance Company, Mohawk Airlines, Inc., Excelsior Insurance Company of New York and Colgate Palmolive.

Dr. Tolley's contributions to education have afforded him many great opportunities and honors. He has received honorary doctoral degrees from more than 30 American colleges and universities. He agreed to serve countless educational associations and advisory committees in many capacities, including president and director of the Association of American Colleges from 1942 to 1943, president of the College Presidents Association of Pennsylvania in 1942 and chairman of the executive committee of the American Council of Education from

1940 to 1946. Brother Tolley was also vice chairman of the Japan International Christian University Foundation, Inc.

He is the author of two books, *The Idea of God in the Philosophy of St. Augustine* and *The Alumni Record of Drew Theological Seminary, 1867-1925*, and editor of two others, *Preface to Philosophy: Textbook* and *Preface to Philosophy: Book of Readings*.

Aside from his academic involvement, Tolley has been a member of the Newcomen Society of England, Rotary International, the Cosmos Club of Washington, the Iron City Fishing Club of Pittsburgh, the Century and University Clubs of Syracuse and the Century Association of New York City. Brother Tolley was a trustee of the Pi Kappa Alpha Memorial Foundation (now called the Pi Kappa Alpha Educational Foundation) from 1970 to 1976, serving as president from 1974 to 1976.

As Pi Kappa Alpha's 1969 Distinguished Achievement Award recipient, Tolley joined his college roommate and close friend, the late Lynn "Pappy" Waldorf (*Alpha Chi '21*), who was Pi Kappa Alpha's 1936 Distinguished Achievement Award recipient and a posthumous recipient of the Order of West Range. Tolley is a member of the Educational Foundation's Shield & Diamond Society, which recognizes donors who have contributed between \$1,000 and \$2,499. He lives in Syracuse, New York.

Edgar S. Woolard, Jr.

Alpha Epsilon 1954

"DuPont has always been a flagship of the world chemical industry, and the fellow at its wheel has had a special status. Ed Woolard does the job as well as it's ever been done and many of us appreciate and benefit from it.

*— Frank Popoff
Chairman and Chief Executive Officer
The Dow Chemical Company*

Edgar S. Woolard, Jr.

among the most profitable.

Born on April 14, 1934, in the small town of Washington, North Carolina, Woolard attended North Carolina State University, where he was initiated into Pi Kappa Alpha by Alpha Epsilon Chapter in 1954. After graduating in 1956 with a bachelor's degree in industrial engineering, Woolard married his seventh-grade sweetheart, Peggy Harrell.

After serving in the United States Army to the rank of lieutenant in 1957, Brother Woolard began his career with Du Pont as an industrial

engineer at the Kingston, North Carolina, plant and has remained with the corporation ever since. For the next 21 years, he quickly rose through the corporation's ranks from engineer to plant manager to marketing director to division director in the Carolinas, Tennessee and Delaware.

In 1978, Woolard was promoted to general manager of Du Pont's textile fibers business, where he was credited with improving its performance by cutting the work force by 35% and closing marginal operations. Three years later, he became vice president of textile fibers.

On January 1, 1983, Woolard was elected Du Pont's executive vice president and was appointed to serve on the board of directors. He was elected vice chairman 24 months later and served in that capacity until he was elected president and chief operating officer in 1987. After 31 years and 19 promotions with Du Pont, Woolard was elected chairman and chief executive officer on April 26, 1989, and on November 1, 1990, an office of chairman was established, where Woolard presides today.

As Du Pont's top executive, Woolard has been credited with streamlining the corporate structure, making the corporation even more competitive in chemical and energy production. Under his direction, Du Pont has sold off over 30 unprofitable businesses and eliminated unnecessary layers of management.

Well liked and respected by his colleagues at Du Pont and in the industry, Woolard is known for his distinct Southern charm and easygoing demeanor, while having a keen awareness of the appropriate times to be tough. He enjoys intellectual debate.

Throughout his career with Du Pont, Brother Woolard's influence has spread to many other corporations, civic organizations and academic and religious institutions. He is a director of Citicorp, IBM Corp., the North Carolina Textile Foundation, Inc., the National Council on Economic Education, the Seagram Company, Ltd. and the Young Men's Christian Association in Wilmington, Delaware.

He also serves as a trustee of North Carolina State University, the Medical Center of Delaware, the Winterthur Museum and the Protestant Episcopal Theological Seminary in Virginia. A member of Rotary International, Woolard also manages to sit on the executive committee of the Delaware Roundtable, the Business/Public Education Council and the National Academy of Engineers, and he is a member of the Bretton Woods Committee, the World Affairs Council, the Business Council and the Policy Committee of the Business Roundtable.

Brother Woolard remains an avid North Carolina State Basketball fan. He and his wife, Peggy, have two daughters, Annette and Lynda, and they live in Wilmington. □

Emory Alumni Celebrate Founders Day

Alumni and actives gathered at the Beta Kappa Chapter house this spring to celebrate Founders Day with some special events. A new deck added to the house was dedicated to Past Housing Corporation President Laurence Stoumen (Emory, Beta Kappa '82), whose efforts on behalf of the chapter during the past four years have made a dramatic difference to Beta Kappa.

Two special guests attended the Founders Day luncheon. Velma Hill and Louise Johnson, cooks for Beta Kappa Chapter from the mid 1950s through the late 1980s, were recognized for their dedication and service to the men of Pi Kappa Alpha.

RUSH 2000

Rush 2000 is the National Rush Program aimed at increasing Pi Kappa Alpha's membership across the country. Rush is the lifeblood of all Pi Kappa Alpha chapters. If you know a young man who can both contribute to a chapter and develop himself through the Pi Kappa Alpha experience, we encourage you to fill out this recommendation form and send it to the Rush 2000 Coordinator at the Memorial Headquarters, who will see that it is immediately forwarded to the appropriate chapter. We strongly encourage you to recommend legacies, as the consideration of sons, brothers, nephews and grandsons is an important aspect of the Pi Kappa Alpha recruitment process.

Rush Recommendation:

Attach additional sheet if necessary

This is a legacy recommendation!

Attention Beta Delta Alumni:

A group of Beta Delta alumni is seeking to charter an active alumni association to reestablish the ties between the active chapter and alumnus members. The name of the association is The Pi Kappa Alpha New Mexico Area Alumni Association. All alumni in the New Mexico area are invited to join and participate.

The alumni association will host a golf tournament to increase alumni membership and raise money for a 1994 scholarship fund. The scholarship will be awarded to a qualifying active brother for the 1994-95 school year.

The tournament will be held in Albuquerque, NM on July 30th at the Paradise Hills Golf Course. Registration fee is \$75 per person, which will include green fee, cart rental, patio lunch, pro shop gift certificates, PKA Alumni golf shirt, and roaming beverage cart throughout the tourney.

For more information or to reserve a spot in the tourney, contact:

Jeff Romero
1-800-285-3647 or
(505) 265-5561

NEWS OF Bygone Days

100 YEARS AGO . . . From the chapter notes of Iota Chapter at Hampden-Sydney College: "We have refrained from buying a new carpet for some time because Brother James E. Ballou (*Iota 1892*), who is just on the verge we think, of cracking a joke this week, is given to dancing jigs, to the music of Brother Harry H. Erwin's (*Iota 1892*) banjo after Fraternity meetings, and the result is quite disastrous."

75 YEARS AGO . . . Edwin W. Zoller (*Pennsylvania State, Beta Alpha '18*) used the pages of the *Shield & Diamond* to stress the importance of alumni involvement: "Alumni, keep in touch with your local chapter! Find out what the undergraduate Pis are doing and be on the lookout for ways and means to benefit us. Then, as more men graduate and come to town, get together, and soon an alumni chapter will be the result. . . . Last of all, do not forget the old chapter house left behind upon graduation. Come back at any time to visit and keep up the old fight. None of us will lose any spirit by seeing the old boys again. So, alumni, let our slogan be cooperation."

50 YEARS AGO . . . "A picture of cooperation between three branches of our armed forces was revealed in a citation with the Silver Star awarded to Navy Lt. Lawrence E. Lewis II (*Miami, Gamma Omega '33*) for 'conspicuous gallantry during a rescue mission' last March in the South Pacific. . . . Former All-American football player Lt. Glenn Dobbs (*Tulsa, Gamma Upsilon '40*) became the first officer candidate in the history of OCS to receive both the individual military award and the best athlete award.

25 YEARS AGO . . . The Rev. Dr. Robert D. Lynn (*Presbyterian, Mu '31*) was elected Moderator of the Presbyterian Church in the United States at the opening of its General Assembly. . . . Executive Director E. Garth Jenkins (*Wake Forest, Gamma Phi '56*) addressed the Fraternity on what PiKA must do to prove its relevance to the prospective rushee. "We must live everyday, every minute of it, as if we were rushing someone. Indeed we are! Our pledge programs must reflect the genuine concern for the dignity of the individual, a cardinal requisite of campus values today. Our chapter activity must demonstrate an awareness of and commitment to intellectual fulfillment and social awareness as a complement to the college or university. Our non-private life outside of the confines of our house, lodge, or room must show that we really do care about being an integral part of the educational process."

Jeff H. Sneed '79 and his wife, Lynne, announce the birth of their daughter, Madison Paige, on January 4, 1994.

TENNESSEE-MARTIN

Edwin W. Cochran '69 is the athletic director and a teacher at Buford High School in Buford, Georgia. He and his wife, Becky, have two sons, Nathan and Ben.

Corrections

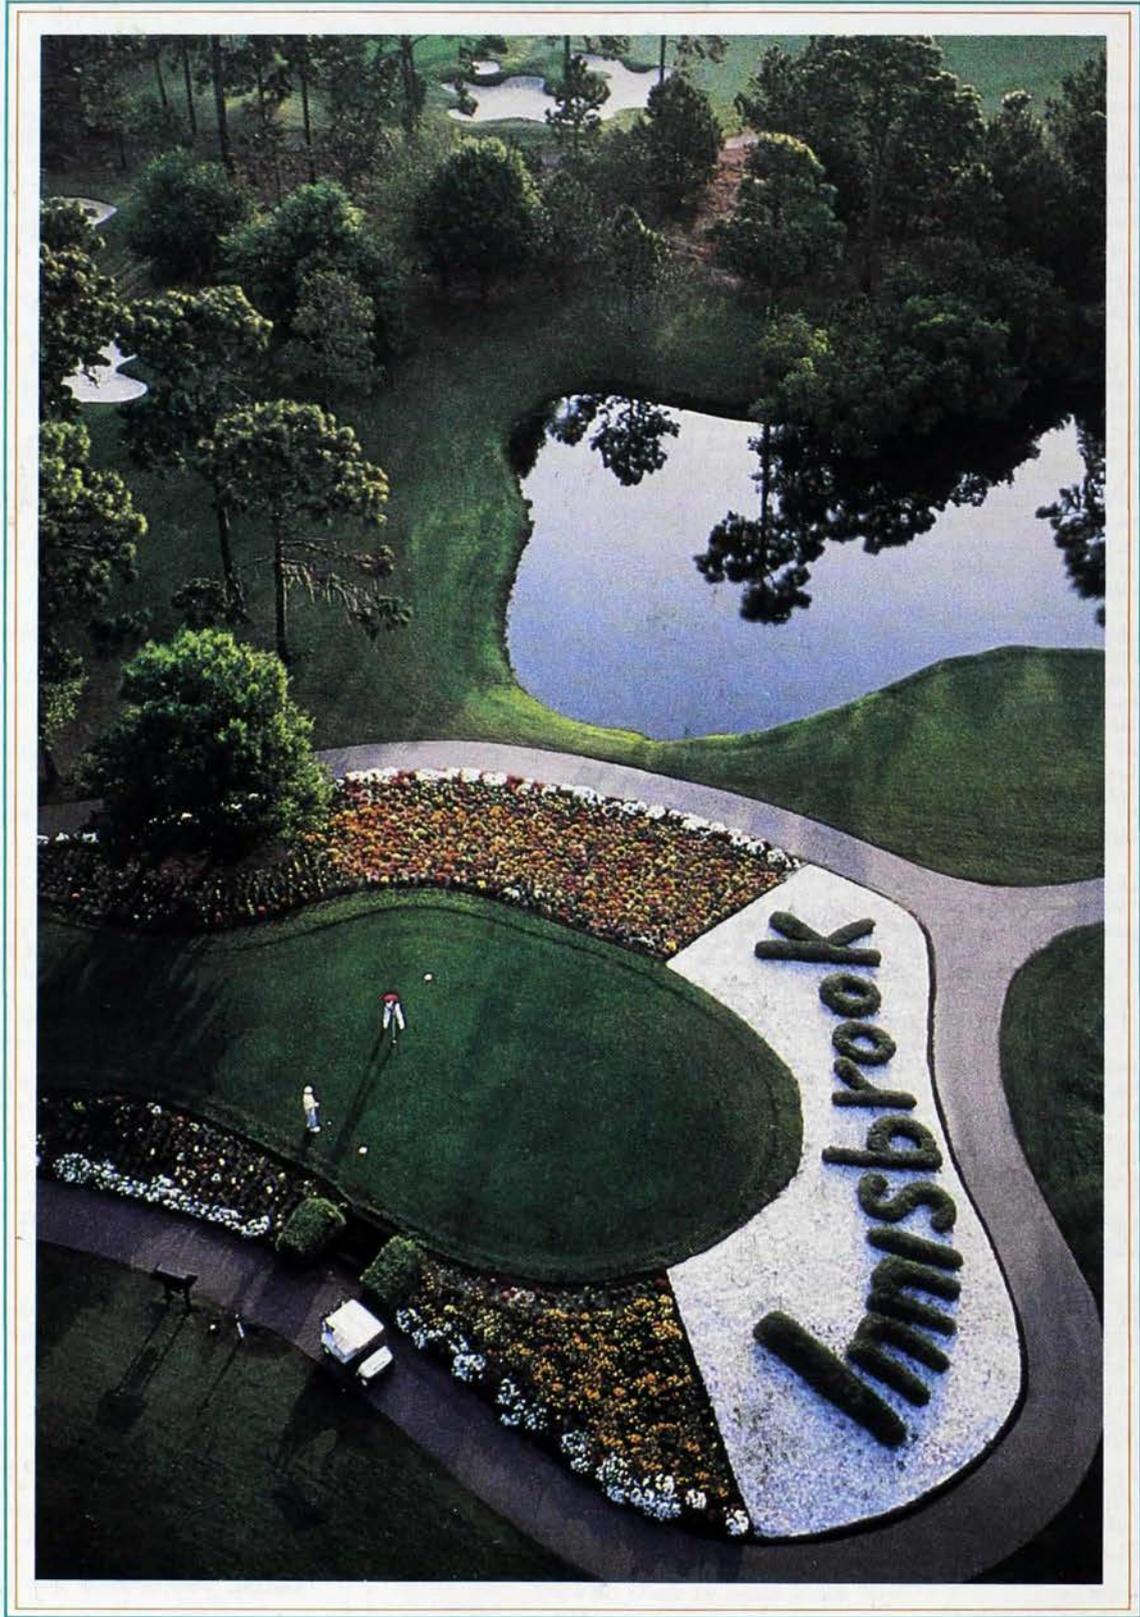

The March issue of *Shield & Diamond* erroneously listed the following brothers in Chapter Eternal:

James Philip Bradberry
(*Tennessee-Martin,*
Epsilon Sigma '68)

Nick D. Vaccaro, Jr.
(*Kansas, Beta Gamma '80*)

Fortunately, these brothers are still living. *Shield & Diamond* regrets the error.
